ASX ANNOUNCEMENT

12 August 2014

Lark Distillery recognised in 2014 Telstra Business Awards.

The directors of Montec International Limited (MTI) are please to acknowledge the achievements of Lark Distillery Pty Ltd (Lark) in the recently announced 2014 Telstra Business Awards.

In early 2014, Montec acquired approximately a one-third ownership interest of Lark.

Lark followed up the award of Tasmania Business of the Year award with being awarded overall National winner in the Small Business Category.

Recognising Tasmania is blessed with an abundance of rich barley fields, highland peat bogs and the perfect climate to produce malt whisky, Bill and Lyn Lark launched a boutique distillery in 1992. Lark was the first licensed distillery to open in Tasmania since 1839 and recently acquired Overeem Whisky. Lark was one of the first companies to export Australian malt whisky into the US and its product has won a host of prestigious awards and in 2011 won the Gold Medal Whisky of the Year at the International Whisky Competition.

Judges in the Business Awards said Lark was a quintessential small family business success story that has become an international winner. Its focus on quality and authentic product has put Australia on the world whisky map and Lark has been instrumental to the founding of the Australian whisky distilling industry.

These awards highlighted a year of achievements for Lark, which contributed to overall sales growth of more than 30% year on year. Growth came from the combined efforts in improving distribution and brand image, enhanced production efficiencies and a broadening of the product range. The acquisition and successful

integration of the Old Hobart Distillery "Overeem" whisky business added impetus to this growth in the later months of the year. Additional production capacity planned for installation this year will provide the basis for continued growth.

By order of the Board
