Disclaimer

This presentation is provided for information purposes only. The information in this presentation is in a summary form, does not propose to be complete and is not intended to be relied upon as advice to investors or other persons. The information contained in this presentation was prepared as of its date, and remains subject to change without notice.

This presentation has been prepared without taking into account the investment objectives, financial situation or particular need of any particular person.

To the extent permitted by law, no representation or warranty, express or implied, is made as to the accuracy, reliability, completeness or fairness of the information, opinions and conclusions contained in this presentation. To the extent permitted by law, none of Jupiter, its related bodies corporate, shareholders or affiliates, nor any of their respective directors, officers, employees, related bodies corporate, associates, affiliates, agents or advisers makes any representations or warranties that this presentation is complete or that it contains all material information about Jupiter or its projects. To the extent permitted by law, none of those persons accepts any liability for any loss, claim, damages, costs or expenses of whatever nature (whether or not foreseeable), including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of information contained in this presentation or in relation to the accuracy or completeness of the information, statements, opinions or matters, expressed or implied, contained in, arising out of or derived from, or for omissions from, this presentation.

No person is under any obligation to update this presentation.

This presentation may contain forward looking statements that are based on

management's current expectations and beliefs and are subject to a number of factors and uncertainties that could cause actual results to differ materially from those described in the forward looking statements. Forward looking statements can generally be identified by the use of forward looking words such as, "expect", "anticipate", "likely", "intend", "should", "could", "may", "predict", "plan", "propose", "will", "believe", "forecast", "estimate", "target" and other similar expressions within the meaning of securities laws of applicable jurisdictions. The forward looking statements contained in this presentation include statements about future financial and operating results, possible or assumed future growth opportunities and risks and uncertainties that could affect Jupiter's business. These statements are not guarantees of future performance, involve certain risks, uncertainties and assumptions that are difficult to predict, and are based upon assumptions as to future events that may not prove accurate. Actual outcomes and results may differ materially from what is expressed in this presentation. In any forward looking statement in which Jupiter expresses an expectation or belief as to future results, such expectation or belief is expressed in good faith and believed to have a reasonable basis, but there can be no assurances that the statement or expectation or belief will result or be achieved or accomplished. Jupiter is not under any duty to update forward looking statements unless required by law.

This presentation is not and does not constitute or form part of an offer, invitation or recommendation in respect of securities, or an invitation to buy or apply for securities, nor may it, or any part of it, form the basis of, or be relied on in connection with any contract or commitment whatsoever. In particular, this presentation does not constitute an offer to sell, or a solicitation of an offer to buy, any securities in the United States

Introduction and Chairman's Address

Consideration of Reports and Questions

Resolutions

Resolution 1: Remuneration Report (year ended 28 February 2023)

1	Remuneration Report for the financial year ended 28 February 2023	
That, for the purposes of section 250R(2) of the Corporations Act and for all other purposes, the Remuneration Report contained in the Directors' Report for the financial year ended 28 February 2023 be adopted.		
For	1,082,511,551	90.07%
Against	116,783,432	9.72%
Abstain	220,790	
Open	2,595,302	0.21%

Resolution 2: Remuneration Report (four-month period ended 30 June 2023)

2

Remuneration Report for the financial period ended 30 June 2023

That, for the purposes of section 250R(2) of the Corporations Act and for all other purposes, the Remuneration Report contained in the Directors' Report for the financial period ended 30 June 2023 be adopted.

CEO Presentation

CEO Presentation | A. Results Overview

Tshipi delivered a strong earnings performance in FY23, particularly given manganese prices and shipping rates.

1 Tshipi continued its outstanding ESG performance.

3 ...while shipping rates remained elevated.

2 Sold volumes and the manganese price increased from FY22.

FOB costs were stable....

4 A strong earnings performance was delivered.

Jupiter declared another solid dividend at the end of FY23, continuing its outstanding dividend payment track record.

