

CVCheck operating update – best November sales on record

Highlights

- **Best November sales on record**
- **New wins of recent months and strength from pre-existing customer base driving sales**
- **Resources sector wins, gold mining industry spotlight**

CV Check Limited ('CV1' or 'the Company') is pleased to provide the following update on business conditions experienced in November.

CV1 CEO, Rod Sherwood, said: "It's been a great couple of months to start this quarter due to new client wins and strengthening order flow as New Zealand and Victoria exited their recent lockdowns.

Extending on the experience of September and October, CV1 achieved its best sales for a November month in the company's history.

A seasonal slowdown usually affects our order flow from mid-December as the year-end holiday period commences. We continue to closely monitor the COVID situation given adverse developments offshore and to assess potential flow on impacts to our sector."

Resources sector wins

CV1 is pleased to announce the recent wins of Alchemy Resources Ltd (ASX: ALY), Magnetite Mines Ltd (ASX: MGT), Panoramic Resources Ltd (ASX: PAN), Resolute Mining Ltd (ASX: RSG) and Saracen Mineral Holdings Ltd (ASX: SAR). These miners join a growing list of satisfied CV1 customers in the resources sector, a sector that has remained strong throughout the past year.

These clients not only conduct their people screening activities with CV1, they also influence their wide ecosystems of support contractors and labour hire suppliers to maintain similarly high standards for compliance purposes.

Industry Spotlight - Gold

CV1 continues to serve clients and make market share gains in the gold mining sector.

Recently won major producers include Northern Star Resources Ltd (ASX: NST), Resolute Mining and Saracen. Northern Star and Saracen jointly operate the KCGM Super Pit in Kalgoorlie. Each also operate various gold mines separately and in October the two companies announced their intention to merge. The KCGM Super Pit only relinquished its long-held status as Australia's biggest gold producer to Newmont Corporation's Boddington Gold Mine in 2012; Newmont Corporation (NYSE: NEM) is a long standing CV1 client. Resolute owns three gold mines with its flagship asset being the Syama Gold Mine in Mali.

Mid-tier gold miners using CV1 include companies such as St Barbara Ltd (ASX: SBM) who operate the Gwalia and Marvel Loch gold mines in Leonora, the Simberi mine in Papua New Guinea and the Atlantic Gold operation in Nova Scotia, Canada. Exploration companies using CV1 include entities such as Alchemy Resources.

CV1 looks forward to continuing its key role which underpins best practice people risk management within this storied Australian industry.
