

Preliminary Final Report for the year ended 31 July 2016

KEY POINTS

- Lion's portfolio has performed well during the financial year, with a mark to market gain of \$11.9 million.
- Key contributors to Lion's investment performance included Roxgold Inc, a TSX-listed company that successfully financed and constructed a high grade gold mine in Burkina Faso during the year and Doray Minerals, driven by higher gold prices. Lion realised its investment in Doray during the year for \$8.3 million.
- One Asia is one of Lion's largest investment, representing a material component of Lion's net tangible assets. Lion has maintained its valuation for One Asia at 18¢ps. One Asia has two gold exploration projects in Indonesia:
 - **Awak Mas Project:** 100% held under a 7th generation Contract of Work with a 2.83Moz gold Resource. One Asia is actively evaluating strategic options for Awak Mas, with gold equity markets relatively buoyant and the economics of Awak Mas improving due to lower costs and higher gold price illustrated in an updated PFS during the year. A variety of options exist for Awak Mas including vending the project in exchange for shares in a listed entity, taking Awak Mas to a separate IPO, outright sale or taking the project into a DFS within the existing One Asia umbrella.
 - **Pani Project:** One Asia's alliance with Provident established in May 2015 continues with the objective of resolving the current Pani IUP dispute, and ultimately working in co-operation with Provident, the KUD and the local community to develop the Pani Project.

Operating and Financial Review

This financial report is prepared in accordance with Australian Accounting Standards and therefore includes the result of the “mark-to-market” of the Company’s investment portfolio in both the Statement of Comprehensive Income and the Statement of Financial Position.

The Company’s profit before tax for the year was \$10.8 million (2015 loss: \$33.5 million). This includes a realised gain from the sale of investments and an unrealised gain from mark to market movements in its investment portfolio recognised in the Statement of Comprehensive Income as set out in the table below.

	2016 \$’000	2015 \$’000

The result for the year reflects a net mark to market gain of \$11.9 million with respect to investments (42% increase compared with value of assets held at 31 July 2015). This includes an unrealised gain of \$7.1 million. This improvement compares with the ASX Small Resources index increasing 43% during the year. The mark to market gain of \$11.9 million in the portfolio value to 31 July 2016 includes:

- An increase in Lion's investment in African Lion 3 of \$6.5 million, predominantly as a result of the underlying performance of Roxgold Inc, a TSX-listed company that successfully financed and constructed a high grade gold mine in Burkina Faso during the year.
- An increase in the value of Lion's direct investment in Doray Minerals of \$4.8 million driven by higher gold prices. Lion realised its investment in Doray during the year.
- An increase in the value of Lion's direct and indirect holdings in Erdene Resource Development Corporation of \$1.1 million reflecting exploration success discovering the Bayan Khundii project in Mongolia.

Lion's directors believe it is important for shareholders that its financial statements and this report explain both the effect of realisation of its investments and mark to market of its investments on its results for the financial year. During the year Lion had a profit measured at historic cost on investments realised of \$1.6 million largely with respect to the sale of its shares in Doray Minerals.

Profit after tax attributable to members was \$10.8 million and earnings per share were 10.2¢.

During the year the company made new or follow-on investments totaling \$2.9 million as follows:

Purchases:	million
➤ One Asia Resources	\$0.8
➤ African Lion 3	\$0.5
➤ Doray Minerals	\$0.4
➤ Erdene Development Corp	\$0.3
➤ Other Investments	\$0.3

Distributions:	
➤ African Lion 3	\$0.2
➤ African Lion 2 *	\$0.1
	\$0.3

*includes \$0.1 million *in specie* distribution from AFL2 closure

At 31 July 2016 the Company held investments valued at \$28.0 million (31 July 2015: \$22.3 million), and cash of \$13.2 million (31 July 2015: \$8.1 million). Roxgold represents Lion's single largest investment valued at \$10.3 million (including direct and indirect holdings).

3. Net tangible assets per ordinary security

Based on the attached Balance Sheet, the net tangible assets (NTA) per security based on the Net Assets of the Company at 31 July 2016 was \$0.39. This NTA is based on the valuation of investments at fair value, as disclosed in the attached accounts. The NTA per security for the comparative period was \$0.28.

4. Controlled Entities

The Company did not control any entities during the period.

5. Dividends

No dividend was declared or paid during the year (2015: Nil).

6. Dividend/distribution reinvestment plan

Lion does not currently operate a dividend/distribution reinvestment plan.

7. Associates

	Current Period % Held	Previous Corresponding Period % Held

At 31 July 2016 the Company held investments valued at \$28.0 million (31 July 2015: \$22.3 million), and cash of \$13.2 million (31 July 2015: \$8.1 million). Roxgold represents Lion's single largest investment valued at \$10.3 million (including direct and indirect holdings).

Dividends

No dividend was declared or paid during the year (2015: Nil).

Compliance with Environmental Regulations

Lion has a policy that environmental impacts of developments of investees are in line with country/international standards and do not adversely impact local communities.

Lion has not been notified by any investee of any environmental breach by any government or other agency, and is not aware of any such breach.

