MAGMATIC RESOURCES APPOINTS DR CRAIG FEEBREY AS CHIEF TECHNICAL ADVISER

Magmatic Resources Ltd (ASX: MAG) (“**Magmatic**” or “**the Company**”) is pleased to announce the appointment of Dr Craig Feebrey as Chief Technical Adviser, effective immediately.

Craig is a highly experienced geologist and mining executive with over 30 years’ global exploration experience across Australia, Asia-Pacific and the Americas.

Most recently, Craig served as Executive Vice President and Chief Exploration Officer at OceanaGold Corporation, where he spent the past 10 years leading all aspects of global exploration.

Importantly, prior to this role, Craig was a member of Gold Fields’ Australasia Regional Leadership Team and Vice President Exploration, covering the copper-gold projects in New South Wales that now form part of Magmatic’s core asset base. This experience provides him with first-hand knowledge of the Company’s NSW portfolio and geological potential.

Craig also brings a wealth of Western Australian gold experience, having overseen Gold Fields’ exploration across the state’s Goldfields region. This experience is directly relevant to Magmatic’s Weebo Gold Project, which the Company is advancing within the same highly prospective geological setting.

As Chief Technical Adviser, Craig will provide strategic and technical guidance across Magmatic’s exploration portfolio, including its NSW copper-gold projects and the Weebo Gold Project in WA, with a focus on exploration strategy, target generation, program evaluation and project prioritisation.

Craig holds a PhD in Geology, is a Chartered Professional Geologist, and is a member of the Australasian Institute of Mining and Metallurgy (AusIMM) and the Australian Institute of Company Directors (AICD).

Magmatic Resources’ Managing Director, Mr David Richardson commented: “*Craig’s deep technical and first-hand knowledge of Magmatic’s NSW copper-gold projects and the Western Australian Goldfields region will enhance our technical team’s ability to unlock value across our project portfolio. Combined with his global experience leading exploration programs for major, mid-tier and junior companies, this makes him uniquely qualified for this role. The Company welcomes Craig and looks forward to his contribution as Magmatic continues to advance its portfolio.*”

Authorised for release by the Board of Directors of Magmatic Resources Limited.
