

The Board of King River Copper Limited ("King River" or "the Company") (ASX: KRC) is pleased to advise that helicopter reconnaissance programs will commence Wednesday April 2.

Figure 1: Location of helicopter reconnaissance trip target sites.

New targets that have not been visited or previously sampled are shown by red shaded ovals in Figure 1 above, and will include:

- Extensions to faults identified over the Chapman outcrops
- Todhunter South and West
- Primary Todhunter and Pentecost fault intersections
- Eiffler Hills
- Eiffler North anomaly
- Several untested potential litho-structural targets within the Speewah Dome

King River is expecting to commence drilling in May 2014.

Competent Persons Statement

The information in this report that relates to Exploration Results is based on information compiled by Ken Rogers and Andrew Chapman and fairly represents this information. Mr. Rogers is the Chief Geologist and an employee of the Company and a member of the Australian Institute of Geoscientists. Mr. Chapman is a Consulting Geologist contracted with the Company. Mr. Rogers has sufficient experience of relevance to the styles of mineralisation and the types of deposits under consideration, and to the activities undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr. Rogers consents to the inclusion in this report of the matters based on information in the form and context in which it appears.
