

INVESTOR PRESENTATION

PERTH, AUSTRALIA; 22 October 2025: Hazer Group Ltd ("Hazer" or "the Company") (ASX: HZR) is pleased to attach the investor presentation materials which will be used at the 14th Australian Microcap Investment Conference today.

The presentation materials can also be accessed via the "Announcements" page of the Company's website: www.hazergroup.com.au.

This announcement was authorised for release by the Board of the Company.

ABOUT HAZER GROUP LTD

Hazer Group is an Australian technology company, driving global decarbonisation efforts with the commercialisation of the Company's disruptive world-leading climate-tech. Hazer's advanced technology enables the production of clean and economically competitive hydrogen and high-quality graphite, using a natural gas (or biogas) feedstock and iron-ore as the process catalyst.

Hazer Group Limited - Social Media Policy

Hazer Group Limited is committed to communicating with the investment community through all available channels. Whilst ASX remains the prime channel for market-sensitive news, investors and other interested parties are encouraged to follow Hazer on X (Twitter) (@hazergroupltd), LinkedIn, Facebook, and YouTube. Subscribe to HAZER NEWS ALERTS - visit our website at www.hazergroup.com.au and subscribe to receive HAZER NEWS ALERTS, our email alert service. HAZER NEWS ALERTS is the fastest way to receive breaking news about @hazergroupltd.

Forward-looking Statements

This announcement may contain certain "forward-looking statements" which may not have been based solely on historical facts but are based on the Company's current expectations about future events and results.

Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward-looking statements are subject to risks, uncertainties, assumptions, and other factors, which could cause actual results to differ materially to futures results expressed, projected, or implied by such forward looking statements.

The Company does not undertake any obligation to release publicly any revisions to any "forward-looking statements" to reflect events or circumstances after the date of this announcement, or to reflect the occurrence of unanticipated events, except as may be required under the applicable securities laws.

Disclaimer

Important information This presentation has been prepared by Hazer Group Limited ("Hazer" or "the Company")

Summary Information This document contains a summary of information about Hazer Group Limited and its activities that is current as at the date of this document unless otherwise stated. The information in this document is general in nature and does not contain all the information which a prospective investor may require in evaluating a possible investment in Hazer or that would be required in a prospectus or a product disclosure statement prepared in accordance with the Corporations Act 2001 or the securities laws of any other jurisdiction. The information in this document should be read in conjunction with the Company's other periodic and continuous disclosure announcements lodged with the ASX.

No Liability The information contained in this document has been prepared in good faith by the Company however no guarantee, representation or warranty expressed or implied is or will be made by any person (including the Company and its affiliates and their directors, officers, employees, associates, advisers and agents) as to the accuracy, reliability, correctness, completeness or adequacy of any statements, estimates, options, conclusions or other information contained in this document. No person other than the Company is responsible for the preparation of this document. To the maximum extent permitted by law, the Company and its affiliates and their directors, officers, employees, associates, advisers and agents each expressly disclaims any and all liability, including, without limitation, any liability arising out of fault or negligence, for any loss arising from the use of or reliance on information contained in this document including representations or warranties or in relation to the accuracy or completeness of the information, statements, opinions, forecasts, reports or other matters, express or implied, contained in, arising out of or derived from, or for omissions from, this document including, without limitation, any financial information, any estimates, forecasts, or projections and any other financial information derived therefrom. Statements in this document are made only as of the date of this document unless otherwise stated and the information in this document remains subject to change without notice. No responsibility or liability is assumed by the Company or any of its affiliates (or their directors, officers, employees, associates, advisers and agents) for updating any information in this document or to inform any recipient of any new or more accurate information or any errors or mis descriptions of which the Company and any of its affiliates or advisers may become aware.

Financial data All amounts are in Australian Dollars (AUD) unless otherwise indicated. A number of figures, amounts, percentages, estimates, calculations of values and fractions in this presentation are subject to the effect of rounding. Accordingly, the actual calculation of these figures may differ from the figures set out in this presentation. Readers should be aware that a number of terms used in this presentation including ROI, NPV, net cash generation, operational cash expenditure, IRR and actual and budgeted commitments are categorised as non-IFRS information prepared in accordance with ASIC Regulatory Guidance 230 (Disclosing non-IFRS financial information), nor does it purport to be. This information has not been audited and is based on management estimates and not on financial statements prepared in accordance with applicable statutory requirements. Accordingly, readers should treat this information with appropriate caution. This information is for illustrative purposes only. This non-IFRS financial measures do not have a standardised meaning prescribed by Australian International Financial Reporting Standards (AIFRS) or the Australian Accounting Standards (AAS) and, therefore, may not be comparable to similarly titled measures presented by other companies, nor should they be construed as an alternative to other financial measures determined in accordance with AIFRS. Moreover, the disclosure of such non-IFRS financial measures in the manner included in this Presentation and the announcement to which it is attached may not be permissible in a registration statement under other securities acts. Although the Company believes that these non-IFRS / non-GAAP financial measures assist in providing additional meaningful information to readers in measuring the financial performance and condition of the Company's business and underlying drivers, readers are cautioned not to place undue reliance on any non-IFRS / non-GAAP financial measures included in this Presentation and the announcement to which it is attached.