Significant Changes in the State of Affairs

There were no significant changes in the State of Affairs of the Company.

Significant Events after Balance Date

There has not arisen in the interval between the end of the year and the date of this report, any item, transaction or event of a material or unusual nature which has or may significantly affect the operations of the Company, the results of those operations, or the state of affairs of the Company in future periods

Proceedings on Behalf of the Company

No proceedings have been brought or intervened in on behalf of the Company with leave of the court under section 237 of the *Corporations Act 2001*.

Likely Developments and Future Results

The Company's future operating results will depend on the results of its investments, and in particular its largest investment, One Asia. The Company's ability to sustain profits is dependent on future sales of investments which in turn are dependent on market opportunities and the performance of the Company's various investments, which are difficult to predict.

There are a wide variety of risks associated with the mining and exploration industry including market conditions, exploration, operational and political risk, tenure of tenements, liquidity and native title issues. Because of the vagaries of the mining and exploration industry and the long term nature of most of Lion's investments, the directors are unable to predict future results.

Corporate Governance Statement

In recognising the need for the highest standards of corporate behaviour and accountability, the directors of Lion support the applicable principles of good corporate governance. The Company's corporate governance statement is contained in the annual report.

Employees

At 31 July 2016 there was 1 full time equivalent employee of the Company (2015: 1 FTE).

Remuneration Report

All disclosures in this remuneration report have been audited. This remuneration report outlines the director and executive remuneration arrangements of the Company as required by section 308 (3C) of the Corporations Act 2001. For the purposes of this report, key management personnel of the Company are defined as those persons having authority and responsibility for planning, directing and controlling the major activities of the Company, directly or indirectly, including any director, and includes the executive employed by the Company considered to meet the definition of key management personnel.

Key Management Personnel Remuneration Framework

Emoluments of individual Board members and other key management personnel are determined on the basis of market conditions and the level of responsibility associated with their position. The emoluments are not specifically related to company performance and there are no long-term or short-term performance-related incentives provided to key management personnel. Remuneration and other terms of employment for key management personnel are formalised in either service agreements or employment contracts.

The remuneration policy in relation to directors is determined by the full Board. Remuneration of other key management personnel is determined by the directors of the Company. Directors' fees are determined within an aggregate directors' fee pool limit, which is periodically recommended for approval by shareholders. As approved by shareholders at the Annual General Meeting held on 1 December 2011, the maximum aggregate amount, including superannuation contribution, that may be paid to directors of the Company as remuneration for their services is \$200,000 for any financial year.

Other key management personnel receive a base salary and superannuation contributions in accordance with Australian superannuation guarantee legislation.

Lion's only contracted executive, Ms Jane Rose, is employed under an employment contract with no fixed duration. The contractual notice period under this agreement is 3 months with no termination benefit specified in the agreement. The other Key Management Personnel are not subject to any notice period or termination benefit with respect to their positions with the Company.

The remuneration policy of the Company with respect to directors and other key management personnel provides for Director's & Officer's (D&O) Insurance cover, but does not provide options, shares, loans or any other non-monetary benefits.

Voting and Comments at the Company's 2015 Annual General Meeting

The Company received more than 98% of "yes" votes on its Remuneration Report for the previous financial year. The Company did not receive any specific feedback at the Company's 2015 Annual General Meeting on its remuneration practices.

Details of Remuneration

Details of remuneration paid/payable to directors and the other key management personnel of the Company are detailed in the table below. The benefits provided to Key Management Personnel are fixed with no at-risk components of remuneration.

(a) R A Widdup and C K Smyth are employed by Lion Manager Pty Ltd, and do not receive any remuneration from the Company

Both Mr R A Widdup and Mr C K Smyth are executive directors and beneficial owners of Lion Manager Pty Ltd and have the capacity to significantly influence decision making of that company. Lion Manager provides management and investment services to Lion. These arrangements were approved by shareholders at Lion's AGM on 5 December 2012, with ongoing management fees of 1.5% p.a. based on the direct investments under management, currently equating to \$645,000 per annum plus GST. There is an incentive applicable which would apply where Lion's performance outperforms a benchmark. In addition, up to a 12 month termination fee may be applicable should Lion seek to terminate the management agreement. Further details of the Management Agreement are set out in the Notice of Meeting for the 2012 AGM, available on Lion's website. As at the date of this report no incentive fee had accrued with respect to the Lion Manager contract.

In addition, from 1 August 2013 Lion has requested Lion Manager provide comprehensive Investor Relations services associated with Lion's ASX listing for \$12,500+ GST per month for twelve months. These arrangements are reviewed annually and may be terminated without fee.

Information on Directors

Barry Sullivan BSc (Min), ARSM, FAusIMM, MAICD (Chairman)

Barry Sullivan is an experienced and successful mining engineer with a career spanning 40 years in the mining industry. His initial mining experience was gained in the South African gold mining industry, followed by more than 20 years with Mount Isa Mines. In the final five years of his tenure with MIM, Barry was Executive General Manager responsible for the extensive Mount Isa and Hilton operations.