Jupiter Dividends as a % of Market Capitalisation

1. Jupiter has a dividend yield of 13% since IPO, which is well above the ASX average (ASX average of 5.2% over the same period)¹
2. 108% of current market cap declared in dividends over past 5 years² (A\$371m dividends paid since 2019)

3. Jupiter's next dividend will be paid in March 2024 and will be based on a 10-month trading period at Tshipi
4. Jupiter's announced strategy reaffirms its **commitment to the existing policy of paying out at least 70% of all dividends** it receives from Tshipi and other investments

Jupiter (49.9%, A\$m) Year End 28 Feb	2019	2020	2021	2022	2023

Notes: 28 Feb '22, 28 Feb '23: 12 month periods, 30 June '23: 4 month interim financial year period, 30 June '23: 3 month period (first reported quarter of new 2024 financial year period)

CEO Presentation | B. Strategy Recap and Update

Jupiter's strategy is founded on an assessment of our strategic context.

A Tshipi Operations Tshipi is one of the world's best manganese operations. The mine has the opportunity to be even better through increased production, removal of rehandling and streamlining marketing processes. Tshipi is a proven, premier, manganese mine, with opportunities to be even better.	B Jupiter Mines Jupiter's dividend payment performance is valued by investors. Most investors would like to see the company pursue earnings growth. JMS' shareholders have enjoyed strong dividends, but most also want growth...	C Manganese Market More manganese ore will be needed over the coming decades, with the largest, longest life KMF mines, including Tshipi, best placed to respond. ...which is available from a combination of a constructive market outlook and the strong position of large KMF mines (including Tshipi).
D KMF Logistics Land logistics is the most significant cost component for KMF producers, including Tshipi. Rail is materially volume constrained with short term risks to the downside. While additional capacity may be available in the longer term, interim improvements must be pursued. The key area of valuable growth enablement for all KMF mines is South African logistics, which are volume constrained.	E ESG Tshipi has a successful record of outcomes in ESG. There are opportunities to continue to improve, while also improving financial returns and improving its B-BBEE scorecard. Jupiter doesn't currently publish a Sustainability Report. Tshipi has an outstanding track record of ESG outcomes, including in the area of Broad Based Black Economic Empowerment.	F EV Batteries Strong growth in demand for EV battery grade manganese will provide potentially valuable opportunities for new entrants. As the market is only just forming, careful planning work is required for any entry strategy. EV batteries provide a new and potentially value adding market for manganese miners who are able to find a sustainable point of entry.

Over the long term, the manganese market is constructive for growth, with demand growth and supply contraction expected.

1 More manganese ore supply will be needed...

Manganese Demand vs Supply

In the next 10 - 20 years, some long standing incumbent Mn mines will come to end of life.

Demand will outpace supply by 2030.

Growth in manganese production volumes will be necessary to keep pace with demand

2 ...due to continuing growth from steel and new demand from EV batteries.

Manganese Demand Forecast by Source

Steel will continue to be the dominant driver of manganese demand. It is forecast to see solid growth over the next 20 years.

New demand, growing at a much higher rate, will come from electric vehicle batteries.

Solid forecast growth from steel. High growth (off a low base) from lithium-ion batteries (see next page)

High growth in battery grade manganese demand will contribute to overall manganese demand, while presenting potential downstream opportunities.

1 Forecast high growth in demand for lithium-ion batteries...

Lithium-ion battery production is forecast to see very high growth over the next 20 years, driven by the automotive sector.

“The EV explosion is only just beginning, and demand set to take off” – Andrew Cole, Oz Minerals, 2022

2 ...combined with a predominance of manganese containing chemistries...

Manganese containing batteries (in some combination with nickel and cobalt) are set to play a predominant role – due to the cost, stability and sourcing benefits of manganese.

“It is relatively straightforward to do a cathode that’s two-third nickel and one-third manganese, which will allow us to make 50% more cell volume with the same amount of nickel” – Elon Musk, Tesla, 2020

3 ...will contribute to Mn demand growth and a late decade shortage of HPMSM.

The high growth in demand for battery grade manganese (HPMSM) is expected to outpace growth in supply in the second half of this decade, leading to a market deficit.

More HPMSM supply must come online, particularly in Europe and North America

Already the leading manganese supplier, South Africa has the clearest opportunity to increase export volumes...

Clear leaders in global production and endowment, South African producers are best place to capture demand growth

...due to the significant production and endowment enjoyed by the major KMF mines, including Tshipi.

