

EUROZ CONFERENCE PRESENTATION

Attached is a presentation to be given today, by Peter Bradford, Managing Director and CEO at the Euroz Securities 2017 Institutional Conference.

The presentation provides:

- An overview of the Company;
- A summary of the Company's strong 1H17 operating and financial performance;
- An update of each of the key assets in the Company's diversified portfolio of gold and base metals mines along with a summary of the work being done to optimise and maximise value by unlocking operational improvements and opportunities to extend mine life; and
- A summary of the Company's belt scale greenfields exploration projects on the Fraser Range in Western Australia and at Lake MacKay in the Northern Territory.

The Euroz Securities Institutional Conference gives the Company an opportunity to engage with an audience comprised of some of Australia's leading institutional investors and this follows a site visit yesterday, with a number of these institutional investors, to the Company's Nova mine which is ramping up to full production in CY17.

EUROZ CONFERENCE

Peter Bradford, Managing Director and CEO

14 March 2017

Cautionary Statements & Disclaimer

- This presentation has been prepared by Independence Group NL ("IGO") (ABN 46 092 786 304). It should not be considered as an offer or invitation to subscribe for or purchase any securities in IGO or as an inducement to make an offer or invitation with respect to those securities in any jurisdiction.
- This presentation contains general summary information about IGO. The information, opinions or conclusions expressed in the course of this presentation should be read in conjunction with IGO's other periodic and continuous disclosure announcements lodged with the ASX, which are available on the IGO website. No representation or warranty, express or implied, is made in relation to the fairness, accuracy or completeness of the information, opinions and conclusions expressed in this presentation.
- This presentation includes forward looking information regarding future events, conditions, circumstances and the future financial performance of IGO. Often, but not always, forward looking statements can be identified by the use of forward looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "continue" and "guidance", or other similar words and may include statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs. Such forecasts, projections and information are not a guarantee of future performance and involve unknown risks and uncertainties, many of which are beyond IGO's control, which may cause actual results and developments to differ materially from those expressed or implied. Further details of these risks are set out below. All references to future production and production guidance made in relation to IGO are subject to the completion of all necessary feasibility studies, permit applications and approvals, construction, financing arrangements and access to the necessary infrastructure. Where such a reference is made, it should be read subject to this paragraph and in conjunction with further information about the Mineral Resources and Ore Reserves, as well as any Competent Persons' Statements included in periodic and continuous disclosure announcements lodged with the ASX. Forward looking statements in this presentation only apply at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information IGO does not undertake any obligation to publically update or revise any of the forward looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.
- There are a number of risks specific to IGO and of a general nature which may affect the future operating and financial performance of IGO and the value of an investment in IGO including and not limited to economic conditions, stock market fluctuations, commodity demand and price movements, access to infrastructure, timing of environmental approvals, regulatory risks, operational risks, reliance on key personnel, reserve and resource estimations, native title and title risks, foreign currency fluctuations and mining development, construction and commissioning risk. The production guidance in this presentation is subject to risks specific to IGO and of a general nature which may affect the future operating and financial performance of IGO.
- Any references to IGO Mineral Resource and Ore Reserve estimates, except the Tropicana Mineral Resource and Ore Reserve should be read in conjunction with IGO's 2016 Mineral Resource and Ore Reserve announcement dated 14 October 2016 and lodged with the ASX, which are available on the IGO website.
- References to Mineral Resource and Ore Reserve estimates at Tropicana should be read in conjunction with IGO's Tropicana Gold Mine Value Enhancement Update, dated 15 December 2016 and lodged with the ASX, and is available on the IGO website.
- All currency amounts in **Australian Dollars** unless otherwise noted.
- Cash Costs are reported inclusive of Royalties and after by-product credits on per unit of payable metal basis, unless otherwise stated
- IGO reports All-in Sustaining Costs (AISC) per ounce of gold for its 30% interest in the Tropicana Gold Mine using the World Gold Council guidelines for AISC. The World Gold Council guidelines publication was released via press release on 27 June 2013 and is available from the World Gold Council's website.
- Underlying EBITDA is a non-IFRS measure and comprises net profit or loss after tax, adjusted to exclude tax expense, finance costs, interest income, asset impairments, depreciation and amortisation, and once-off transaction costs.
- Underlying NPAT comprises net profit (loss) after tax adjusted for; post tax effect of acquisition and integration costs, and impairments.