Barry was previously a non-executive Director and Chairman of Exco Resources and a non-executive Director of Catalpa Resources, Sedimentary Holdings, Bass Metals and Allegiance Mining. He was also a non-executive director of Lion's predecessor company, Lion Selection Limited.

Barry has been a non-executive director of Lion since December 2011, becoming Chairman from 25 February 2016.

Peter Maloney BComm, MBA (Roch) (Non-Executive Director)

Peter Maloney has broad commercial, financial and management expertise and experience. He has been Chief Financial Officer of Lion and an executive director of Lion Manager. Prior to that he held senior executive positions with WMC Resources and a number of other companies.

Peter holds a Bachelor of Commerce from the University of Melbourne and an MBA from University of Rochester. He has also completed the Advanced Management Program at Harvard Business School.

Peter has been a non-executive director of Lion since December 2010, including serving as Chairman between 1 January 2012 and 24 February 2016.

Chris Melloy BE (Mining) (Hons), MEngSc, MAusIMM, F Fin (Non-Executive Director)

Chris Melloy is a mining engineer with some 40 years' experience in the mining industry in operations, securities analysis and investment. He held senior positions in MIM and JB Were & Son prior to joining Lion.

Chris was an Executive Director of Lion Manager from its inception in 1997 through to 2011, becoming a non-executive director of Lion on 1 November 2012.

Robin Widdup BSc (Hons), MAusIMM (Director)

Robin has over 38 years of industry experience. He graduated from Leeds University in 1975 with an Honours Degree in Geology. From 1986 to 1997 Robin worked as an Analyst and Manager for J B Were & Sons – Resource Research team. Robin founded Lion Selection Group and Lion Manager in 1997.

Robin is Managing Director of Lion Manager Pty Ltd and a non-executive director of Lion investees One Asia and Asian Mineral Resources Ltd.

Other Key Management Personnel

Craig Smyth BCA (Acctg), M App Fin, CA (Chief Executive Officer)

Craig Smyth graduated from the Victoria University of Wellington with a Bachelor of Commerce and Administration, and has completed his Master of Applied Finance at the University of Melbourne. Craig's financial background includes Coopers & Lybrand, Credit Suisse First Boston (London) and ANZ Investment Bank. He is currently the CEO of Lion and Executive Director of Lion Manager Pty Limited. Craig is a member of the Institute of Chartered Accountants of Australia and New Zealand.

Jane Rose (Investor Relations Manager & Company Secretary)

Jane Rose commenced work in 1983 as a legal administrative assistant. During the following 12 years, Jane held senior administrative positions with Phillips Fox and Corrs Chambers Westgarth in Melbourne and Nabarro Nathanson in London.

On returning to Australia, Jane worked as Executive Assistant to the Managing Director of Acacia Resources Limited and AngloGold Ashanti Limited where she was also responsible for the management of various corporate initiatives, including marketing and co-ordination of investor relations activities. From 2002 to 2006, Jane worked for several Lion investees, including MPI Mines Ltd, Leviathan Resources and Indophil Resources. Jane worked with Lion in early 2007 to assist with the merger, and she subsequently joined the company in July 2007 as Corporate Relations Manager.

In November 2008 Jane was appointed Company Secretary.

Directors' Benefits

Since the end of the preceding financial year, no director has received or become entitled to receive a benefit, other than benefits disclosed in this report as emoluments or the fixed salary of a full time employee of the Company or a related body corporate, by reason of a contract made by the Company or related body corporate with the director or with a firm of which he is a member, or with an entity in which he has a substantial financial interest.

Indemnification of Directors and Officers

An indemnity agreement has been entered into between Lion and each of the Company's directors named earlier in this report and with the Company Secretary. Under the agreement, the Company has agreed to indemnify those officers against any claim or for any expenses or costs which may arise as a result of work performed in their respective capacities to the extent permitted by law. There is no monetary limit to the extent of this indemnity.

Lion has paid an insurance premium of \$48,327 in respect of a contract insuring each of the directors, previous directors of the Company, and other key management personnel, against all liabilities and expenses arising as a result of work performed in their respective capacities, to the extent permitted by law.

Auditor Independence

We have obtained an independence declaration from our auditors, PricewaterhouseCoopers, as required under section 307 of the Corporations Act 2001. A copy can be found on page 8 of this financial report.

Non-Audit Services

No fees for non-audit services were paid/payable to the external auditors during the year ended 31 July 2016. The directors are satisfied that the provision of non-audit services is compatible with the general standard of independence for auditors imposed by the Corporations Act. The nature and scope of each type of non-audit service provided means that auditor independence was not compromised.

Rounding of Amounts

The Company is of a kind referred to in ASIC Instrument 2016/191 relating to the 'rounding off' of amounts in the financial report and Directors' report. Amounts in the financial report and Directors' report have been rounded off in accordance with that Instrument to the nearest thousand dollars unless specifically stated to be otherwise.

This report has been made in accordance with a resolution of the directors.

Lion Selection Group Limited

Notes to the Financial Statements for the Year ended 31 July 2016

NOTE 1. CORPORATE INFORMATION

The financial report of Lion Selection Group Limited ("Lion" or "the Company") for the year ended 31 July 2016 was authorised for issue in accordance with a resolution of the directors on 22 September 2016. The directors have the power to amend and reissue the financial report.