Mine (order: South to North)	Production (Mt, 2022)	Mine Life (years to go)	Distance from Tshipi	Ownership
Tshipi	3.3	121	0 km	Jupiter Mines, NH, OMH
Mamatwan	2.8	26	1 km	South 32, Anglo, NH
UMK	3.4	147	4 km	Renova, Chancellor House
Kudumane	1.8	143	17 km	Asia Minerals, Nippon Steel
Kalagadi	1.3	77	23 km	Kgalagadi Alloys, Kalahari Resources, IDC
Mokala	1.1	44	27 km	NH, Glencore
Gloria	0.7	Unknown	29 km	Assmang
Nchwaning	3.1	80	29 km	Assmang
Wessels	0.8	42	31 km	South 32, Anglo, NH
Mn48	0.0	20	32 km	Traxys, NH, Others
Total / Ave	18.3	78		

- Significant production:** the nine mines shown produced 30% of global Mn ore in 2022. **Two of the nine are top 5 global producers** (and 5 are top 10 producers)
- Material endowment.** Most of the major mines in the KMF have very significant mine life remaining. **The top 5 global remaining Mn mine lives are in the KMF** (for mines with production >1mtpa)
- Unparalleled Proximity:** 73% of the world's manganese reserves, and 5 of the top 10 manganese mines, are located within 30 km from Tshipi
- Fragmented Ownership:** global manganese production and endowment is concentrated in the KMF, but ownership of KMF producers is relatively fragmented. The largest exposures (by total production exposure, not equity accounted) are:

Ntsimbintle Holdings: 5 mines (including Tshipi), 44% of KMF production

Assmang: 2 mines, 21%

South 32, Anglo: 2 mines, 20%

Tshipi mine location and neighbourhood.

We aim to be the largest manganese producing company in the world by 2028, while sustaining and improving our customer, ESG and shareholder return outcomes.

VISION

We will be the leading manganese producer in the world, with a reputation for reliability, responsibility and robust returns

OBJECTIVES

1

Manganese
Leader

Largest manganese ore
production of any company
in the world, by February
2028

2

Reliable

Production that is within
95% of volume targets,
every year

Zero shipments rejected for
quality

3

Responsible

More than 90% of
employees to be South
African. More than 70% of
mine employees to be local

Improved ESG and B-BBEE
scores each year

4

Robust Returns

Dividend payments every
year, with a minimum 70%
payout ratio

Earnings to grow in line with
production

We will achieve these objectives through strategies to improve operating efficiency, grow production volume and enter the EV battery market, while being accountable to a new ESG framework.

Five Year Strategy

To achieve our 5 year strategic objectives, we'll need to...

1 Increase our owned Mn production by 301%...

Jupiter is the 15th largest manganese producer now.

To be the largest, we'll need to increase Mn production by 3.33mtpa.

2 ..maintain our current quality and reliability performance..

Tshipi has had zero shipments rejected for quality in the last 5 years. Production has achieved targets.

3 ..balance employment and branding to South Africa...

Tshipi will need to maintain its current record of employing at least 70% of its staff from the surrounding communities. Jupiter needs to focus on South African employment as we grow and review our branding to ensure consistency with our strategy and values.

4 ..establish a Sustainability Reporting framework..

JMS needs a Sustainability Report. Tshipi needs to keep up the good work on ESG, with solar a near term focus.

5 ...as well as grow earnings in line with production (by circa 3x in the next 5 years) whilst maintaining our dividend payout policy.

Jupiter will adhere to its existing dividend distribution policy, to distribute at least 70% of all dividends received (to Jupiter shareholders). Jupiter has consistently exceeded this threshold in the past.

Additionally, our strategic objectives will require a focus on margins and careful growth execution to ensure that we grow our earnings in line with our objective of growing owned manganese production by circa 300% in the next 5 years.

Jupiter's dividend payments (as a % of Tshipi dividends received)

...by executing our 5 year plan strategies.

Strategy		Benefit from	Jupiter Business Benefit					Link to Strategy Objectives			
		Date (Est)	↑ Margin %	↑ Revenue	↓ Risk	↓ CO ₂ / Energy	Diversify	Mn Leader	Reliable	Responsible	Robust Returns
Fittest in the Field	Logistics	1 Mar 24 +	✓		✓	✓		✓	✓	✓	✓
	Marketing	1 Jan 24 +	✓		✓				✓		✓
	Tshipi Product Rehandle	1 Jul 25 +	✓		✓	✓		✓	✓	✓	✓
Industry Leader	M&A Growth	Ongoing		✓	✓			✓			✓
	Organic Growth	1 Mar 24 +		✓				✓			✓
Sustainably Empowered	Sustainability Report	1 Feb 24 +			✓	✓				✓	
	Tshipi Solar	TBD	✓		✓	✓				✓	✓
Upcycl ed	EV Battery Market Entry	TBD	✓	✓			✓			✓	✓

In executing the plan, we'll be focused on value accretive capital management objectives and strategies.

