

GROWING A GREAT AUSTRALIAN MINING COMPANY

Independence Group

Australian Resources Conference & Trade Show

Chris Bonwick, Managing Director

14 November 2012

Certain oral and written statements contained or incorporated by reference in this presentation, including information as to the future financial or operating performance of the Company and its projects, constitute forward-looking statements. All statement, other than statements of historical fact, are forward-looking statements. The words “believe”, “expect”, “anticipate”, “contemplate”, “target”, “plan”, “intend”, “continue”, “budget”, “estimate”, “may”, “will”, “schedule” and similar expressions identify forward-looking statements.

Forward-looking statements include, among other things, statements regarding targets, estimates and assumptions in respect of nickel, gold or other metal production and prices, operating costs and results, capital expenditures, mineral reserves and mineral resources and anticipated grades and recovery rates. Forward-looking statements are necessarily based upon a number of estimates and assumptions related to future business, economic, market, political, social and other conditions that, while considered reasonable by the Company, are inherently subject to significant uncertainties and contingencies. Many known and unknown factors could cause actual events or results to differ materially from estimated or anticipated events or results reflected in such forward-looking statements. Such factors include, but are not limited to: competition; mineral prices; ability to meet additional funding requirements; exploration, development and operating risks; uninsurable risks; uncertainties inherent in ore reserve and resource estimates; dependence on third party smelting facilities; environmental regulation and liability; currency risks; effects of inflation on results of operations; factors relating to title to properties; native title and aboriginal heritage issues; dependence on key personnel; and share price volatility and also include unanticipated and unusual events, many of which are beyond the Company’s ability to control or predict.

The Company disclaims any intent or obligation to update any forward-looking statements, whether as a result of new information, future events or results or otherwise. All forward-looking statement made in this presentation are qualified by the foregoing cautionary statements. Investors are cautioned that forward-looking statements are not guarantees of future performance and, accordingly, not to put undue reliance on such statements.

Capital Structure:	ASX 200 Code : IGO 232.9M shares	
Financials:	Market Cap. (12/11/12):	A\$999.1M
	Cash (end Sept Qtr 2012):	A\$146.9M
	Debt (end Sept Qtr 2012):	(A\$21.4M)
Substantial shareholders:	65 Institutions in Top 100 67% Australian 10% Overseas	
Dividends:	Interim dividend (23 Mar 2012)	2c
	Final dividend (28 Sep 2012)	1c
	Total Dividends Paid to Date	70c
Paid to Governments:	Corporate Tax A\$135M Royalties A\$46M	

- Combination of low cost cash flows from current operating mines with significant long-life development projects and highly prospective exploration

- Highly complementary management and technical capabilities, with proven successful track records of exploration, project management and operations

- **Record^ Annual 2012 Production – 9,995t Ni (2011/12 Guidance 8,800-9,200t Ni).**
- **IGO produced over 83,000t Ni since acquisition.**
- **June 2012 Ore Reserve 41,900t Ni and Resource 76,600t Ni.**
- **Exploration success continues to add to Mining Inventory**

Long Nickel Operation	2011/12 Actual	2012/13 Guidance	Sept Qtr 2012
Production (Ni Tonnes)	9,995	9,200 – 9,600	2,952
*Cash Costs (A\$/lb Ni)	\$4.74	\$4.80 - \$5.00	\$3.88
Tonnes	282,177	260,000 – 280,000	76,713

* Cash Costs are reported based on Payable Metal Including Royalties

^Record during the ten years of IGO ownership

- **Hedging : FY13 200 Ni tonnes per month @ A\$12.17/lb**

HEAVY MEDIA SEPARATION PLANT

- Removes waste rock from diluted ore and stringer sulphides.
- Increases mill head-grade resulting in reduced processing costs.

- Long term exploration asset to find new Australian mineral camps.
- 293,000 geochemical samples collected by De Beers over 30 years.
- IGO analysing samples for 57 elements including Ni, Cu, Pb, Zn, Au, Ag, Pt, Pd, U, rare earths, Sn, Li, K etc.
- Over 49,000 samples analysed to date generating numerous geochemical anomalies.
- IGO has pegged a number of previously unknown gold, copper, zinc and tin anomalies.

Sample storage

- No buy-back or royalties in future mineral discoveries

WORKING WITH A

MAJOR INTERNATIONAL GOLD COMPANY

- **Partnership:** IGO Innovation in Targeting and Pegging Ground
AGA Financial “grunt” to explore large remote areas
- **JV Terms:** AGA to earn 70% interest by funding to the completion of a PFS
 - Well structured and Fair JV Agreement
 - Good Platform for Exchanging Ideas and Inputs
- **IGO “discovery cost”** ~A\$42 per Reserve Ounce (Incl. all Exploration and Feasibility Costs)
~ A\$19 per Resource Ounce (All Exploration Costs)
- **AGA Highly Credible JV Partner with:**
 - Long term Commitment to Exploration
 - Strong Global Mining and Processing Expertise
 - High Level of Innovation (HPGR crushing, Mining Automation)
 - Strong Financial Partner
 - Successful Project Control Tendering and Cost Management
 - Good communications between Partners

- IN 2011 DOMESTIC GOLD PRODUCTION >100KOZ CAME FROM 31 OPERATIONS

* Based on BFS Production Years 1-3

AUSTRALIAN GOLD PRODUCTION

Independence Group

- BETWEEN 2000 AND 2011 AUSTRALIAN GOLD OUTPUT HAS BEEN STEADY
- CASH COSTS HAVE INCREASED 100%

Source:

COMPANIES	LOCATION
Silver Lake / Integra	Kalgoorlie, WA focus
Evolution / Conquest Mining / Catalpa: 2 Newcrest mining Assets	Queensland and WA
Resolute / Noble Minerals	Africa focus
Alacer / Avoca Minerals	Australia and Turkey focus
Focus / Crescent Gold – then merger into Chinese Shangdong Gold	Kalgoorlie, WA focus
Northern Goldfields / Chinese Zijin Mining Company	Kalgoorlie, WA focus
St Barbara / Allied Gold	WA and PNG
Auzex Resources / GGG Resources Bullabulling merger	Kalgoorlie, WA focus

- No significant major international gold producer takeover activity at this stage
- International gold producers focused on reducing costs
- Chinese companies starting to take over / farm into high cost Australian gold producers.

- FOLLOWING THE LOW OF THE GFC GLOBAL
- GOLD PRODUCTION HAS INCREASED TO LEVELS REACHED IN THE EARLY 2000's

Global Gold Production and C1 Cash Cost net of By Products

- GLOBAL CASH COSTS AND GOLD PRICE HIGHLY CORRELATED
- A FUNCTION OF LOWER GRADE MATERIAL BECOMING ECONOMIC

Notes:

The information in this summary presentation that relates to Exploration Results is based on information compiled by Mr Christopher M Bonwick who is a full-time employee of the Company and is a member of the Australasian Institute of Mining and Metallurgy. Mr Bonwick has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Bonwick consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this summary presentation that relates to Mineral Resources or Ore Reserves is a compilation of previously published data for which Competent Persons consents were obtained. Their consents remain in place for subsequent releases by Independence Group NL of the same information in the same context, until the consent is withdrawn or replaced by a subsequent report and accompanying consent. Public releases to the ASX of Mineral Resources or Ore Reserves have been referenced on each slide in this summary presentation, in accordance with clause 5 of the 2004 edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. These references include the Competent Persons consent for each Mineral Resource or Ore Reserve.
