

June 2020 Quarterly Activities Report

Alderan Resources Limited (ASX: AL8) ("Alderan" or "the Company") is pleased to provide its quarterly activities report for the three-month period ending 30 June 2020. The commodity focus of Alderan is the discovery of high margin gold and copper deposits in the Western USA.

Tamra Option Agreements (Cu-Au-Mo)

In April 2020, Alderan signed Option Agreements with Tamra Mining Company LLC to acquire up to a 70% interest in the highly prospective **Valley/Crossroads** copper-gold and **Detroit** gold/copper/molybdenum projects in Utah, USA.

During the quarter, the Company successfully completed capital raising activities, raising approximately \$2.1 million, with proceeds to be used to complete an initial program at both projects. The Company has an option to spend US\$1 million on exploration at Valley/Crossroads and US\$250,000 at Detroit prior to April 2021.

Alderan has commenced exploration activities, including geological, geochemical and geophysical surveys, and is nearing completion of compilation and digitisation of historical exploration data from the past 100 years.

Figure 1: Alderan Project Locality Map showing its projects in Utah, USA.

Detroit Mining Project

The Detroit Mining Project is located about 56km northwest of Delta, Utah, and is host to a range of mineralisation styles. The location of the Project and adjacent areas is shown on the index map (Figure 1), with the focus of Alderan's exploration efforts in the Drum Mountains, being a discovery of a Carlin-like gold deposit. Carlin-like deposits have a number of key features¹:

- a) Favorable permeable reactive rocks (silty limestones and limey siltstones);
- b) Favorable structures;
- c) Gold-bearing hydrogeochemical solutions;
- d) Micron sized gold in disseminated pyrite;
- e) Common geochemical indicators As, Sb, Ba, Te, Se, Hg;
- f) Fairly common carbonaceous material.

Alderan has completed detailed geological mapping initially indicating that most of these parameters are satisfied. In addition, Alderan has found previous drill results on the Mitzpah Prospect, which are currently being compiled, that include 2,889m of drilling from 124 shallow vertical holes in the gold oxide cap, averaging 23m depth. The company expects to report further on this once the compilation is complete.

Alderan has defined a drill program which is currently being permitted. Details will be released once finalised with drilling likely to commence in late September.

Detroit semi-regional

Semi-regional BLEG/Stream geochemistry has been completed, prepared and sent for assaying with results expected during August. Alderan has also completed semi-regional geological mapping to better understand the mineralisation styles and controls.

Valley-Crossroads Project

Valley-Crossroads is adjacent to the Company's existing Frisco project in Utah. Alderan is targeting porphyry and skarn mineralisation, as well as sediment hosted gold.

Alderan has completed an airborne magnetic and radiometric survey. 3D inversion of all of the magnetic data has been completed to determine geometries, depths to magnetic bodies and magnetite content. The company has acquired ASTER hyperspectral data over the district, and processed it to highlight various mineral alteration assemblages. Compilation and validation of previous historic exploration data has been fast tracked, in conjunction with field inspection and mapping.

A first soil geochemical survey at Gold Peak has been planned and is being completed. A semi-regional stream/BLEG survey will commence after the soil geochemical survey.

The above initial exploration works will be used as input into drill targeting, which is to be completed in August.

White Mountain Project (Au)

The White Mountain project is 10km southwest of the Frisco Project. Alderan has completed and compiled ground geological mapping at the White Mountain Epithermal Gold Project. Further geological appraisal is planned. Alderan has planned a high resolution, deep penetrating Induced Polarisation survey to be completed in August in preparation for drilling in October, subject to results of the survey.

Frisco Project (Cu-Au-Zn-Ag)

During the quarter, Kennecott Exploration Company ("Kennecott"), a subsidiary of Rio Tinto plc, commenced exploration on Alderan's Frisco copper/gold/silver project in Utah, USA. Kennecott is earning up to 70% interest through exploration expenditure on the project.

Previously, Kennecott conducted field visits to assess ground conditions and determine logistics and safety requirements to support an initial drill program. Kennecott spent several weeks reviewing selected drill holes to understand the geology and planned an initial diamond drill program to follow up high-grade intersections at the Cactus Breccia and Accrington Skarn targets, as well as a deeper hole testing the Reciprocity IP Anomaly.

Kennecott and Alderan's subsidiary, Volantis Resources Corp., worked closely with the Utah Division of Oil, Gas, and Mining to permit near term drilling activities. A total of 15 previously permitted drill sites were removed from Volantis' existing permits and moved into a permit under Kennecott.

During May 2020, Kennecott commenced an initial four-hole 2,000m drill program to test targets at the Cactus Breccias, Accrington Skarn and Reciprocity areas including:

- At the **Cactus Breccias**, a hole to test for possible continuity between the Cactus and Comet Breccias.
- At **Accrington Skarn**, a hole to test an approximately 50m step-out from significant historic intercepts and to help determine continuity in the area.
- At the **Reciprocity target**, a deeper hole is planned to test the IP anomaly where, based on Kennecott remodelling of geophysical data, a previous hole drilled by Volantis may have been terminated before reaching the anomaly depth.

Progress has been slow due to COVID-19 related protocols. RTX has now received assays from the first Cactus hole. They are doing their QA/QC checks and other internal sign-offs required to release data to JV partners. We anticipate receiving assay results shortly. Further drilling will be dependent on results of the initial program.

This drill program forms part of the first earn-in stage for Kennecott's option to acquire a 55% project interest in Frisco by spending a total of US\$6 million of expenditure. Kennecott will earn 70% of the project by completing three stages which will total US\$30 million exploration expenditure.

Other

Alderan is also continuing to appraise other opportunities as they arise.

Corporate Activities

Cash at bank for the Company, as at 30 June 2020, is approximately \$2.13 million.

Capital Raising

In June, Alderan announced it had raised approximately \$2.1 million to progress exploration in Utah. It raised \$900,000 via a Placement of 18,000,000 shares at \$0.05 each to sophisticated and institutional investors. The Company also issued Convertible Notes with a face value of \$1.2 million, which automatically converted to shares at \$0.05 per share upon the Company receiving shareholder approval at its Extraordinary General Meeting held on 30 June 2020.

Alderan will use funds raised through the Placement and Convertible Note for its 2020 exploration program at the Valley-Crossroads and Detroit projects in Utah.

Board Change and Change of Company Secretary

Alderan announced the resignation of Director Marat Abzalov, effective 5 June 2020. The Company continues to leverage Mr Abzalov's geological expertise as a consultant. The Company also appointed Mathew O'Hara as Company Secretary, effective 15 July 2020, replacing Brett Tucker. The Company's registered corporate office and principal place of business also changed to the following:

Office address:	Postal address:
Suite 23, 513 Hay Street Subiaco WA 6008	PO Box 1311 Subiaco WA 6904

Telephone: +61 8 6143 6711
Facsimile: +61 8 9388 8824

Extraordinary General Meeting

Alderan convened an Extraordinary General Meeting of Shareholders on 30 June 2020, which was held via teleconference to comply with government regulations and restrictions on social distancing. All meeting resolutions were voted upon by poll and passed.

Appendix 5B Disclosures

In line with its obligations under ASX Listing Rule 5.3.5, the Company notes that the only payments to related parties of the Company, as disclosed in the Appendix 5B (quarterly Cashflow Report) for the period ended 30 June 2020, pertain to payments to executive directors for salary, non-executive director fees and partial payment of a termination fee to a former Director.

Changes in Claims / Tenements During the Quarter

There were no changes in claims held in the quarter. A list of claims held is provided at Appendix A following.