Lion is a company limited by shares incorporated in Australia. The nature of the operations and principal activities of the Company are described in the Directors' Report. The registered address of Lion is Level 2, 175 Flinders Lane, Melbourne.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of the financial report are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated. Comparative information is reclassified where appropriate to enhance comparability.

(a) Basis of Preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board and the *Corporations Act 2001*. Lion is a for-profit entity for the purpose of preparing the financial statements.

The financial report complies with Australian Accounting Standards. The financial report also complies with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

The financial report has been prepared on a historical cost basis, except for financial assets that have been measured at fair value.

The financial report is presented in Australian dollars and all values are rounded to the nearest thousand dollars (\$'000) unless otherwise stated under the option available to Lion under ASIC Class Order 98/100. Lion is an entity to which the class order applies.

(b) New accounting standards and interpretations

The Company has not changed any of its accounting policies with respect to new and revised accounting standards which became effective for the annual reporting period commencing on 1 August 2015.

New Standards

AASB 9 Financial Instruments, AASB 2009-11 Amendments to Australian Accounting Standards arising from AASB 9 and AASB 2010-7 Amendments to Australian Accounting Standards arising from AASB 9 (December 2010) (effective from 1 January 2018).

AASB 9 Financial Instruments addresses the classification, measurement and derecognition of financial assets and financial liabilities. The standard is not applicable until 1 January 2018 but is available for early adoption. The Company is yet to assess its full impact. However, initial indications are that assets currently held as fair value through profit and loss will continue to be carried at fair value with all fair value gains/losses being recognised in profit and loss. The Company has not yet decided when to adopt AASB 9.

(c) Significant accounting estimates and assumptions

The carrying amounts of certain assets and liabilities are often determined based on estimates and assumptions of future events. The key estimates and assumptions that have an impact on the carrying amounts of certain assets and liabilities are:

(i) Income taxes

Lion is subject to income taxes in Australia. Judgment is required in determining the provision for income taxes and deferred taxes. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. Lion recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred tax provisions in the period in which such determination is made.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that sufficient future taxable amounts will be available to utilise those temporary differences and losses. This involves judgment regarding the future financial performance and is therefore inherently uncertain. To the extent assumptions regarding future profitability change, there can be an increase or decrease in the level of deferred tax assets recognised which can result in a charge or credit in the period in which the change occurs.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(ii) *Fair value of investments and other financial assets*

The Company carries its investments at fair value with changes in the fair values recognised in profit or loss. The fair value of investments and other financial assets that are not traded in an active market is determined based on either the last sale price, or where not available, the market value of underlying investments. Determination of market value involves the Company's judgment to select a variety of methods and in making assumptions that are mainly based on market conditions existing at each balance sheet date. The key assumptions used in this determination are set out in note 2(j).

The Company's investment in One Asia, an unlisted company, represents a material proportion of Lion's portfolio. Accordingly estimates and assumptions surrounding the valuation of One Asia are significant to the Company's financial statements. Further detail on the Company's valuation of One Asia is set out in note 3(d).

(d) **Revenue**

Revenue is recognised to the extent that it is probable that the economic benefits will flow to Lion and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised:

(i) *Interest*

Revenue is recognised as interest accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the fair value of the financial asset.

(ii) *Dividends*

Revenue is recognised when the shareholders' right to receive the payment is established.

(e) **Cash and cash equivalents**

For cash flow statement purposes, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less or that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities on the balance sheet.

(f) **Trade and other receivables**

Trade receivables, which generally have 30 day terms, are recognised and carried at original invoice amount less an allowance for any uncollectible amounts.

An allowance for doubtful debts is made when there is objective evidence that the Company will not be able to collect the debts. Bad debts are written off when identified.

(g) **Foreign currency translation**

Both the functional and presentation currency of Lion is Australian dollars (AUD).

Transactions and Balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss, except when they are deferred in equity as qualifying cash flow hedges and qualifying net investment hedges or are attributable to part of the net investment in a foreign operation.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets and liabilities such as equities held at fair value through profit or loss are recognised in profit or loss as part of the fair value gain or loss and translation differences on non-monetary assets such as equities classified as available-for-sale financial assets are included in the fair value reserve in equity.

(h) **Income tax**

Current tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the balance sheet date.

Deferred income tax is provided on all temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Deferred income tax liabilities are recognised for all taxable temporary differences except:

- when the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or
- when the taxable temporary difference is associated with investments in subsidiaries, associates or interests in joint ventures, and the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets are recognised for all deductible temporary differences, carry-forward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry-forward of unused tax credits and unused tax losses can be utilised, except:

- when the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; or
- when the deductible temporary difference is associated with investments in subsidiaries, associates or interests in joint ventures, in which case a deferred tax asset is only recognised to the extent that it is probable that the temporary difference will reverse in the foreseeable future and taxable profit will be available against which the temporary difference can be utilised.

The carrying amount of deferred income tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Unrecognised deferred income tax assets are reassessed at each balance sheet date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date.

