Important INFORMATION

Forward Looking Statements

Certain statements contained in this presentation, including information as to the future financial or operating performance of Lithium Plus Minerals Ltd ("Lithium Plus") and its projects, are forward looking statements. Such forward looking statements:

- include, among other things, statements regarding incomplete and uncertain proposals or targets, production and prices, operating costs and results, capital expenditures, and are or may be based on assumptions and estimates related to future technical, economic, market, political, social and other conditions;
- are necessarily based upon several estimates and assumptions that, while considered reasonable by Lithium Plus, are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies; and
- involve known and unknown risks and uncertainties that could cause actual events or results to differ materially from estimated or anticipated events or results reflected in such forward-looking statements.

Lithium Plus disclaims any intent or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise. The words "believe", "expect", "anticipate", "indicate", "contemplate", "target", "plan", "intends", "continue", "budget", "estimate", "may", "will", "schedule" and similar expressions identify forward looking statements. All forward looking statements made in this presentation are qualified by the foregoing cautionary statements. Recipients are cautioned that forward looking statements are not guarantees of future performance and accordingly investors are cautioned not to put undue reliance on forward looking statements due to the inherent uncertainty therein.

Disclaimer

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of Lithium Plus, its directors, employees or agents, nor any other person accepts any liability, including, without limitation, any liability arising out of fault of negligence, for any loss arising from the use of the information contained in this presentation. In particular, no representation or warranty, express or implied is given as to the accuracy, completeness or correctness, likelihood of achievement or reasonableness or any forecasts, prospects or returns contained in this presentation nor is any obligation assumed to update such information. Such forecasts, prospects or returns are by their nature subject to significant uncertainties and contingencies.

The information contained in this presentation is for informational purposes only and does not constitute an offer to issue, or arrange to issue, securities or other financial products. The information contained in this presentation is not investment or financial product advice and is not intended to be used as the basis for making an investment decision. The presentation has been prepared without considering the investment objectives, financial situation or needs of any particular person. Before making an investment decision, you should consider, with or without the assistance of a financial adviser, whether an investment is appropriate considering your particular investment needs, objectives and financial circumstances. Past performance is no guarantee of future performance.

Competent Persons Statement

The information in this report that relates to Exploration Results, Mineral Resources or Reserves is based on information compiled by Dr. Jason Berton, who is a member of the Australian Institute of Mining and Metallurgy. Dr. Berton has sufficient mineral exploration experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity he is undertaking to qualify as a competent person as defined in the 2012 Edition of the "Australasian Code for reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). Dr. Berton consents to the inclusion in this report of the matters and information discussed, based upon the form and context in which it appears. Lithium Plus confirms that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed.

Exploration by Other Explorers

This presentation contains information sourced from the reports of Other Explorers. References to the original reports are provided as footnotes where the information is cited in this presentation. Lithium Plus does not vouch for the accuracy of these reports. Lithium Plus has taken the decision to include this information as it is in the public domain and as we assess it to be of relevance to shareholders and investors.

Lithium PLUS

HIGH IMPACT LITHIUM EXPLORATION

Focused on five projects within two highly prospective areas

Bynoe PROJECT AREA

BYNOE | Flagship project, neighbouring Core Lithium's Finniss Project

WINGATE | Known pegmatite district, limited historic exploration

Arunta PROJECT AREA

BARROW CREEK | Historic tin and tantalum production

SPOTTED WONDER | Proven lithium mineralisation

MOONLIGHT | Within the Harts Range Pegmatite Field

1. Refer to Core Lithium ASX release dated 18 April 2023. LPM is not aware of any new information or data that materially affects the information included in these ASX releases, LPM confirms that, to the best of its knowledge, all material assumptions and technical parameters underpinning the estimates in this presentation continue to apply and have not materially changed.

1 Premier project LOCATION

NEXT TO CORE'S FINNISS MINE DEVELOPMENT

- **Australia is a prolific mining nation**, built on a history of safe, stable mineral extraction
- **Project area strategically positioned 45km from Darwin Port** which is Australia's nearest port to Asia and key gateway for Australasian trade
- Proximity to **Darwin town** provides significant **infrastructure availability**, with labour and supply route benefits
- Project is located in a **similar geological setting to Core Lithium's Finnis mine**, with a number of prospects directly along strike from the BP33 deposit
- Flagship BYNOE **PROJECT** **adjacent to Core's deposits** which benefited from a recent upgraded Mineral Resource Estimate
 - **30.6Mt @ 1.31% Li₂O¹**

1. Refer to Core Lithium ASX release dated 18 April 2023. LPM is not aware of any new information or data that materially affects the information included in these ASX releases, LPM confirms that, to the best of its knowledge, all material assumptions and technical parameters underpinning the estimates in this presentation continue to apply and have not materially changed.

