Forward Looking Statements

Certain statements contained in this presentation, including information as to the future financial or operating performance of Kingston Resources Limited (“KSN”) and its projects, are forward looking statements. Such forward looking statements:

- include, among other things, statements regarding incomplete and uncertain proposals or targets, production and prices, operating costs and results, capital expenditures, and are or may be based on assumptions and estimates related to future technical, economic, market, political, social and other conditions;
- are necessarily based upon a number of estimates and assumptions that, while considered reasonable by KSN, are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies; and
- involve known and unknown risks and uncertainties that could cause actual events or results to differ materially from estimated or anticipated events or results reflected in such forward looking statements.

KSN disclaims any intent or obligation to update publicly any forward looking statements, whether as a result of new information, future events or results or otherwise. The words “believe”, “expect”, “anticipate”, “indicate”, “contemplate”, “target”, “scope”, “plan”, “intends”, “continue”, “budget”, “estimate”, “may”, “will”, “schedule” and similar expressions identify forward looking statements. All forward looking statements made in this presentation are qualified by the foregoing cautionary statements. Recipients are cautioned that forward looking statements are not guarantees of future performance and accordingly investors are cautioned not to put undue reliance on forward looking statements due to the inherent uncertainty therein.

Disclaimer

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of KSN, its directors, employees or agents, nor any other person accepts any liability, including, without limitation, any liability arising out of fault of negligence, for any loss arising from the use of the information contained in this presentation. In particular, no representation or warranty, express or implied is given as to the accuracy, completeness or correctness, likelihood of achievement or reasonableness or any forecasts, prospects or returns contained in this presentation nor is any obligation assumed to update such information. Such forecasts, prospects or returns are by their nature subject to significant uncertainties and contingencies.

The information contained in this presentation is for informational purposes only and does not constitute an offer to issue, or arrange to issue, securities or other financial products. The information contained in this presentation is not investment or financial product advice and is not intended to be used as the basis for making an investment decision. The presentation has been prepared without taking into account the investment objectives, financial situation or particular needs of any particular person. Before making an investment decision, you should consider, with or without the assistance of a financial adviser, whether an investment is appropriate in light of your particular investment needs, objectives and financial circumstances. Past performance is no guarantee of future performance.

Exploration by Other Explorers

This presentation contains information sourced from the reports of Other Explorers. References to the original reports are provided as footnotes where the information is cited in this presentation. KSN does not vouch for the accuracy of these reports. KSN has taken the decision to include this information as it is in the public domain and as we assess it to be of relevance to shareholders and investors.

Diamond Drilling at Pearse North

Investment Summary

Misima Gold-Silver Project (100%) in PNG

- DFS confirms potential for a large-scale, long-life, low-cost operation
- Forecast gold production of ~2.4Moz open pit gold mine over 20-year mine life
- Pre-tax Net Present Value (NPV) of A\$956 million
- LOM revenue of A\$6.1 billion, All in Sustaining Cost (AISC) of A\$1,217/oz
- 28% increase in the Ore Reserve to 1.73Moz¹
- Environmental and mining approval documentation underway
- Strategic review of Misima development options underway

Mineral Hill Gold-Copper Mine (100%) in NSW

- Current operation delivering cashflow from gold and silver production to early 2024
- Development plan targeting an initial +5-year mine life focusing on gold and copper production out to 2029+ from within approved MLs
- \$10M debt facility secured to accelerate development plan
- Extensive on-site infrastructure - processing plant and underground development
- Exceptional exploration upside within the current ML and wider ELs
- Strategically located in NSW's world-class Cobar Basin

1. See ASX Announcement 6 June 2022

Mineral Hill Overview

Mineral Hill – An Attractive and Strategic Asset

Established gold and copper mine in the Cobar Basin

Location	516km W of Sydney NSW in Cobar Basin
Ownership	100%: 20 ML's (4.85km ²) & 2 EL's (335km ²)
Reserves¹	71,163 Au oz
Resources¹	469,217 Au equiv oz (38% Cu, 35% Au)²
Orebody	Low-sulphidation epithermal & polymetallic vein
Mining Methods	Open pit and underground long-hole stoping
Processing Plant	400ktpa CIL, 350ktpa flotation
Water	Supplied from underground and site storage
Power	Mains and diesel generator
Historical Production	396koz Au, 33kt Cu (plus Pb, Zn concentrate)

1. See KSN ASX announcements on 18 November 2021 for additional Mineral Hill Resource and Reserve information
 2. See Appendix for equivalency calculations

Mineral Hill – Strategic Mine Plan

Multiple work programs underway to expedite mine production

A map of Australia with a green dot in the southeast corner indicating the location of Mineral Hill, NSW. A line connects this dot to the text 'Mineral Hill, NSW'. Another green dot is located further east on the coast, with a line connecting it to the text 'Sydney Head Office'.