Capital Management Objectives	
1	Maintain strong dividends (>70% payout ratio)
2	Maintain low financial risk profile
3	Support JMS share price growth
4	Increase JMS free float/liquidity over time

Capital Management Strategies	
1	Acquire producing mines at accretive valuations
2	Only use debt for minor and short payback items
3	Accretive acquisitions. Focus on well communicated strategic execution including continuing dividends
4	Careful curation of the register through growth execution

Strategy Plan – Funding Requirements	
1	Working capital (eg for organic growth at Tshipi)
2	Minor capital expenditure (eg for solar power, debottlenecking spend)
3	Mine acquisitions
4	Investment in HPMSM production infrastructure

Funding Sources	
1	Consider revolving working capital facility
2	Consider short term debt facilities
3	Equity
4	Equity and other funding such as partner equity, non-recourse project finance and grant funding

Work on all elements of the strategy is underway, with recent important updates provided (and more to come).

1 Fittest in the Field

East London handles first shipment of export manganese

Vessel MV B88 LEADER

Image: a vessel carrying an inaugural shipment of Tshipi ore from East London Port

Work on all initiatives is progressing.

Logistics is a focus, with improvement being delivered through the Luderitz channel and pockets of additional rail such as East London (image opposite).

2 Industry Leader

Image: an aerial overview of the Kalahari Manganese Field

Planning work for optimising Tshipi's production volume is progressing.

Targeted M&A initiatives are also underway.

3 Sustainably Empowered

2024 ESG PRIORITIES

Image: Jupiter's 2024 ESG Priorities

Jupiter's inaugural Sustainability Report is on track for publishing in January 2024.

The planning work for solar at Tshipi is done.

2024 ESG priorities recently announced (image opposite).

See page 32 for more detail

4 Upcycled

Image: a photo of a >99.9% pure, battery grade Mn sample produced from Tshipi ore, using Jupiter's own production process

Battery Market entry business case is on track for completion by 31 December 2023.

Jupiter has successfully produced industry compliant battery grade manganese, using its own process and Tshipi low grade ore. Discussions with potential customers of battery grade manganese are underway.

See page 33 for more detail

Jupiter's inaugural Sustainability Report is on track to be completed in January 2024.

- Jupiter is on track to complete its inaugural Sustainability Report by the end of January 2024.**
Jupiter has recently released its 2024 ESG Priorities (see ASX release, dated 16 November).
- Tshipi already has an outstanding ESG track record.**
The focus of the Sustainability Report will be on continuing to support the outstanding work that Tshipi management already perform in the area of ESG, as well as supporting a focus that is appropriate for Tshipi's operating context.
- A scoping study to install solar at Tshipi is complete.**
Any capital projects included in the Sustainability Report will have a financial case, as well as an ESG case. Installing solar at Tshipi is the most immediate priority, and example of this principle. A scoping study has been completed and execution planning is now underway.

For more information, refer to Jupiter's ESG Strategy Update, released to the ASX on 16 November 2023

The potential for Jupiter to supply EV battery grade manganese appears promising and attractive.

Highlights

Jupiter has successfully produced a **>99.9% pure sample** of High Purity Manganese Sulphate Monohydrate - referred to as "HPMSM" or battery grade manganese - with Tshipi ore and utilising an internally developed hydrometallurgical production process (see photo at Fig. 1 to the right).

Figure 1 | Jupiter's >99.9% pure sample of High Purity Manganese Sulphate

This is the **first published record** of HPMSM being produced by a South African manganese miner using its own process.

Jupiter is in **preliminary, confidential discussions** with **counterparties** interested in the development of higher manganese content cathode chemistries, including vehicle manufacturers ("OEMs") and battery manufacturers.

The sample quality has targeted an **ex-China battery grade quality**, which conforms to specifications provided by the International Manganese Institute ("IMI").