Forward Looking Statements Statements contained in this document or made during or in connection with this presentation, including but not limited to those regarding the possible or assumed future production, costs, projected timeframes, performance, dividends, returns, revenue, exchange rates, potential growth of Hazer, industry growth, commodity or price forecasts, or other projections and any estimated company earnings are or may contain or comprise forward looking statements. Forward looking statements can generally be identified by the use of words such as 'project', 'foresee', 'plan', 'expect', 'aim', 'anticipate', 'believe', 'estimate', 'may', 'should', or similar expressions. Forward looking statements including all statements in this presentation regarding the outcomes of preliminary and definitive feasibility studies, projections, guidance on future earnings and estimates are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, these statements relate to future events and expectations and as such involve known and unknown risks and significant uncertainties, many of which are outside the control of the Company. Actual values, achievements, results, performance, actions and developments of the Company may differ materially from those projected, expressed or implied by the forward-looking statements in this document. Such forward looking statements speak only as of the date of this document. There can be no assurance that actual outcomes will not differ materially from these statements. To the maximum extent permitted by law, the Company and any of its affiliates and their directors, officers, employees, agents, associates and advisers disclaim any obligations or undertaking to release any updates or revisions to the information in this document to reflect any change in expectations or assumptions do not make any representation or warranty, express or implied, as to the accuracy, reliability or completeness of the information in this document, or likelihood of fulfilment of any forward looking statement or any event or results expressed or implied in any forward looking statement and disclaim all responsibility and liability for these forward looking statements (including without limitation, liability for negligence). Nothing in this document will under any circumstances create an implication that there has been no change in the affairs of the Company since the date of this document. Accordingly, you should not place undue reliance on any forward-looking statement.

Not Financial Product Advice This document does not constitute financial product advice or take into account your investment objectives, taxation situation, financial situation or needs. This document consists purely of factual information and does not involve or imply a recommendation of a statement of opinion in respect of whether to buy, sell or hold a financial product. An investment in the Company is considered to be speculative in nature and is subject to known and unknown risks, some of which are beyond the control of the Company. Before making any investment decision in connection with any acquisition of securities, investors should consult their own legal, tax and/or financial advisers in relation to the information in, and action taken on the basis of this document.

Acceptance By attending a presentation or briefing, or accepting, accessing or reviewing this document you acknowledge, accept and agree to the matters set out above.

Authorisation This document has been authorised for release by the Board of the Company.

The background of the slide is a dark, atmospheric photograph of an industrial facility at night. The facility features a complex network of pipes, structural steel, and large storage tanks. In the foreground, several large blue industrial containers or tanks are visible. The sky is dark with some distant lights. Overlaid on the top right of the image is a decorative graphic consisting of a grid of hexagons in various shades of blue and orange. Some of these hexagons are further divided into triangles.

Converting Emissions into Energy and Critical Minerals

Affordable. Scalable. Now.

“Hazer Group is decarbonising industry with its breakthrough climate technology; accelerating the delivery of affordable clean hydrogen and valuable graphite; at scale”

The Hazer Solution

Hazer's technology advantage

Innovative low emission, low-cost methane pyrolysis technology producing clean hydrogen and graphite

- Hazer Group Limited is a technology company undertaking the commercialisation of the Hazer Process
- The Hazer Process enables low temperature conversion of natural gas and similar methane feedstocks, into hydrogen and high-quality graphite, using iron ore as a process catalyst

Fluidised bed reactor is proven technology re-purposed from refining and metallurgical industries, enabling scalability

Hazer vs. SMR: Disrupting the old, enabling the new

Hazer offers negligible emissions, cost competitive pathway for industries that already rely on hydrogen – without the challenges of carbon capture or electrolysis

Steam Methane Reforming (SMR) currently:

- ~95% of the today's global hydrogen production
- >1,500 plants globally supplying key industries like ammonia, methanol, and refining

	Steam Methane Reforming (SMR)	
Energy Intensity	13 kWh/kg H ₂	8-10 (lower)
Scope 1 CO ₂ emissions ¹	9-12 kg/CO ₂	0
Feedstock	Gas	Gas (same as SMR)
Carbon Capture / CO ₂ abatement	Required, costly & difficult	None (graphite upside)
H ₂ Cost (US\$)	~\$1/kg (without CCS)	~\$1/kg

• <https://about.bnef.com/new-energy-outlook/> SMR = Steam Methane Reforming, CCS = Carbon Capture and Storage