1. Premier project LOCATION

PROVEN AREA WITH VERY HIGH FERTILE PEGMATITE HIT RATE

- Bynoe is a **proven area of lithium-rich pegmatites**
- Region contains **hundreds of historically known pegmatites**
- Core Lithium's **drilling hit rate** for fertile pegmatites **historically greater than 50%**²
- Total Mineral Resources at Core Lithium are a **combination of ten discrete mineralised areas**
- Highlights the importance of identifying and testing **multiple high-impact targets** for **cumulative resource growth**

LPM is not aware of any new information or data that materially affects the information included in these ASX releases, LPM confirms that, to the best of its knowledge, all material assumptions and technical parameters underpinning the estimates in this presentation continue to apply and have not materially changed.
2. Refer to Core Lithium ASX release dated 28 June 2023 "AusIMM Lithium Conference Presentation"

2. Outstanding GEOLOGICAL PROSPECTIVITY

INITIAL FOCUS ON FLAGSHIP BYNOE PROJECT

- Significant **lithium mineralisation identified at the Lei Prospect** in 2017
- Phase 1 drilling program **targeted Lei Prospect** with high grade spodumene mineralisation confirmed¹
- Phase 2 diamond drilling completed at Lei **continued the extensional success** at depth and included the discovery of **a second lithium mineralised pegmatite** occurrence²
- **Both Lei mineralised pegmatites remain open at depth** with infill and extensional drilling to be incorporated in Phase 3 activities

1. Refer 18 October 2022 ASX Announcement "High grade lithium intercepts returned at Lei Prospect"

2. Refer 1 February 2023 ASX Announcement "Second shallow pegmatite discovered at Lei major pegmatite continues at depth"

2. Outstanding GEOLOGICAL PROSPECTIVITY

BYNOE PROJECT | HIGH NUMBER OF SOIL ANOMALIES DETECTED

- **Large scale Bynoe Project soil geochemistry program completed** with analysis and results **announced April 2023**
- **Over 3,700 soil geochemistry samples** taken across EL 31091, EL 31092 and EL 31133 under a program of broad systematic soil geochemistry grids at Bynoe in 2022
- Calibration of the soil geochemical results with known high grade Li mineralized pegmatite occurrences within the survey area indicate **Li-enriched pegmatites**
- **Numerous new pegmatite drilling targets** generated through an integration of geochemistry dataset and geological mapping along with ongoing structural analysis

2. Outstanding GEOLOGICAL PROSPECTIVITY

BYNOE PROJECT | KINGS LANDING AREA DEFINED

- Surface mapping has identified **several large weathered pegmatites (exposed in historic costeaning)**:
 - 500m long at **Jewellers**
 - >100m long at **Perseverance**
 - 250m long at **Jennys**
- Four large, high-priority pegmatite systems to be targeted in next phase exploration; **Perseverance, Jewellers, Jewellers Extended and Jennys**
- Phase 2 drilling in Q4 2022 included **eight preliminary holes** at Perseverance
- Results confirmed **spodumene-bearing and lithium grades above 0.5% Li₂O in fresh pegmatite**

2. Outstanding GEOLOGICAL PROSPECTIVITY

BYNOE PROJECT | NUMEROUS NEW TARGETS TO BE RAB DRILLED 2023

3 Aggressive Exploration Program

SUCCESSFUL TWO PHASE 2022 DRILLING PROGRAM

- Results from **Phase 1 drilling**¹ returned significant extensional intersections of high-grade spodumene mineralisation including:
 - 28.7m @ 1.43% Li₂O** from 196m (two main intervals over 38.5m) (BYLDD001)
 - 24.0m @ 1.18% Li₂O** from 173m (two main intervals over 32.0m) (BYLDD023)
 - Results from **Phase 2 drilling**² confirmed mineralisation extension at depth:
 - 28.3m @ 1.60% Li₂O** from 264.7m (BYLDD003)
 - 21.2m @ 1.74% Li₂O** from 398.8m (BYLDD004)
 - Provides confirmation of **extension of the Lei spodumene-bearing pegmatite system**, with **grades continuing to improve at depth**
 - Both Lei mineralised pegmatites remain open at depth**
1. Refer 24 November 2022 ASX Announcement "Further High-grade Lithium Intercept Returned at Lei Prospect"
2. Refer 1 February 2023 ASX Announcement "Second shallow pegmatite discovered at Lei major pegmatite continues at depth"

