

ASX Announcement  
22 February 2016

## **KNOSYS SIGNS PARTNER IN NEW ZEALAND**

**Knosys Ltd (ASX: KNO) ("Knosys")** is pleased to announce that it has signed an agreement with the New Zealand operations of a global ICT services and solutions provider, to resell the Knosys Platform and value-added associated consultancy, support and management services.

The partnership will provide the technology, consulting and experience required to deliver market-leading Knowledge Management and digital transformation strategies for key markets that include Financial Services, Utilities, Telecommunications, Retails and Government sectors.

The global ICT services and solutions provider, represented extensively throughout Asia Pacific and the other continents, offers clients solutions to enable technology, operate their IT infrastructures and transform technology solutions that deliver value. Combining expertise in networking, security, communications, data centre and end-user computing, with advanced skills in IT outsourcing, IT-as-a-Service, Systems integration services and training.

This relationship allows the partner to provide services to existing and new customers which includes:

- Resell Knosys Licences
- Professional Consultancy Services
- System Integration & Management
- Application & Module Development
- Infrastructure & Support Services
- Cloud Delivery and Management Services

### **Chief Executive Officer of Knosys, Ashley Gall, said:**

"Knosys is dedicated to driving disruptive and digital transformation journeys for our customers and we are thrilled to partner with a global ICT services and solutions provider to extend our suite of offerings and capabilities to the New Zealand markets."

### **In further commenting on the deal, Ashley Gall said:**

"This partnership expands the footprint of Knosys across the Asia Pacific region and greatly enhances our reach to attract and service new clients within New Zealand and also provide a strong presence to service our multinational/global clients."

#### ABOUT KNOSYS

The Knosys Platform is an enterprise-grade, knowledge management solution that enables organisations, large or small, to better capture, manage and access information across often disparate business units, divisions and information technology (IT) platforms.

Knosys augments an organisation's technology or IT platforms, without the need to disrupt existing processes. The Knosys Platform optimises the business outcomes by providing various integration and touchpoints into an organisation IT capabilities and knowledge repositories.

The Knosys Platform drives business outcomes and allows organisations to capture, manage and utilise information in various forms of decision making and issue resolution. Analytics allows companies to measure and tune the relevance of their knowledge management solution and optimise the information delivered to specific queries, business processes and ultimate outcomes.

The Knosys knowledge management platform provides an open and expandable framework, which can extend into a fully integrated digital work centre, becoming the window into an organisation's applications environment.