- Strategy established to deliver **initial five-year mine plan**, underpinned by resource base growth, to deliver gold and copper production.
- **Resource updates** for Pearse North, Pearse South, and SOZ nearing completion
- **Plant refurbishment** studies underway
- **Mine planning** at Pearse open pits and SOZ underground underway
- **Approvals** in place for mining restart.
- **\$10m funding secured** to undertake work programs towards plant refurbishment and mining restart:
 - \$5m drawn in July and a further \$5m available upon reaching progress milestones

Production & Development Plan

Aiming for new mine production from late 2023

- **Focus on Pearse open pits and SOZ underground** for production following tailings processing
- **Targeting commencement of production from existing Reserves** at the Pearse pits followed by a restart at SOZ utilising the existing underground development.
- **Development of advanced open pit targets** at Jacks Hut, Missing Link and Parkers Hill **to secure longer term production growth** beyond initial five-year mine plan

Mineral Hill – Tailings Project

Significant progress since acquisition, delivering positive cash flow

- **Successful ramp up** of the tailings project since **acquisition by Kingston in January 2022**.
- Mineral Hill has produced **+10,000 ounces** of gold since the restart of operations
- Gold sales **increased 19%** in the September quarter
- Tailings processing delivering **positive operating cash flow**
- Mining and processing demonstrating capability for the CIL to deliver at or above **700,000 tonnes per annum** design rates

Figure: right – KSN Board visit to Mineral Hill operations including Stuart Rechner, Andrew Corbett, Tony Wehby, Geoff Merrell (GM – Mineral Hill), and Mick Wilkes.

Figure left – Mineral Hill Bar 121, reaching the 10,000oz milestone from the Tailings project

Outstanding Development Targets

Historic high-grade gold-copper results¹

- Included in Resource
- No Resource

1. See KSN ASX announcements on 18 Nov 2021 for further detail on Mineral Hill historic drilling

Diamond Drilling: Pearse South and Pearse North

High-grade gold hits from initial drilling at Pearse North

- Current drilling confirms the presence of mineralisation outside the **historic Ore Reserve pit shell, set at US\$1300/oz Au.**
- Significant high-grade gold results received for the maiden diamond drilling program at Pearse North¹
 - **39m @ 4.2g/t Au and 37g/t Ag from 37m, including**
 - **3m @ 26.7g/t Au, 27g/t Ag from 38m**
 - **10m @ 6.0g/t Au, 33g/t Ag from 72m**
 - **3m @ 5.5g/t Au, 6g/t Ag from 31m**
 - **11m @ 1.4g/t Au, 8g/t Ag from 136m including:**
 - **4.3m @ 2.4g/t Au, 16g/t Ag from 142m**
- Pearse North and Pearse South Resource and Reserve estimates to be updated in Q4 2022.

Figure: Recent and historical gold-silver intercepts at Pearse North relative to USD\$1300 Au Ore Reserve pit shell

1. See KSN ASX announcements on 8 April 2022, 14 June 2022 for further detail

Diamond Drilling: Southern Ore Zone (Cu-Au-Zn-Pb-Ag)

Outstanding Copper and Gold drilling results at the SOZ underground

- Targeting re-establishment of mining at the SOZ underground, **leveraging the existing decline development and infrastructure** for low-cost restart
- Extensive development in place at SOZ underground – **significantly reducing development costs**

- Current Mineral Resource base:

Tonnes (Mt)	Au g/t	Ag g/t	Cu %	Pb %	Zn %
1.78	1.79g/t	18 g/t	1.2%	1.2%	1.0%

- Recent drilling highlights¹:

- 39m @ 1.1% Cu, 0.7% Pb, 0.8% Zn, 0.93g/t Au, 12g/t Ag from 161m
- 9.8m @ 4.22g/t Au, 0.7% Cu, 3.2% Pb, 3.2% Zn, 30g/t Ag from 166m
- 8.5m @ 0.4% Cu, 4.2% Pb, 4.2% Zn, 1.23g/t Au, 28g/t Ag from 232m
- 7.0m @ 0.7% Cu, 2.9% Pb, 2.6% Zn, 1.31g/t Au, 26g/t Ag from 154m
- 8.1m @ 0.9% Cu, 8.3% Pb, 3.3% Zn, 0.97g/t Au, 60g/t Ag from 158m
- 19m @ 1.15% Cu, 5.5% Pb, 5.5% Zn, 0.4g/t Au, 44g/t Ag from 150m

Figure: SOZ- long section demonstrates the infrastructure advantage of the SOZ with existing decline and level development

1. See KSN ASX announcements on 18 May 2022, 16 August 2022 for further detail

Diamond Drilling: Jack's Hut Copper and Gold

Shallow Copper and Gold hits from initial drilling at Jack's Hut

Figure: Jack's Hut Copper and gold target Cross Section KSNDDH014 and KSNDDH015

1. See KSN ASX announcements on 23 August 2022, for further detail

- Jack's Hut represents a prospective **low cost, near-term copper production opportunity** with potential to be incorporated into or extend the 5yr mine plan that is being developed for Mineral Hill.
- Recent drilling intercepted high grade copper-gold mineralisation inside a broader lower grade mineralised zone, highlights include¹:
 - 77m @ 0.93% Cu, 0.16g/t Au from 7m, including:
 - 7.4m @ 5.7% Cu, 0.40g/t Au from 16.4m
 - 9.3m @ 1.3% Cu, 0.39g/t Au from 43.7m
 - 27m @ 1.02% Cu, 0.18g/t Au from 14m, including:
 - 4.2m @ 4.5% Cu, 0.41g/t Au from 21.8m
 - 54.5m @ 0.65% Cu, 0.06g/t Au from 45m, including:
 - 9.3m @ 2.2% Cu, 0.18g/t Au from 63m
 - 10.0m @ 1.56% Cu, 0.76g/t Au from 37m, including:
 - 6m @ 2.20% Cu, 1.22g/t Au from 37m

Regional Exploration Upside

Multiple new priority targets identified at Mineral Hill

Mineral Exploration Licenses **EL1999** and **EL8334** represent a first-class exploration footprint in the **Cobar Basin** which hosts a number of gold and copper-gold occurrences and operating mines

10 Exciting new walk-up drill targets have been identified from a review of existing geophysical data – none of which have been previously drill tested¹

Induced Polarisation (IP) targets **correlate closely to the geophysical signature of existing mineralisation and mined orebodies**, increasing confidence in the quality of these greenfield targets

1. See KSN ASX announcements on 13 April 2022 for further detail

Misima Definitive Feasibility Site and Plant Layout

Excellent infrastructure and proven accessibility

Misima Gold Project Site Layout

Access to existing Misima Island infrastructure including roads, airport and ports

Misima Gold Project Plant Layout

Simple layout, utilising previous plant location, while leveraging existing land topography and historical footprint

Summary: Focus on Executing our Clearly Defined Strategy

Leveraging existing gold-copper asset base while advancing future growth opportunities

01 Experienced management team focused on maximising shareholder returns

02 Mineral Hill delivers extensive Resource base, advanced development prospects, gold production, and cashflow

03 Focused gold-copper exploration and five-year development plan at Mineral Hill

04 Misima holds a large-scale, low-cost, long life, production opportunity

05 Strategic review underway to unlock value within Misima

Figure: KSNDH015 - 71.9m: Chalcopyrite vein. Sample interval 71.6m to 72.3m: 5.5% Cu, 0.5g/t Au, 13g/t Ag.

A photograph of an industrial facility, likely a refinery or chemical plant. In the background, several large, cylindrical storage tanks are visible. A complex network of yellow-painted pipes and metal walkways crisscrosses the scene. In the foreground, a grey metal structure with a platform and stairs is prominent. A yellow crane is partially visible on the far left. The sky is clear and blue.

