

ASX ANNOUNCEMENT

IMEXHS signs a new distribution agreement for Brazil.

HIGHLIGHTS:

- ImExHS Limited and WEBSiS Tecnologia & Sistemas (WEBSiS), have signed a distribution agreement for the Brazilian Market.
- Brasilia-based, WEBSiS is a specialized Hospital Information System (HIS) provider with experience working with the Brazilian public sector and private healthcare markets. IMEXHS's Hiruko suite complements Websis' existing HIS solutions.
- Brazil is South America's largest economy and the 9th largest in the world. According to the World Bank, in 2017 total health expenses corresponded to 9.1% of GDP. The country has tremendous potential to use digital health to modernize and integrate its healthcare system, which is widely spread across the fifth largest country in the world.

SYDNEY — 22 May 2019 — Australian medical imaging company **ImExHS Limited [ASX: IME]** is pleased to announce this new distribution agreement with WEBSiS Tecnologia & Sistemas.

"This relationship represents an excellent opportunity for ImExHS to assess the Brazilian market with a local distributor experienced in selling into the public and healthcare markets," said ImExHS Chief Sales Officer Andres Vanegas. "WEBSiS has more than 20 years of experience delivering software-based projects to the Brazilian Government and we look forward to working together to develop our opportunity set and appropriate solutions for this significant market."

Brazil has over 6,700 hospitals, of which 70% are private, yet only 25% of the population has access to private healthcare. With 75% of Brazil's population (approximately 150 million people) only having access to the public healthcare system, and to address the increasing prevalence of chronic diseases and a rising demand for better healthcare services, the Brazilian Ministry of Health has prioritized the digitalization of its Unified Health System – a fundamental structure for healthcare in Brazil.¹

ImExHS's CEO Dr German Arango said; "With over 50% of hospitals found in 5 states, and due to Brazil's large land area, the public hospital infrastructure relies on a vast network of small hospitals. These circumstances are well suited for us as we can deliver lower cost, innovative, cloud-based systems which can serve multi-site operators."

¹ Austrade – Health and Medical – Brazil, 2019.

This annually renewable, non-exclusive agreement is consistent with IME's other distribution agreements and reflects our low-risk strategy of working with experienced distributors to spearhead entry into new markets.

ABOUT IMEXHS

ImExHS Limited [ASX: IME] is a leading imaging Software as a Service (SaaS) and ancillary service provider in Latin America. Founded in 2012, ImExHS is known for its innovation in the imaging services market, offering flexible and scalable imaging solutions via its Hiruko branded suite of solutions for next generation Picture Archiving and Communications System (PACS) and integrated Radiology Imaging System (RIS). The Hiruko system is completely cloud based, vendor neutral and zero footprint with no need for installed software. Enhanced features such as a fully web-based voice recognition option and a zero footprint DICOM viewer are some of its advanced features. In addition to PACS and RIS, imaging technology and management systems can be provided on a Platform as a Service (PaaS) basis when packaged with equipment. The ImExHS products are designed to increase productivity and save money for the users, with a scalable platform that is configured for the future, while enhancing patient outcomes.