Jupiter is well advanced in its development of a **market entry business case**. This includes consideration of facility location, waste and environmental factors, financial returns, and commercial model.

Jupiter is prioritising strategies that will **minimise energy use and carbon emissions** from the proposed new processing business.

Jupiter is on track to complete its scoping level market entry business case by **31 December 2023**.

- Jupiter has successfully produced a sample of EV battery industry compliant, battery grade, manganese.** The sample was produced using Tshipi "low grade" ore and Jupiter's own production process. This is the **first published record of this achievement by a South African miner, using its own ore and process.**
- Jupiter is in discussions with several potential offtake customers, interested in the future supply of battery grade manganese from Jupiter.** This list includes 5 – 10 vehicle manufacturers and battery (and component) manufacturers.
- Jupiter believes it has several competitive advantages in a potential entry to this market.** These advantages include commercial scale, access to a very large, proven and long life source of ore, existing strategic relationships and team capability in the production of pure manganese products.
- Based on our preliminary analysis to date, **Jupiter believes that the battery grade manganese market could provide very attractive financial returns**, with the potential to fund development capital on a standalone basis.
- Jupiter is on track to complete its EV Battery Market entry scoping study by the end of December 2023.**

For more information, refer to Jupiter's EV Battery Strategy Update, released to the ASX on 8 November 2023

Based on its dividend track record and policy, Jupiter's share price is undervalued...

1

Jupiter has paid an average of A\$44m p.a in dividends over the past 3 years.

From 2021 to 2023 inclusive Jupiter paid an average dividend of A\$44m to its shareholders.

Jupiter's dividends are correlated to the manganese price. The dividends over the last 3 years were paid against an average Mn price of \$3.53, 17% lower than the 5 year average of \$4.12

Jupiter has an established history of paying strong dividends throughout the manganese price cycle

2

Based on ASX valuation norms (and its dividend history) Jupiter's share price should be double its current level.

The ASX average dividend yield is 5.2%.

Based on its average dividend payment over the last 3 years, Jupiter's dividend yield at today's JMS share price (17.5 cps) is 12.8%.

Jupiter's share price should be much higher today, based on its outstanding dividend payment history alone - with the potential for further value upside (from the manganese price and strategy execution).

...underpinning a compelling investor value proposition.

1

Commitment to continuing to pay strong dividends...

Five Year Strategy | Executive Summary

8

5

...as well as grow earnings in line with production (by circa 3x in the next 5 years) whilst maintaining our dividend payout policy.

Jupiter will adhere to its existing dividend distribution policy, to distribute at least 70% of all dividends received (to Jupiter shareholders). Jupiter has consistently exceeded this threshold in the past.

Additionally, our strategic objectives will require a focus on margins and careful growth execution to ensure that we grow our earnings in line with our objective of growing owned manganese production by circa 300% in the next 5 years.

In the last 5 years (since IPO) Jupiter has paid 19 cents per share, equivalent to 108% of current share price.

JMS' dividend yield of 13.0% is materially above the ASX average of 5.2% over the same period.

Jupiter has an outstanding dividend payment track record and a commitment to maintain the same dividend policy going forward.

2

+ Growth Upside...

JMS Five Year Growth Target: Mn Ore Production (Equity Share)

Jupiter plans to grow its manganese ore production by 300% over the next 5 years, with a focus on consolidating large producing mines in the Kalahari manganese field.

Jupiter will grow its earnings and cashflow in line with production, by sensibly acquiring mines with the use of equity.

3

+ Manganese Price Upside.

Manganese Price Today vs 5 Year Comparatives (37% Mn FOB, \$US/dmtu)

The manganese price is 7% above 5 year lows and 32% below the 5 year average.

The five year average price is 147% above today's price.

The manganese price is around 5-year low levels currently. The manganese price is the main value driver for Jupiter.

FY24 Focus: Near Term Dividend and Strategy Deliverables

1

Dividends

Next dividend declaration due February 2024 (covering 10 months of Tshipi trading).
Continuing established policy of a minimum payout of 70% of Tshipi dividends received.

2

Sustainable Growth

FY24 will see substantive advancement of all elements of our growth strategy, to be executed in a way that balances financial sustainability (ie growth while maintaining our dividend policy).

3

Communications

We are increasing investor communications, to broaden the awareness of Jupiter's compelling value proposition, today and as we grow.
