

Linus to present at Virtual Conference

Melbourne, Australia – 19 November, 2020: Linus Technologies Limited (ASX: LNU) – the only cloud-based solution that transforms static video into [hyper-personalized video](#) experiences with its world-first [Video Virtualization Engine™](#) (VVE) – is pleased to provide an opportunity for Shareholders and Investors to view a virtual presentation by the Linus team, to be held at 4:30pm (AEST) on Wednesday 25 November, 2020.

Following the last webinar held in September, the Linus team would like to provide Investors with an update which includes details of a new product launch in the video conferencing and enterprise collaboration space, and further commercial updates.

Event: Linus Technologies - Market Update
Presenting: Chris Richardson, CEO and Gerard Bongiorno, Executive Chairman plus key members of the Linus Operating Team
When: Wednesday 25 November 2020, 4:30 PM Canberra, Melbourne, Sydney
Where: Zoom Webinar, details provided upon registration

[Please register in advance by clicking on this link.](#)

After registering, you will receive a confirmation email containing information about joining the webinar.

The Company will release an updated presentation prior to the event, and Investors are invited to submit questions in advance to ir@linus.com.

There will also be an opportunity to feed questions through to the Panel throughout the presentation. A recording of the session will also be made available for those unable to attend.

This announcement has been authorised for release to ASX by the Linus Board of Directors.

**About Linus Technologies Limited:**

Linus is a global software-as-a-service company headquartered in Australia, with operations in London, New York and Europe. Linus has invented and patented the Video Virtualization Engine™ (VVE), which indexes, analyzes and tags each frame in a conventional video file and transforms it into a fully searchable Virtualized Video.

Linus' technology exposes the data that makes up the video file, making cumbersome video as flexible as all other forms of data. Accessing the data within the video file is the missing link for video cloud service providers, creating unparalleled value across the internet video industry. Linus' VVE powered hyper-personalization and search solution enables anyone to instantly search the data within video, from across an infinite number of sources, and automatically assemble the results in a single stream on-the-fly. No human hands required.