Competent Person's Statement - Mineral Resource Reported In Accordance with 2012 JORC Code – Mineral Hill

The information in this report that relates to the reporting of the Mineral Hill Mine Mineral Resource Estimate is based on and fairly represents, information and supporting documentation compiled by Mr. Stuart Hayward (BAppSc (Geology)) MAIG, who is a Member of the Australian Institute of Geoscientists. Mr. Stuart Hayward is a full-time employee of Kingston Resources Limited. Mr. Hayward has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Hayward confirms that the information in the market announcement provided is an accurate representation of the available data and studies for the material mining project and consents to the inclusion in this report of the matters based upon the information in the form and context in which it appears. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original report.

Competent Person's Statement - Mineral Resource Reported In Accordance with 2004 JORC Code – Mineral Hill

The information in this release that relates to Mineral Resources is based on information reviewed by Mr. Stuart Hayward (BAppSc (Geology)) MAIG, who is a Member of The Australian Institute of Geoscientists and a full-time employee of Kingston Resources Limited. Mr Hayward has sufficient experience in the style of mineralisation and types of deposit under consideration and to the activity he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Hayward confirms that the information in the market announcement provided is an accurate representation of the available data and studies for the material mining project and consents to the inclusion in the report of the matters based on his information in the form and context in which it appears. All Mineral Resource estimates were prepared and first disclosed under the JORC Code 2004 and are an accurate representation of the available data and studies for the Mineral Hill Mine. This information has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported. Work will commence on close of acquisition by the Company to bring each of the Mineral Resources into line with the JORC Code 2012.

Resource and Reserve Cautionary Statement – Mineral Hill

The Ore Reserve and Mineral Resources estimates were prepared by a Competent person in accordance with the JORC Code 2012 with exception of the Parkers Hill and Pearse Mineral Resource Estimates that have been prepared by a Competent Person in accordance with the JORC Code 2004 and have not been updated to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported. Pearse, Parkers Hill and the Southern Ore Zone Mineral Resource estimates and Ore Reserves have been adjusted by mining depletion using the production wireframes created by the site survey department at the time of mining. These wireframes represent the mining activities at these deposits to the best of Kingston's knowledge although they are not to be viewed as complete or accurate in their entirety and therefore mining depletion may be revised when Kingston is able to produce revised determinations on more complete data and verification thereof. Information pertaining to Mineral Resource Estimates (MRE) and Ore Reserves (OR) in this presentation has been previously released to the public. The tables on this page indicate the authors of the historical Resources/Reserves and the dates they were initially published. Kingston is not reporting these estimates as its own with exception of the MRE and OR for the TSF which has not been reported previously by any other company. The other original reports are available through the ASX website.

The Competent Person (JORC 2012) for the TSF Ore Reserve is Mr Jeremy Peters (BSc, BEng) a Fellow of the Australasian Institute of Mining and Metallurgy and Chartered Professional Geologist and Mining Engineer of that organisation. Mr Peters is a full-time employee of Burnt Shirt Pty Ltd and has sufficient relevant experience to act as Competent Person.

Competent Person's Statement - Mineral Resource Reported In Accordance with 2012 JORC Code – Misima

The information in this report that relates to the reporting of the Misima Mineral Resource Estimate is based on and fairly represents, information and supporting documentation compiled by Mr. Stuart Hayward (BAppSc (Geology)) MAIG, who is a Member of the Australian Institute of Geoscientists. Mr. Stuart Hayward is a full-time employee of Kingston Resources Limited. Mr. Hayward has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Hayward confirms that the information in the market announcement provided is an accurate representation of the available data and studies for the material mining project and consents to the inclusion in this report of the matters based upon the information in the form and context in which it appears. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original report.

Resource and Reserve Cautionary Statement – Misima

The Competent Person signing off on the overall Misima Ore Reserves Estimate is Mr John Wyche BE (Min Hon), of Australian Mine Design and Development Pty Ltd, who is a Fellow of the Australasian Institute of Mining and Metallurgy and who has sufficient relevant experience in operations and consulting for open pit metalliferous mines. Mr Wyche consents to the inclusion in this report of the matters based upon the information in the form and context in which it appears.

