ASX Release

Date: 27 January 2004.

SELECTION BY DAVENPORT, IOWA, FOR RED LIGHT CAMERA PROGRAM

The Directors of Transol Corporation ('Transol') are delighted to announce that the City of Davenport, Iowa, has selected Transol USA, Inc., a wholly owned subsidiary of Transol, to operate its red light camera program.

This latest award opens up a third operating state in the USA for Transol. Transol USA, Inc. has now been selected to operate photo enforcement programs for a total of six cities across the states of Colorado, California and Iowa within its first operating year.

The company expects to install rear-imaging red light cameras at five Davenport intersections for the city's initial program phase. Data and images recorded by the Iowa cameras will be processed through Transol's Data Center in Phoenix Arizona to generate fines on behalf of the City.

Transol is a specialist developer, integrator and operator of advanced traffic safety systems with operations in Australia and the USA.