¹ Hazer process company modelled simulations, single pass mode with unreacted feedstock gas returned to grid

H₂ per kg Cost Range by Type*

De-risked technology...ready for market

Rapid development since company founding and advancing Tech Readiness (TRL)

(<1g* batch)

2007–2013

Bench scale testing

- University of Western Australia
- Concept evaluation

(<100g* batch)

2016–present

Scaled up bench test

- University of Sydney
- Catalyst kinetics and process research

(~1Kg* batch)

2017

Bench scale fluid bed

- University of Sydney
- Conceptual testing of fluidised bed concept

(~<2 kg/hr* semi-continuous)

2017–2021

Pilot Plant

- Sydney and Perth
- Fluidised bed with optimised conditions and catalyst injection

(100tpa H₂ continuous)

2022–2024

Commercial Demonstration Plant (CDP)

- Perth, Australia
- End-to-end continuous plant with biogas feed
- Operational in 2024

Project Development Pipeline

Key Projects

- Canada
- Chubu, Japan
- France
- Korea
- KBR-delivered

Strategic Focus

“Plug-in” technology using existing infrastructure

End-use deployment and application of the Hazer Technology eliminates H₂ transport risk and reduces cost

Conceptual design of Hazer facility co-located with 3rd party refinery
(Source: Stock image not Hazer infrastructure)

- Eliminates requirement for H₂ transportation cost and risk
- Co-located with end-user infrastructure
- Allows for shared services, lowers operating cost
- Technology ready today for integration into hard-to-abate industries e.g. steel making, petrochemicals/ refining & cement

Rapidly expanding customer pipeline

Tier-1 partners developing commercial projects in North America, Europe and Asia-Pacific

Extensive international project pipeline developing with large corporations across multiple industries

Graphite production diversifies earnings

A synthetic, low emissions product with differentiated morphology and properties

- Highly structured vs amorphous carbon black
- Iron inclusions produce magnetic graphite
- Low production emissions
- Up to 95% graphite purity
- High thermal & electrical conductivity
- Low sulphur & low ash content

- A leading international trading and investment group based in Japan
- Collaboration extended following positive feedback from several potential customers
- High confidence markets identified incl. steel making and chemicals industries
- Next phase includes testing of larger samples from Hazer's CDP

Go-to-Market Strategy & Business Plan

Overview of key scale-up development projects

BC, Canada

Nagoya, Japan

England, UK

Pohang, Sth Korea

Description	- Project Development Agreement Signed - New site selection in progress - Likely H₂ to be used at site location	- Existing LNG import terminal or power station site - H₂ as fuel for power generation, industry feedstock and mobility	- integration of the Hazer into EPP's Marram Energy Project - H₂ for ammonia prod. - Graphite for UK critical mineral supply	- Integration into existing plant - H₂ and graphite to be used in the steel making process
Partners		 		
Expected H₂ Production • Phase 1 • Phase 2	2,500 tpa 100,000+ tpa	2,500 - 10,000 tpa Up to 100,000 tpa	Initial 20,000 tpa	Medium scale demonstration Large scale deployment
Hazer Operating Model	Licensing	Licensing	Licensing	Licensing
Targeted Start-up (phase 1)	2026-2027	2027-2028	2030+	2030+

Solid progress on first commercial project in Canada

Partnership with FortisBC to develop a 2,500tpa hydrogen facility in Canada

Reactor pilot rig testing in Canada

- FortisBC 100% project owner; Hazer technology licensor
- Binding agreement for commercial scale plant; license fee framework agreed
- First revenues received and ongoing to FID
- Successful reactor pilot rig tested completed
- Initial FEED study completed; advancing site selection

Project supported by upfront C\$8mln of CleanBC Government funding package

Sales pipeline spanning key regions & sectors

Globally diversified pipeline across energy, industry & infrastructure; commercial engagements progressing

HAZER'S GLOBAL PIPELINE 45+ active global leads

1.2 Mtpa+ potential hydrogen capacity (~1% global market)

5+ oil & gas majors / petrochemicals

5+ ammonia producers

4 sustainable aviation fuel (SAF)

6 leading steelmakers

Size of potential plant (,000 tonnes/yr)

Blue – active project discussions
Pink – ongoing engagement

Strong & diversified customer pipeline

Existing project portfolio of over 1 million tonne per annum total capacity (~1% of existing demand)

Diversification Reduces Risk

Key Industry Sectors

40+ customer, strategic partnership & investor opportunities

Growth trajectory – 10+ plants in 10 years*

Potential for ~400 KTPA of Hazer installed H₂ capacity across target markets by 2034

2025 Current Portfolio

Current Highest Probability Projects

1. North America – BC, Canada
2. Asia-Pacific – Japan Chubu / Chiyoda project
3. Asia-Pacific – POSCO low emissions steel
4. Europe – ENGIE project
5. UK – EPP Project

2035 Target Portfolio

■ Asia-Pacific ■ North America ■ Europe

* Based on current active project discussions. Not inclusive of full project business development pipeline.