Key Messages

Diversified mining company delivering cash flow and growth

Solid operational and financial performance in 1H17

Tropicana and Long delivering at better than guidance

Long and Jaguar delivering strong cash flow

Nova ramping up to name plate in 2017

Value enhancements initiatives at Tropicana and Jaguar

Balance sheet remains strong with cash flow strengthening

Market Profile and Share Ownership

Strong domestic institutional and retail support

Market Profile and LTM Share Price Performance⁽¹⁾

- A\$2.1 billion market capitalisation
- 17% share price growth LTM
- 3-month average daily trading volume of 5.4M

Share Ownership⁽¹⁾

Substantial Holders

Mark Creasy	16.5%
FIL	9.9%
Van Eck	5.9%
Ausbil	5.3%
CBA	5.2%

Institutional Ownership

Australia	69%
USA	21%
UK & Europe	5%
ROW	5%

¹⁾ As at market close 10 March 2017

1H17 Earnings Summary

Higher overall metal prices deliver improved earnings

1) Underlying EBITDA is a non-IFRS measure (refer to Disclaimer page)

1H17 Cash Flow Summary

Strong balance sheet with net debt of A\$91M

- 1) Free Cash Flow comprises Net Cash Flow from Operating Activities and Net Cash Flow from Investing Activities. Underlying adjustments exclude proceeds from investment sales and payments for investments. They also exclude net payment for the acquisition of Sirius Resources NL and transaction costs
- 2) Funds raised through completion of institutional placement and share purchase plan, net of costs totalled A\$274.3M see ASX releases dated 28 July 2016 and 26 August 2016

Independence Group Overview

Value focused strategy and transformational growth of EBITDA

Diversified mining company

Quality

Scale

Longevity

Geographical focus

Our purpose is to create long-term shareholder value through discovery, acquisition, development and operation of high-margin, long-life mining projects diversified by commodity and geography.

Tropicana Overview

Making a great asset better through value enhancement

Large scale open pit gold mine

- 30% IGO and 70% AngloGold Ashanti
- Located 370km East NE of Kalgoorlie

Achievements

- 1H17 production and costs better than guidance range
- Processing plant rate increased to 7.5Mtpa
- Long Island Study progressed
- Reserve and Resource increased in 2016⁽¹⁾

1H17 performance

- 66,370oz gold produced⁽²⁾
- Cash cost of A\$821/oz and AISC of A\$1,070/oz⁽²⁾

Opportunities

- Finalisation of Long Island Study
- Further plant expansion
- Regional exploration accelerating

1) As per Tropicana Gold Mine Value Enhancement Update on 15 Dec 2016

2) IGO share

Tropicana

Value enhancement delivers 79% increase in value

Further value enhancement to be unlocked in 2017

Additional mine life increase

Incremental plant expansion

Acceleration of regional exploration

Tropicana

Processing plant optimisation and expansion

7.5Mtpa expansion successfully completed

29% increase in throughput compared to nameplate

200 - 400ktpa further expansion targeted in CY17

A\$6.9M improvement capital estimated in CY17 (100% basis)

Tropicana

Mining fleet and grade streaming

600 tonne class face shovel added to fleet

Increased mining rates in CY17 to ~80Mtpa

Results in higher AISC in CY17

Unlocks 2nd phase of Grade Streaming

Higher planned processed head-grade from
for 2017-2019⁽¹⁾

Directional Production and AISC⁽¹⁾

1) Grade streaming and elevated mill head-grades delivered through an accelerated mining rate and stockpiling strategy. This is scheduled for approximately three years.

Tropicana Exploration

Framework and resource extension drilling

Strip mining
concept

160,000m of
drilling

Structural change
to costs

Ore reserve
growth

Tropicana

Long Island Study – What is it?

Based on strip mining strategy

- Possible due to tabular geometry and strike extent
- Unlocks additional down plunge resource

Strip mining delivers lower mining costs

- Shorter hauls due to in-pit dumping of waste
- Transition to face shovels
- Mining of bigger benches to reduce drill and blast costs

Tropicana LoM pit to be starter pit

- Backfill with waste from Boston Shaker to the north and Havana to the south

25-30% potential reduction in unit mining costs per tonne through Long Island strategy

Long Overview

History of consistent production and reserve replacement

High grade underground nickel

- Located in Kambalda, 60km south of Kalgoorlie
- +35 year operating history at average 3.9% Ni
- Owner operated underground mining

Achievements

- Consistent low cost performer
- 1H17 production and costs better than guidance

1H17 performance

- 4,229t nickel at A\$3.21/lb⁽¹⁾

Concerns to manage

- Current reserve life to February 2018

Opportunities

- Near infrastructure resource extension
- Moran South and McLeay South

1) Cash costs are inclusive of royalties and net of by-product credits per unit of payable metal

Jaguar Overview

High grade Zn-Cu VMS camp

High grade underground Zn-Cu-Ag-Au VMS deposit

- Located 300km north of Kalgoorlie via sealed road
- Fly in – fly out from Perth
- Owner operated underground mining & onsite concentrator

Achievements

- Improved operational consistency over last few years
- Reserve increase in 2016
- Triumph discovery and resource drilling

1H17 performance

- 18,641t Zn & 2,746t Cu at A\$0.77/lb Zn⁽¹⁾

Opportunities

- Process plant currently mine constrained
- Triumph prospect Maiden Resource estimate and PFS underway
- Further resource extension at Bentley
- Regional exploration potential for gold and base

1) Cash costs are inclusive of royalties and net of by-product credits per unit of payable metal

Four areas of exploration focus at Jaguar

Ore Reserves

- ~150% increase in Ore Reserves in FY16 from Mineral Resource conversion drilling program⁽¹⁾