Kingston confirms that it is not aware of any new information or data that materially affects the information included in all ASX announcements referenced in this release, and that all material assumptions and technical parameters underpinning the estimates in these announcements continue to apply and have not materially changed.

Mineral Hill Mine – Resources & Reserves

Au equivalent calculation metrics

- Au Eq conversion factors are calculated by dividing price/unit for each commodity (Ag/oz, Cu/t, Pb/t, Zn/t) by the price/oz of gold.
- Recoveries based on historical production (2010-2016) as well as metallurgical test work are applied to the Resource and Reserve calculated metal for each commodity.
- The calculated metal is multiplied by the conversion factor for that commodity in the conversion table to produce an Au equivalent contained metal in ounces.
- Total Au equivalent ounces are calculated per deposit by summation of the individual Au equivalents for each commodity.
- The total Au equivalents for each deposit are summed to represent the total Au equivalent contained metal at Mineral Hill.
- Total Resources Mineral Hill recovery adjusted grade is calculated by multiplying the calculated Au Eq Oz by 31.1 and then dividing by the total tonnes.

The Company is of the opinion that all the elements included in the gold equivalent calculation have a demonstrated potential to be recovered and sold. The Mineral Hill Mine has a CIL circuit, Cu flotation circuit, Pb flotation circuit and Zn flotation circuit to produce three different concentrates as well as gold ore.

Gold Equivalent Formula:

$$\text{Au Eq} = ((\text{Au Oz} * r) + (0.014 * \text{Ag Oz} * r) + (4.928 * \text{Cu t} * r) + (1.101 * \text{Pb t} * r) + (1.391 * \text{Zn t} * r))$$
 where r = the recovery % for each commodity per deposit

Price Assumptions

Prices for equivalency calculations		
Gold	US\$/oz	1725
Copper	US\$/t	8500
Lead	US\$/t	1900
Zinc	US\$/t	2400
Silver	US\$/oz	24

Conversion Factors

Au Oz equiv	AUD
1.000	0.75
4.928	
1.101

Mineral Hill Mine

Environmental and social licence to operate

- Stakeholder engagement – excellent relationship with land-holders, community and Condobolin Chamber of Commerce
- Mining Licences (ML) granted
- Environment protection, cyanide and water permits in place
- Environmental Bonds in place with staged payment schedule
- Development Applications (DA) approvals in place for tailings (TSF), Pearse pits, SOZ underground
- Mine Operation Plan (MOP) in place for the tailings retreatment, update required before re-commencing hard rock mining
- Biodiversity offset in place, review underway to increase offset by March 2023
- Dam Safety NSW site review complete
- Tailings Dam strategy
 - TSF1 currently being re-processed, approval will be sought for re-use as tailings storage on completion
 - TSF2 approved, lift 4 & 5 designed providing storage capacity for 2.5 years

Misima Gold Project – Resources & Reserves

Misima Resources & Reserves

Indicated Resource Inventory

Deposit	Mt	Au (g/t)	Ag (g/t)	C/O	Au (Moz)	Ag (Moz)
Umuna	93.5	0.78	4.3	0.3	2.4	13.1
Ewatinona	4.2	0.88	2.6	0.3	0.12	0.3
Cooktown Stockpile	-	-	-	-	-	-
TOTAL	97.7	0.79	4.3		2.5	13.4

Inferred Resource Inventory

Deposit	Mt	Au (g/t)	Ag (g/t)	C/O	Au (Moz)	Ag (Moz)
Umuna	64.1	0.58	3.8	0.3	1.2	7.5

Misima Total Reserve Inventory (100 % probable)

Deposit	Mt	Au (g/t)	Ag (g/t)	Au (koz)	Ag (koz)
Umuna	71.7	0.79	4.6	1,816	10,612
Ewatinona	3.9	0.81	2.4	101	303
TOTAL	75.6	0.79	4.5	1,917	10,915

- Mineral Resources are reported inclusive of Ore Reserves
- See Competent Person details and year of original release on slide 3
- For full information of Mineral Resource and Ore Reserves see KSN announcements released 18 November 2021 and 6 June 2022
- Rounding to significant figures may cause minor computational discrepancies
- Misima Resource is comprised of Indicated and Inferred material
- Reserves are shown on an unrecovered basis