KBR Alliance Accelerates Technology Licensing

Why KBR?

Strategic alliance to accelerate commercialisation and licensing

Revenue (2023) US\$ 7.0 bln	Global Presence 81 + countries
Ammonia Market Share 50%+	Licensed Ammonia Plants > 250
Head Office Houston Texas, USA	Global Employees ~38,000

Proven track record of commercialising breakthrough industrial technologies

* Public information published by KBR and available at: <https://www.kbr.com/en>

Market leader in ammonia & methanol

Currently >450 ammonia and >90 methanol plants operating globally

● Existing ammonia terminal

● Current H₂ feedstock demand for ammonia and methanol [million tonne per annum]
Excludes coal gasification in China

Current Market

54 MTPA H₂ Demand

US\$ **120** billion

> **500** MTPA CO₂

KBR Market Share

50+%

AMMONIA CAPACITY

Binding deal to accelerate technology licensing

Key elements of the strategic alliance

Hazer will be KBR's exclusive partner for methane pyrolysis technologies

Market engagement gaining momentum

Progressing scale up, licensing and marketing to enable near-term deployment opportunities

Hazer Graphite

Global supply crunch amplifies Hazer's graphite opportunity

US set to impose additional tariffs on Chinese graphite supply places upward pressure and pricing and volumes

- Tier-1 critical mineral for the energy transition
- China dominates over 80% of graphite processing and supply
- US imposed 93.5% tariff on Chinese graphite²
- China tightening export controls on graphite; new bans on exporting processing technology & IP³
- Hazer's offers a local, high purity, low emissions alternative

% of Global Graphite Supply & Production from China (2023)¹

Sources: ¹ Global Critical Minerals Outlook 2024, IEA and "Graphite Shortage Sparks Global Supply Fight." mining.com.au, March 31, 2025

² US Department of Commerce has imposed a preliminary 93.5% anti-dumping tariff on Chinese natural and synthetic graphite active anode material (AAM) imports. Decision, announced in July 2025

³ Reuters, October 10th 2025: China expands rare earths restrictions, targets defense and chips users

Hazer Graphite is a versatile and valuable product

Testing and product development underway with project partners, potential offtakers and industry experts

Iron & steel manufacturing

Market Size (MPTA): **860**

Thermal energy storage

Market Size (MPTA): **4.1**

Several global engagements advancing

Graphite**

Other industrial uses

Market Size (MPTA): **12**

Defence, Rubber, Lubricants etc

Critical mineral applications

Market Size (MPTA): **1.5**

Corporate Update

Strategic priorities – Accelerating to scale

Multiple near-term catalysts to unlock value creation

Commercialising Technology

- 1 Accelerate process scale-up to meet demand for large-scale commercial projects
- 2 Unlock value potential in Hazer graphite

Accelerate Scale-up

- 3 Canada definitive license terms to support Final Investment Decision (FID)
- 4 Progress existing commercial portfolio through FEED

Growth & Monetisation

- 5 Secure strategic partnerships to accelerate project delivery
- 6 Continue to assess new licensing deals and other strategic opportunities

Lean organisation, continuous improvement culture and strong financial strategy

Assumptions and notes

Slides 10 - H2 per kg cost range by type and by market (No assurance that actual outcomes will not differ materially from these amounts.)

Sources: Company analysis and projections, modelling a range of notional outcomes:

1. Feedstock gas - North America ~US\$2.0/mmbtu, Asia Pacific US\$12/mmbtu, Europe ~US\$8.5/mmbtu
2. ~US\$500/tonne graphitic carbon revenue, offset against operating expenses.
3. Location-specific electricity pricing sourced from third-party market references.
4. ~US\$130/tonne company estimate for iron ore catalyst supply.
5. Other variables based on business judgement and company analyses.
6. No Government funding, tax incentives or debt funding upside benefit included.
7. Learning curve of 30% is applied to the low-end cost estimate to reflect process engineering, operating, maintenance, logistics and other expected efficiencies.
 - Rationale for inclusion: <https://hbr.org/1964/01/profit-from-the-learning-curve>
 - Learning curve applicable to construction projects (closest analogue). Supports ranges of 60-95% (inverse being 5-40%):
 - <https://www.fgould.com/americas/articles/applying-learning-curve-theory-construction-cost/>
8. Assumes that the Commercial Demonstration Plant demonstrates that the Hazer process technology is effective at producing graphitic carbon and high purity hydrogen consistently and reliably as has occurred in prior smaller size pilot project

Slide 28: Hazer Graphite is a versatile and valuable product