Four areas of exploration focus in CY17

- Triumph: Definition drilling completed. Now progressing maiden resource estimate and PFS
- Bentley: Now drilling down plunge extension of mineralisation on Arnage and Flying Spur lenses below resource wire frame
- Base metals regional exploration at Wilson Creek, Garden Well and Madman
- Gold regional exploration at Heather Bore, Halloween and South Possie Well

1) For further information on Mineral Resources and Ore Reserves refer to ASX release dated 14 October 2016

Jaguar

Triumph Prospect

Bentley depth extensions and Heather Bore gold prospect

Nova Overview

World class, low cost magmatic nickel-copper project

Underground nickel-copper project in ramp up

- Located in highly prospective Fraser Range
- 350km SE of Kalgoorlie and 350km from port of Esperance in WA
- World class project

Achievements

- Discovery to first production in $4\frac{1}{4}$ years
- First production delivered 6 weeks ahead of schedule
- Expect to reach name plate capacity one year earlier than DFS

Concerns

- Development advance behind schedule

Opportunities

- Optimise and maximise once name plate achieved
- Resource extension
- Mining lease and Fraser Range under-explored

Nova Project

Significant value unlocked through optimisation

Optimisation study in December 2015

- Improved mining schedule and sequencing to prioritise higher-value ore early in the mine life
- Accelerated ramp up to fill the processing plant earlier
- Captured current contracted rates and forecast operating cost structure

Early development of Bollinger

- Delivers greater operational flexibility

1) For further information see ASX release 14 December 2015, Nova Project Optimisation Study

2) For further information see ASX release 21 July 2016, Accelerated Bollinger Decline at Nova Project

Nova Project

Project significantly de-risked

Far better progress than envisaged in Feasibility Study

- ✓ Process plant construction completed 4 weeks ahead of schedule
- ✓ First nickel and copper concentrates announced 6 weeks ahead of schedule
- ✓ First nickel concentrate delivered to BHP Nickel West in early December 2016
- ✓ All surface infrastructure completed and operational except commissioning of paste plant in April 2017
- ? Underground development currently behind plan resulting in potential delay to ore production ramp up

First nickel concentrate leaving

Nova Project

12km of mine development completed project to date

Nova Mining Schedule

Nova Project

Metallurgical commissioning and performance

Smooth commissioning with no material issues

- Minor issues with TETA reagent control and some replacement of pumps and motors

Expect to achieve design throughput, recoveries and concentrate grades when transition to ROM massive ore

- Commissioning hamstrung by lack of ore
- Low grade Upper Nova ore used for commissioning
- More difficult to achieve design recovery and concentrate grade when on low grade

First concentrate shipped in December 2016

- Three year off take agreements for Ni and Cu concentrate
- Ni concentrate split 50/50 with Nickel West & Glencore
- Cu concentrate 100% contracted with Trafigura
- Shipments to Glencore & Trafigura will be via Esperance
- First offshore shipments expected in April/May 2017

Nova Project

Exploration around Nova to accelerate in CY17

People

- Dedicated Exploration Manager appointed for IGO's Fraser Range interests
- Strengthened technical staff

CY17 work programs

- Drill testing of potential resource extensions underway
- 2D seismic data collection underway on Nova mining lease
- Drill testing of EM conductors on mining lease planned
- Downhole EM beneath Nova- Bollinger using in-mine EM loop planned

Consolidated tenements around Nova

- Downhole EM beneath Nova- Bollinger using in-mine EM loop planned

R&D and innovation

- Using R&D and innovation to unlock discovery

Exploration

IGO committed to delivering growth through exploration

A\$33M exploration budgeted across portfolio

- Targeting provinces that can deliver multiple gold and base metals projects
- Increasing focus on generative and greenfields projects
- Expect to grow exploration spend to A\$50M in FY18

FY17 Exploration Budget

Greenfields Exploration

Nova – Tropicana Belt

Highly prospective belt

- Hosts two of Australia's best gold and base metals discoveries in last 12 years
- Underexplored

Early consolidation by IGO

- Creation of belt scale exploration opportunity leveraged to Nova infrastructure and geological understanding
- IGO best placed to complete systematic exploration through a holistic belt scale understanding to unlock the next transformational discovery
- 12,000km² outside Tropicana JV
- 3,000km² within Tropicana JV

Work programs

- Completed integration and levelling of acquired data
- Commence comprehensive aircore geochem and geophysical programs in 2017

Fraser Range Exploration

Regional drilling around Nova

- New frontier with exploration focus only after Nova discovery in 2012
- Exploration has been limited given prospectivity of the belt, primarily as discontinuous land positions held by underfunded juniors at bottom of commodity price cycle
- IGO completing greenfields exploration in brownfields environment with significant opportunity for discovery

Greenfields Exploration

Lake Mackay – the next belt scale, new frontier

Concluding comments

Diversified mining company delivering cash flow and growth

Solid operational and financial performance in 1H17

Tropicana and Long delivering at better than guidance

Long and Jaguar delivering strong cash flow

Nova ramping up to name plate in 2017

Value enhancements initiatives at Tropicana and Jaguar

Balance sheet remains strong with cash flow strengthening