Income taxes relating to items recognised directly in equity are recognised in equity as part of Other Comprehensive Income.

Deferred tax assets and deferred tax liabilities are offset only if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and liabilities relate to the same taxable entity and the same taxation authority.

(i) Other taxes

Revenues, expenses and assets are recognised net of the amount of GST except:

- when the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables, which are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

Cash flows are included in the Cash Flow Statement on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority, are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

(j) Investments, Other Financial Assets and Investments in Associates

Financial assets in the scope of *AASB 139 Financial Instruments: Recognition and Measurement* are classified as either financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, or available-for-sale investments, as appropriate. Lion is a venture capital organisation, and designates its investments as being fair value through profit or loss. The scope of *AASB 128 Investments in Associates* allows this treatment for venture capital organisations even though the Company may have significant influence in an investee. After initial recognition, investments are measured at fair value, with gains or losses on fair value of investments being recognised in the Statement of Comprehensive Income. The fair value of assets is re-measured at each reporting date. This recognition is more relevant to shareholders and consistent with internal investment evaluation.

The fair value of financial assets traded in active markets is based on their quoted market prices at the end of the reporting period without any deduction for estimated future selling costs. The quoted market price used for financial assets held by the Company is the current bid price.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

The fair value of financial assets that are not traded in an active market are determined using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Valuation techniques used include the use of comparable recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs.

All regular purchases and sales of financial assets are recognised on the trade date i.e. the date that the Company commits to purchase the asset. Regular purchases or sales are purchases or sales of financial assets under contracts that require delivery of the assets within the period established generally by regulation or convention in the marketplace.

(k) Derecognition of financial assets and financial liabilities

(i) Financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- the rights to receive cash flows from the asset have expired;
- the Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or the Company has transferred its rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

(ii) Financial liabilities

A financial liability is de-recognised when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in profit or loss.

(l) Impairment of assets

Assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying value exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash generating units).

(m) Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the Statement of Comprehensive Income over the period of the borrowings using the effective interest method. Borrowings are classified as current liabilities unless Lion has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

(n) Payables

Payables are carried at amortised cost and represent liabilities for goods and services provided to the Company prior to the end of the financial year that are unpaid and arise when the Company becomes obliged to make future payments in respect of the purchase of these goods and services. The amounts are unsecured and are usually paid within 30 days of recognition.

(o) Provisions

Provisions are recognised when Lion has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

When Lion expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the Statement of Comprehensive Income net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pretax rate that reflects the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a borrowing cost.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**(p) Employee leave benefits - Wages, salaries, annual leave and long service leave**

Liabilities for wages and salaries, including non-monetary benefits, annual leave and long service leave that are expected to be settled within 12 months of the reporting date are recognised in other payables in respect of employees' services up to the reporting date. They are measured at the amounts expected to be paid when the liabilities are settled. Liabilities for non-accumulating sick leave are recognised when the leave is taken and are measured at the rates paid or payable.

The liability for long service leave for which Lion has an unconditional right to defer settlement for at least 12 months after the balance sheet date is recognised in the provision for employee benefits and measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date using the projected unit credit method.

Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on corporate bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

(q) Contributed equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

If the entity reacquires its own equity instruments, for example, as a result of a share buy-back, those instruments are deducted from equity and the associated shares are cancelled. No gain or loss is recognised in the profit or loss and the consideration paid including any directly attributable incremental costs (net of income taxes) is recognised directly in equity.

(r) Earnings per share

Basic earnings per share is calculated as net profit, adjusted to exclude any costs of servicing equity (other than dividends) and preference share dividends, divided by the weighted average number of ordinary shares.

Diluted earnings per share is calculated as net profit, adjusted for:

- costs of servicing equity (other than dividends) and preference share dividends;
- the after tax effect of dividends and interest associated with dilutive potential ordinary shares that have been recognised as expenses; and
- other non-discretionary changes in revenues or expenses during the period that would result from the dilution of potential ordinary shares, divided by the weighted average number of ordinary shares and dilutive potential ordinary shares, adjusted for any bonus element.

(s) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the segments, has been identified as the Board.

Investments have similar characteristics and so segments are determined on a geographical basis. The company invests only in small and medium mining and exploration companies with gold and base metal activities in Australia, Africa, East Asia and the Americas.

NOTE 3 FINANCIAL RISK MANAGEMENT

Lion's activities expose it to a variety of financial risks: market risk (including foreign currency risk, interest rate risk and price risk), credit risk and liquidity risk. Lion's overall risk management program is carried out under policies approved by the Board of Directors, and focuses on the unpredictability of the financial markets and seeks to minimise potential adverse effects on the financial performance of the Company. The Board provides written principles for overall risk management, as well as policies covering specific areas. The Board reviews and agrees policies for managing each of these risks and they are summarised below. Lion also monitors the market price risk arising from all financial instruments.

Lion holds the following financial instruments:

	2016 \$'000	2015 \$'000
Financial assets		
Cash	13,221	987
Bank bills and deposits receivable	-	7,067
Investments in securities	28,030	22,299
Trade and other receivables	11	55
	41,262	30,408
Financial liabilities		
Trade and other creditors	81	47
	81	47

NOTE 3 FINANCIAL RISK MANAGEMENT (continued)**(a) Market risk****(i) Foreign Currency Risk**

Lion operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the United States dollar (USD), including with respect to commitments.

Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the entity's functional currency. To mitigate the Company's exposure to foreign exchange risk, non-AUD cash flows are closely monitored.

The Company's post-tax profit is not sensitive to movements in the AUD/USD exchange rate due to limited USD denominated asset holdings.

(ii) Price risk

Lion is exposed to equity securities price risk, with many of the Company's equity investments being publicly traded. This arises from investments held by Lion and classified on the balance sheet as fair value through profit or loss.

To manage its price risk arising from investments in equity securities, the Company diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Company, however from time to time the Company may seek to increase exposure to particular investments. Lion does not hedge its equities securities price risk.

Based on the financial instruments held at the end of the period, if the value of equity securities had increased by 10%/decreased by 10% with all other variables held constant, the Company's post-tax profit for the year would have been \$2,803,000 higher/lower (2015: \$2,229,900 higher/lower) as a result of gains/losses on equity securities classified as fair value through profit or loss.

(iii) Interest Rate Risk Exposures

Lion is exposed to interest rate risk through its primary financial assets. The interest rate risk exposures together with the effective interest rate for each class of financial assets and financial liabilities at balance date are summarised below. All assets and liabilities are current, maturing within one year, with the exception of investments in securities, the value of which will be realised at the discretion of the Company. No decision has been made regarding the timing of this realisation.

Investment in securities	-	-	22,299	22,299	-	-
Financial Liabilities:						
Trade and other creditors	-	-	47	47	-	-

NOTE 3 FINANCIAL RISK MANAGEMENT (continued)**(b) Credit risk**

Lion is exposed to credit risk. Credit risk arises from cash and cash equivalents and deposits with banks as well as credit exposures to counter parties, including outstanding receivables and committed transactions. Lion has a policy of maintaining its cash and cash equivalents with the "top 4" Australian Banks. For other counter parties, if there is no independent rating, management assesses the credit quality of the party, taking into account its financial position, past experience and other factors. The maximum exposure to credit risk approximates the carrying values as disclosed above.

(c) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the ability to close out market positions. Lion manages liquidity risk by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities. Surplus funds are generally only invested in instruments that are tradeable in highly liquid markets.

(d) Fair value measurements

The Company carries its investments at fair value with changes in value recognised in profit or loss.

AASB 13 *Fair Value Measurement* requires disclosure of fair value measurements by level of the following fair value measurement hierarchy:

- (a) quoted priced (unadjusted) in active markets for identical assets or liabilities (level 1);
- (b) inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (level 2); and
- (c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

The fair value of financial instruments traded in active markets (such as publicly traded securities) is based on quoted market prices at the reporting date.

Recognised fair value measurements

The following tables present the Company's assets and liabilities measured and recognised at fair value for the periods ended 31 July 2016 and 31 July 2015.

	LEVEL 1 \$'000	LEVEL 2 \$'000	LEVEL 3 \$'000	TOTAL \$'000

Valuation techniques used to derive level 2 and level 3 fair values

The fair value of financial instruments that are not traded in an active market (for example, unlisted investments) is determined using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on unobservable inputs. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

NOTE 3 FINANCIAL RISK MANAGEMENT (continued)

Specific valuation techniques used to value financial instruments are applied in accordance with the International Private Equity and Venture Capital Valuation Guidelines, including:

- Price of recent investment.
- Net assets, looking through to the underlying assets held through interposed investment vehicles.
- The fair value of unlisted option contracts is determined using a Black Scholes valuation at the reporting date.
- The use of quoted market prices or dealer quotes for similar instruments where available.
- Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

Valuation Processes

The Lion Manager includes a team that performs monthly valuations of the financial instruments required for financial reporting purposes, including level 3 fair values. This team reports directly to the Lion Board. Discussions of valuation processes and results are held between the Lion Manager and the Lion Board at least once every six months in line with Lion's half-yearly reporting dates, including changes in level 2 and 3 fair values.

The following table presents the changes in level 3 instruments for the years ended 31 July 2015 and 31 July 2016.

(Losses)/gains recognised in profit or loss	23	(24,186)
Closing balance	8,559	9,399

The Level 3 balance relates principally to Lion's investment in One Asia, an unlisted exploration company focused on the exploration for gold resources and development of gold mines in Sulawesi. Lion's investment in Egan Street Resources (previously named Auricup Resources) has been transferred from level 3 to level 2 in 2016 with that company being in the process of conducting an underwritten rights issue and IPO at the date of this report. The valuation of One Asia has been maintained at \$0.18/share consistent with One Asia's \$2.6m June 2015 rights issue at \$0.18/share. Lion's entire investment in Asian Lion is also classified to level 3 due to One Asia representing a significant component of Asian Lion's portfolio. The Lion Board has opted to maintain its investment in One Asia within the level 3 investment category due to the escalated uncertainty in the value of the investment as discussed further below.

