Invictus to commence field operations and completion of further placement to strategic investor

DATE: 12 OCTOBER 2020

HIGHLIGHTS

- **Invictus to commence field operations in the Cabora Bassa Basin**
- **Field reconnaissance program includes the traversing of proposed infill seismic lines**
- **COVID restrictions and travel eased in Zimbabwe and cultural ceremonies completed**
- **Tranche 2 placement with Mangwana Opportunities Fund executed at 6.6c for AUD\$222k at a 9% premium to last closing price.**

Invictus Energy Limited ("Invictus" or "the Company"), is pleased to announce that the Company is set to commence a field reconnaissance program in the next fortnight and has completed a further placement for the equivalent of AUD\$220k at a share price of \$0.066 with the Mangwana Opportunities Fund under a second tranche of the equity funding agreement as announced on 30 April 2020.

Commencement of field operations in the Cabora Bassa Project

Following the approval of the Environmental Management Plan, easing of COVID-19 related restrictions and the completion of the final cultural ceremonies in the Muzarabani and Mbire Districts, the Company will commence field operations in the Cabora Bassa Basin.

The reconnaissance program and baseline survey consist of the traversing of the proposed infill seismic lines for a planned acquisition campaign in the 2021 dry season. The program will capture details such as topography, existing access roads, drainage, vegetation cover, soil types, rock exposures, sampling of any natural oil and gas seeps, areas of development (constructions and cultivation), plus any sites of cultural, religious or historic importance. The duration of the program is expected to be approximately 30 days and is in the final stages of planning and will be completed before the wet season.

About Invictus Energy

Managing Director Scott Macmillan commented:

“We are extremely pleased to commence our activity on the ground in the Cabora Bassa Project having now received all of the necessary approvals and restrictions in the country being eased. The Company has a window of opportunity to carry out a reconnaissance program prior to the onset of the rainy season so that we can map out the routes for the planned seismic acquisition campaign next year. This exercise will enable us to map out the optimal route ahead of the survey which will reduce the acquisition time and maximise efficiency of the survey.

The Company is also pleased to have completed a second tranche of funding from the Mangwana Opportunities Fund at a premium of 10% to the previous closing share price. The funds will be used for the upcoming field program and general working capital.”

Completion of Placement with Mangwana Opportunities Fund

The Company has completed a further placement (Second Tranche) under the share subscription agreement announced on 30th April 2020. The placement raises the equivalent of \$AUD 222,148 through the placement of 3,404,186 shares at a share price of \$0.066; a 9% premium to the last closing price. The shares issued to Mangwana will be held in escrow for 6 months from the date of completion. The agreement makes provision for a further equity investment by Mangwana for the project over the next 12-24 months as well as assisting the Company in achieving its strategic goals in country.

Please refer to the Appendix 2A appended to this release.

About the Cabora Bassa Project

The Cabora Bassa Project encompasses the Mzarabani Prospect, a multi-TCF and liquids rich conventional gas-condensate target, which is potentially the largest, undrilled seismically defined structure onshore Africa. The prospect is defined by a robust dataset acquired by Mobil in the early 1990s that includes seismic, gravity, aeromagnetic and geochemical data.

#Cautionary Statement: *The estimated quantities of petroleum that may be potentially recovered by the application of a future development project relate to undiscovered accumulations. These estimates have both an associated risk of discovery and a risk of development. Further exploration, appraisal and evaluation are required to determine the existence of a significant quantity of potentially movable hydrocarbons. Prospective Resource assessments in this release were estimated using probabilistic methods in accordance with SPE-PRMS standards.*

The Company is not aware of any new information and that all material assumptions and technical parameters underpinning prospective resource estimate continue to apply and have not materially changed

***Giant fields** are conventional oil or gas fields with a recoverable reserve of 500 MMboe or more as defined by the American Association of Petroleum Geologists (AAPG)

***Elephant fields** are conventional oil or gas fields with a recoverable reserve of 1 Billion boe (1,000 MMboe) or more as defined by the American Association of Petroleum Geologists (AAPG)

SG 4571 - Special Grant Permit 4571 was granted in August 2017, the first exploration work programme has been completed. Invictus has an 80% equity stake in SG4571 via its subsidiary Geo Associates (Private) Limited

Application for quotation of +securities

Information or documents not available now must be given to ASX as soon as available. Information and documents given to ASX become ASX's property and may be made public.

If you are an entity incorporated outside Australia and you are seeking quotation of a new class of +securities other than CDIs, you will need to obtain and provide an International Securities Identification Number (ISIN) for that class. Further information on the requirement for the notification of an ISIN is available from the Create Online Forms page. ASX is unable to create the new ISIN for non-Australian issuers.

*Denotes minimum information required for first lodgement of this form, with exceptions provided in specific notes for certain questions. The balance of the information, where applicable, must be provided as soon as reasonably practicable by the entity.