3 Aggressive Exploration Program

SECOND PEGMATITE OCCURRENCE IDENTIFIED AT LEI

- Results from BYLDD004 indicated a **second pegmatite occurrence** located approximately 160m east of the major Lei pegmatite¹
- Hole BYLDD009 was positioned to target the mineralisation in the new target zone, **successfully intersecting 8.5m of fresh pegmatite from 82.1m returning 5m @ 0.51% Li_2O** ²

1. Refer 1 February 2023 ASX Announcement "Second shallow pegmatite discovered at Lei major pegmatite continues at depth"

2. Refer 28 March 2023 ASX Announcement "Assay results confirm further mineralisation at Lei"

3. Aggressive Exploration Program

ENLARGED 2023 PHASE 3 DRILLING PROGRAM

- **Phase 3 drilling program** scheduled to commence at Bynoe May 2023
- Upcoming drilling expected to consist of:
 - 10,000 metres of reverse circulation drilling;
 - 3,000 metres of diamond drilling; and
 - 5,000 metres rotary air blast (**RAB**) drilling
- Program scheduled to include:
 - A** Lei Prospect infill and extensional drilling
 - B** Perseverance Prospect high-priority drilling
 - C** Kings Landing new target exploratory drilling

4. Strategic CORNERSTONE INVESTMENT

FROM LEADING BATTERY DEVELOPER AND MANUFACTURER

- Suzhou CATH Energy Technologies (**CATH**) invested at IPO with a **9% equity interest**
- CATH is jointly owned by **Contemporary Amperex Technology Co. Ltd (CATL)** and **Mr Pei Zhenhua**
- CATL is the **world's largest electric vehicle (EV) battery manufacturer**
- Mr Pei is a significant investor in Yibin Tianyi Lithium Industry – **one of China's largest lithium converters**

CATL

A global leader of new energy innovative technologies, committed to providing premier solutions and services for new energy applications worldwide

TOP

5. Proven board and MANAGEMENT

WITH A STRONG FOCUS ON EXPLORATION AND RESOURCE DEFINITION

Dr Bin Guo

EXECUTIVE CHAIRMAN

- Founder and Executive Chairman of Lithium Plus
- PhD in Geophysics with more than 20 years experience in mining and finance
- Wide range of technical and commercial knowledge gained at SRK Consulting, CITIC Securities and Mining One Consultants
- Previously Non-Executive Director of North American Lithium and member of AusIMM, AIG and ASEG

Mr Simon Kidston

NON EXECUTIVE DIRECTOR

- Finance professional with more than 25 years' global experience with Macquarie Bank, HSBC and Helmsec Global Capital Limited
- Founding Director of renewable energy company Genex Power
- Previously involved in the establishment of ASX listed mining companies, Endocoal Ltd, Carabella Resources Ltd and Estrella Resources Ltd
- Current Non-Executive Director of Genex Power Ltd and QC Copper and Gold

Dr Jason Berton

NON EXECUTIVE DIRECTOR

- Structural geologist with over 20 years mining and exploration experience at Homestake, Barrick, BHP and SRK Consulting
- Current Managing Director of PolarX Limited, and former Managing Director of ASX-listed Estrella Resources
- PhD in Geology and member of AusIMM

Mr George Su

NON-EXECUTIVE DIRECTOR

- Over 35 years' business experience in the Asia-Pacific region
- Current CEO and Managing Director of Richlink Australia
- Former country head of Australian operations at CITIC Securities and independent director of Macquarie Bank's China property fund
- Current Independent Director of YPB Group Ltd, an ASX listed technology company

Dr Bryce Healy

EXPLORATION MANAGER

- Experienced Exploration Geologist with a PhD in Geology specialising in granite petrology
- A member of the AIG with over 20 years industry experience in Exploration Management and Technical Director roles, including 13 years of consulting experience with SRK Consulting.
- Currently a director of exploration consultancy Noventum Group and COO of Revolver Resources Ltd

6. Direct leverage to **BATTERY TRANSITION**

SET TO CAPITALISE ON A STRUCTURAL LITHIUM SUPPLY SHORTAGE

- Lithium is an **essential battery cathode material**
- **Lithium-rich spodumene concentrate** is a feedstock material used in the production of lithium chemicals that go into **batteries for Electric Vehicles (EVs)**
- **Supply** of spodumene concentrate remains **structurally constrained** – meaningful lithium supply response dependant on uptake of low grade, CO₂ intensive Chinese lepidolite production
- Lithium Plus is ideally placed to take advantage of **strong long term market fundamentals for spodumene concentrate**

Source: Benchmark Mineral Intelligence

Investment HIGHLIGHTS

1. **Premier** project location
2. **Outstanding** geological prospectivity
3. **Aggressive** drilling program
4. **Strategic** cornerstone investment
5. **Proven** board and management
6. **Direct leverage** to the battery transition