One Asia Resources

Lion has maintained its One Asia valuation to \$0.18/share for the period ending 31 July 2016. Lion and Asian Lion own a combined equity interest of 36% of One Asia, an Australian unlisted public company. One Asia is focused on the development of two gold mines in Sulawesi, Indonesia.

Pani Project

One Asia's interest in the Pani project tenement is under an Izin Usaha Pertambangan licence (the Pani IUP) held by a regional co-operative, KUD Dharma Tani (KUD), formed under Indonesian law. One Asia holds its economic interest in Pani through contractual arrangements with the KUD as its local joint venture partner. In December 2013 One Asia Resources received reports that the KUD signed a co-operation agreement with a subsidiary of publicly listed Indonesian company J Resources over the Pani IUP which conflicts with the contractual obligations the KUD has with One Asia. One Asia advises that all legal agreements with the KUD remain in place under Indonesian law. One Asia continues to liaise with local authorities and its advisors to ensure that those contractual obligations are honoured, and continues to work on-site at the Pani project.

One Asia has agreed to a joint venture with Provident Capital Partners Pte Limited (Provident) on its interest in the Pani project. The purpose of the arrangement is to resolve the current Pani IUP dispute dating back to December 2013, working in co-operation with the KUD and the local community to develop the Pani Project. The ultimate ownership of the joint venture is intended to be 66.6% Provident and 33.3% One Asia, with One Asia and Provident each committing U\$4m cash.

NOTE 3 FINANCIAL RISK MANAGEMENT (continued)

One Asia's alliance with Provident established in May 2015 continues with the objective of resolving the current Pani IUP dispute, and ultimately working in co-operation with Provident, the KUD and the local community to develop the Pani Project. Progress has been slow but steady, with One Asia and Provident actively working with the KUD, the local community and regional authorities to resolve the current dispute. In January 2016 the District Court of Marisa ruled on the KUD Management case where the management team lead by Mr Idris Kadji remains supportive of and continues to honour the legal agreements with One Asia, while the opposing management team lead by Mr Uns Mbuinga does not. One Asia viewed the result of the decision through the Marisa District Court as a positive outcome over the opposing KUD management team lead by Mr Mbuinga. However, the decision also brings into question the validity of the appointment of the management team led by Mr Kadji. The Marisa Court decision was appealed by both parties. On 12 July 2016, the appeal decision was released upholding the original decision on all material issues. This decision has again been appealed by the Defendant, Mr. Mbuinga to the Supreme Court of Indonesia.

The Pani IUP was issued in November 2009 for a period of 13 years, and, subject to government approval, is extendable for two 10 year periods. The IUP is subject to the Mining Law 4 of 2009, including applicable royalty rates and levels of local ownership and input.

Awak Mas Project

One Asia's Awak Mas project is held under a 7th generation Contract of Work and is owned 100%. During the year One Asia provided an updated Prefeasibility Study (PFS) based on an expanded 2.83 Moz gold incorporating the Salu Bulu and Tarra Main satellite deposits proximal to the Awak Mas deposit. Using a gold price assumption of US\$1,250/oz the PFS demonstrates that a commercial scale gold project can be developed at Awak Mas and the results warrant the completion of a Definitive Feasibility Study (DFS).

The benefits of adding higher grade ore into the mine plan, and a reduction in the plant size and pit have led to significant improvements in NPV. In addition, the new work benefits from the flexibility of multiple pits and ore sources, lower fuel prices and generally declining industry costs.

One Asia is actively exploring and evaluating strategic options for Awak Mas. This includes assessing the most appropriate way to fund and manage a DFS and the best pathway to project funding if the DFS confirms the results of earlier work. With gold equity markets relatively buoyant and the economics of Awak Mas improving due to lower costs and higher gold price, One Asia believes it is an opportune time to provide value for One Asia shareholders. A variety of options exist for Awak Mas including vending the project in exchange for shares in a listed entity, taking Awak Mas to a separate IPO, outright sale or taking the project into a DFS within the existing One Asia umbrella. Key issues being considered include the ability to finance and develop the project, management capability, valuation and a timely path to liquidity.

The Awak Mas COW is situated in land classified as Area Penggunaan Lain (APL - land for other uses), a non-protected forest area that readily allows for activities beyond agriculture such as mining.

One Asia continues to have dialogue with the Government of the Republic of Indonesia (GOI) in relation to possible amendments to the Awak Mas COW, with the GOI seeking to align key terms with the provisions of the 2009 Mining Law. Key topics affecting the Awak Mas COW are royalty rates and levels of local ownership and input. The GOI is seeking to set royalty rates to that dictated by prevailing regulation, currently at 3.75% per ounce of gold produced versus the rate of US \$235/kg as written in the COW (and assumed in the above April 2016 PFS numbers). The Company has indicated a willingness to re-negotiate the royalty rate as well as to allow some level of local divestment at fair market value. However, the Company has not been able to agree to any terms with the GOI at this time.

