EXCELLENT ECONOMICS – STAGE 1 ONLY

Copper Production	kt Cu	36
Gold Production	koz Au	10
Pre-production Capital	A\$M	26
AISC	A\$/t	6,991
Timing to first production	mths	7

- ✓ Low capital - existing infrastructure and close proximity of lodes
- ✓ Low AISC - excellent geotechnical conditions and multiple headings enable efficient mining
- ✓ Since this study, the MRE increased by 1.2Mt (21%) which is expected to increase mine plan

Note: the AISC are based on Economic Assessment released in Dec-21. Since that date there has been a degree of cost escalation.

EXCELLENT ECONOMICS – STAGE 1 ONLY

- ✓ Lowest capital intensity in the world

EXCELLENT ECONOMICS – STAGE 1 ONLY

- ✓ Strong cashflows and short payback under any price assumption
- ✓ Near term project cashflows multiples of current market cap – without including increased MRE and new drilling which is still ongoing

> 100% EXPLORATION STRIKE RATE

- ✓ 143 Cu-Au intersections of economic grade and width from only 122 holes: **over 100%!**
- ✓ Mine plan does not include 1.2Mt added to MRE and recent Spitfire results
- ✓ Every drill program has increased MRE

JUST SCRATCHING THE SURFACE

- ✓ Stage 1 includes 2 of 9 lodes to 250m below pit
- ✓ All 9 lodes remain open at depth and along strike

JUST SCRATCHING THE SURFACE

- ✓ Drilling density limits mine plan to 250m below pit (~600mRL) but copper mineralisation has been confirmed at 500m below pit and still open.
- ✓ 2021/22 drilling increased Kavanagh MRE by 7kt Cu metal which is not in current economic assessment. When included, it is expected to increase mine plan.

- ✓ Area below Emily pit remains open
- ✓ Drilling underway

JUST SCRATCHING THE SURFACE

- North Hub: North Kav & Coopers**
- ✓ 9m @ 2.1% Cu 0.7 g/t Au
 - ✓ 10m @ 1.6% Cu 0.6 g/t Au
 - ✓ North Kavanagh lode visible in pit wall
 - ✓ Immediate low-cost access from existing pit haul road
 - ✓ ~200m strike length, 300m depth and still open

JUST SCRATCHING THE SURFACE

- ✓ Conceptual designs indicate North Hub and South Hub can be added to the plan for low incremental cost (pending successful confirmatory drilling)
- ✓ Mill only 40% utilised and plenty of TSF capacity, so additional throughput requires no further processing capex

- PERMITTED, LOW COST, LOW RISK, NEAR TERM COPPER PRODUCTION
- STAGE 1 ALREADY HAS STRONG FINANCIALS WITH SHORT PAYBACK PERIOD
- MULTIPLE ON-LEASE INFILL DRILLING TARGETS TO FURTHER INCREASE MINING INVENTORY
- PROCESSING CAPACITY TO RAMP UP COPPER PRODUCTION WITH NO ADDITIONAL CAPITAL

IMPORTANT NOTICE

CAUTIONARY STATEMENT

The Economic Assessment discussed herein has been undertaken to explore the technical and economic feasibility of developing an underground mine to economically and sustainably exploit the Kanmantoo Copper Gold Deposit, located in South Australia. The Kanmantoo Copper Gold Project (Kanmantoo or Project) is 100% owned by Hillgrove Resources Limited. The Production Target and financial forecasts presented in the Economic Assessment are shown on a 100% Project basis. The Production Target underpinning the Base Case financial forecasts included in the Economic Assessment comprises 72% Indicated Resources and 28% Inferred Resources. The Production Target included in the Economic Assessment relating to the project payback period of 7 months post the completion of pre-production works comprises 82% Indicated Resources and 18% Inferred Resources. The Mineral Resource Estimate underpinning the Base Case Production Target has been prepared by a Competent Person in accordance with the requirements in the JORC Code 2012. There is a lower level of geological and grade continuity confidence associated with Inferred Resources and there is no certainty that further exploration work will result in the conversion of Inferred Resource estimates to Indicated Resource estimates or return the same grade and tonnage distribution.

The economic outcomes associated with the Economic Assessment are based on certain assumptions made for commodity prices, concentrate treatment and recovery charges, exchange rates and other economic variables, which are not within the Company's control and subject to change from time to time. Changes in such assumptions may have a material impact on economic outcomes. To achieve the range of outcomes indicated in the Economic Assessment, additional funding will likely be required. Investors should note that there is no certainty that Hillgrove Resources will be able to raise that amount of funding when needed. It is also possible that such funding may only be available on terms that may be dilutive to or otherwise affect the value of Hillgrove's existing shares. This announcement contains forward-looking statements. Hillgrove has concluded it has a reasonable basis for providing the forward-looking statements included in this announcement and believes it has a reasonable basis to expect it will be able to fund the development of the project. However, several factors could cause actual results, or future expectations to differ materially from the results expressed or implied in the forward-looking statements. Given the uncertainties involved, investors should not make any investment decisions based solely on the results of the Economic Assessment.
