KNOSYS ANNOUNCES CONTRACT WITH THE OFFICE OF PUBLIC PROSECUTIONS VICTORIA

Knosys Ltd (ASX: KNO) ("Knosys") is pleased to announce the **Victorian Office of Public Prosecutions (OPP)** has entered into an agreement with one of Knosys' resellers for a 250 user deployment of the **Knosys Knowledge Platform**.

The multi-year contract follows a highly successful Proof of Concept ("POC") implemented in June and evaluated by OPP during the following months. The license revenue from this opportunity is expected to exceed \$150,000 over a 3 year period.

The OPP is Victoria's largest criminal legal practice. The OPP prosecutes serious offences in Victoria's County and Supreme Courts and conducts criminal appeals in the County Court, the Court of Appeal and the High Court of Australia.

John Thompson, CEO of Knosys, said:

"The Knosys knowledge platform will help the OPP's solicitors to better prepare and undertake legal cases both in and out of court. This is being achieved via delivery of new and dynamic policy, procedure, research and training content to the legal practice. In concert with providing engaging content, Knosys tools are contextually presented in the form of decision trees, calculators, and process guidance.

"External content is contextually surfaced into the Knosys platform using Knosys' market leading information virtualisation capabilities. Over ten internal and external content sources will be integrated into the OPP's Knosys platform. This will create a superior user experience for the OPP's solicitors, with Knosys becoming the trusted one-stop-shop for knowledge, presented simply in a single web user interface."

The implementation of Knosys at the OPP required no coding, no desktop/device deployment, and allowed the OPP to retire a legacy system in the process.

Knosys will be used at the OPP on desktops and on iPads. The mobile optimised user interface means that OPP solicitors will be able to call up the Knosys platform while in court to either refer to their case work, or quickly find the answer to a question on-the-fly.

John Thompson, CEO of Knosys, continued:

"The OPP solution fits nicely with our updated strategy to focus on three verticals in the Australian and APAC markets, namely Government/Legal, Telco and Finance/Banking.

"By targeting key tactical opportunities, Knosys and our partners can demonstrate the effectiveness and value of the Knosys platform to our customers.

"Our intention is to work with partners to develop bundled knowledge based solutions which provide real productivity improvement and optimisation benefits. To support this strategy Knosys has recruited four additional sales and pre-sales resources to expand our push into the market."

ABOUT KNOSYS

The Knosys Platform is an enterprise-grade, knowledge management solution that enables companies to better capture, manage and access information across often disparate business units, divisions and information technology (IT) platforms. Knosys augments a company's IT platforms, by virtualizing both internal and external information repositories without the need to disrupt existing processes or force migration of data.

The Knosys knowledge management platform provides an open and expandable framework, which can extend into a fully integrated digital workcentre, becoming the window into a company's applications environment. It becomes the #1 used app a day in the life of an information worker and drives productivity and optimizes processes by incorporating process wizards, decision guidance, collaboration & feedback and UI veneers to integrated systems.