One Asia Valuation

The ultimate realised value of an investment in One Asia could be in a very wide range, reflecting the Pani tenure risk, early stage of the Pani project, ability to recognise value for the improving Awak Mas economics, resource upside, development risk, gold price, and other factors. In the event that the current Pani project ownership dispute is not satisfactorily resolved or value cannot be recognised for Awak Mas, the ultimate realised value could be less than 18 cents per One Asia share. Conversely, the ultimate realised value could be far more than 18 cents per One Asia share as the projects are de-risked. In light of information available, and in particular the pricing of One Asia's June 2015 rights issue, the board considers that \$0.18/share is the valuation within this range that is most reasonably representative of the fair value under current market conditions.

One Asia remains one of Lion's largest investments, representing a material component of Lion's portfolio. Lion's investment model involves weighting investment towards the best opportunities in the portfolio, which from time to time results in concentration of Lion's portfolio towards specific investments. The Lion board is conscious of the issues of portfolio balance but is of the view that the potential reward from a concentration of the portfolio in One Asia outweighs the risks if the challenges of developing a mine in Indonesia can be overcome.

Lion's ownership and economic interest in Asian Lion Ltd ("Asian Lion") is 62.8%. The directors have determined that Lion does not control Asian Lion as the Asian Lion Subscription and Shareholders Agreement ("SSA") restricts the ability of Lion to influence and direct the financial and operating decisions of Asian Lion. The SSA restricts Lion's voting power such that it is not commensurate with its ownership interest and it is unable to control the appointment or removal of directors or of members of the investment committee to which investment decisions have been delegated. Lion continues to carry its investment in Asian Lion as a financial asset at fair value through profit and loss.

Capital Risk Management

Lion's objective when managing capital is to safeguard its ability to continue as a going concern, so that it can continue to provide returns for shareholders. In order to maintain or adjust the capital structure, Lion may adjust the amount of dividends paid to shareholders, return capital to shareholders or issue new shares.

Barry Sullivan (Non-Executive Chairman)
 Peter Maloney (Non-Executive Director)
 Chris Melloy (Non-Executive Director)
 Robin Widdup (Director)

(b) Lion Manager Pty Ltd Contract

Lion entered into a Management Agreement with Lion Manager Pty Ltd (Lion Manager), under which Lion Manager provides the company with management and investment services. The arrangements were approved by shareholders at Lion's AGM on 5 December 2012, with ongoing management fees of 1.5% p.a. based on the direct investments under management, currently equating to \$645,000 per annum plus GST. There is an incentive applicable which would apply where Lion's performance outperforms a benchmark. In addition, up to a 12 month termination fee may be applicable should Lion seek to terminate the management agreement. Further details of the Management Agreement are set out in the Notice of Meeting for the 2012 AGM, available on Lion's website. As at the date of this report no incentive fee had accrued with respect to the Lion Manager contract.

In addition, from 1 August 2013 Lion has requested Lion Manager provide comprehensive Investor Relations services associated with Lion's ASX listing for \$12,500 + GST per month for twelve months. These arrangements are reviewed annually and may be terminated without fee.

Each of the above companies is involved in the mining and exploration industry.

NOTE 18 SEGMENT INFORMATION

Management has determined the Company's segments based on the internal reporting reviewed by the Board to make strategic decisions. The Company provides patient equity capital to carefully selected small and medium mining enterprises. Investments have similar characteristics and so segments are determined on a geographical basis. Lion invests only in mining and exploration companies and projects with gold and base metal activities in Australia, Africa, South East Asia and the Americas. Information with respect to Geographical Segments is set out below.

Independent auditor's report to the members of Lion Selection Group Limited

Report on the financial report

We have audited the accompanying financial report of Lion Selection Group Limited (the company), which comprises the statement of financial position as at 31 July 2016, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year ended on that date, a summary of significant accounting policies, other explanatory notes and the directors' declaration.

Directors' responsibility for the financial report

The directors of the company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that is free from material misstatement, whether due to fraud or error. In Note 2, the directors also state, in accordance with Accounting Standard AASB 101 *Presentation of Financial Statements*, that the financial statements comply with International Financial Reporting Standards.

Auditor's responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. Those standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Independence

In conducting our audit, we have complied with the independence requirements of the *Corporations Act 2001*.

Auditor's opinion

In our opinion:

- (a) the financial report of Lion Selection Group Limited is in accordance with the *Corporations Act 2001*, including:
 - (i) giving a true and fair view of the company's financial position as at 31 July 2016 and of its performance for the year ended on that date; and
 - (ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Regulations 2001*.
- (b) the company's financial report also complies with International Financial Reporting Standards as disclosed in Note 2.

Emphasis of Matter

We draw attention to Note 3(d) to the financial statements which describes the uncertainty related to the outcome of the Pani Project ownership dispute and its impact on the company's valuation of One Asia Resources Limited. Our opinion is not modified in respect of this matter.

Report on the Remuneration Report

We have audited the remuneration report included in pages 3 to 5 of the directors' report for the year ended 31 July 2016. The directors of the company are responsible for the preparation and presentation of the remuneration report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the remuneration report, based on our audit conducted in accordance with Australian Auditing Standards.

Auditor's opinion

In our opinion, the remuneration report of Lion Selection Group Limited for the year ended 31 July 2016 complies with section 300A of the *Corporations Act 2001*.
