

ASX RELEASE

20 May 2026

MyEco Group awarded a 3-to-5-year FOGO supply agreement by Penrith City Council (NSW) with expected annual revenue of \$1.36m

- MyEco Group was successfully awarded a contract to supply and distribute compostable caddy liners to support Penrith City Council's Food Organic and Garden Organic (FOGO) program in a competitive public tender process.
- This extends the 8-year trusted supply relationship between MyEco Group and the Penrith City Council for the supply and distribution of compostable bags.
- The expected total contract value is \$6.8m over five-year extended term (initial three-year term, with options to extend for a further two terms of one year each by mutual agreement and satisfactory performance).
- The contract is expected to provide meaningful revenue for MyEco Group over the medium to long term and reflects the Company's leadership position as a trusted partner of choice for councils planning to roll out FOGO programs, which are expected to accelerate due to the NSW 2030 FOGO legislative mandate.

MyEco Group Ltd (ASX: MCO) ("the Company" or "MyEco Group") is pleased to announce that it has been successful in its submission to Penrith City Council's tender process for the supply and distribution of compostable caddy bin liners. This extends the successful partnership over the last eight years between Penrith City Council and MyEco Group.

MyEco Group's comprehensive submission reflected its high standards of excellence in compliance, safety, quality and service, along with a well-controlled integrated supply chain from resin manufacturing to bag making.

The submission also demonstrated the robustness of MyEco Group's distribution model, supported by its long-term relationships with strategic distribution partners.

Penrith City Council highlighted at their Ordinary Meeting that "*The recommended tenderer [MyEco Group] has demonstrated quality assurance, safety and environmental systems and has experience in the manufacture of compostable bags that meet the necessary requirements for composting, as well as experience in distribution of bags to households.*"

The key terms of the contract are detailed in the appendix.

Penrith City Council provides a kerbside FOGO service to 69,013 households as well as a shared FOGO service to 14,977 households in multi-unit development properties with a collect-and-return service.

Penrith has been a leading city council in NSW in rolling out a FOGO program to its residents, ahead of the NSW 2025 legislative changes. The *Protection of the Environment Legislation Amendment (FOGO Recycling) Act 2025 (NSW)* mandates that all households and designated businesses in New South Wales separate food and garden organics (FOGO) from general waste. By 1 July 2030, all households with a red-lid bin must have access to a FOGO service, with weekly collection required. Mandatory FOGO separation for supermarkets, cafes, restaurants, hotels, universities and hospitals begins in stages from 1 July 2026.

Independent studies have shown that FOGO recycling programs where compostable bin and caddy liners are used, deliver higher environmental and financial benefits to councils including:

- FOGO programs supported by compostable liners are proven to increase household participation by around 10% and improve organics capture by 30%^{1,2}.
- A 30% increase in diversion would prevent nearly 3 million tonnes of CO2 emission annually³ - equivalent to planting 4.3 million trees or taking 664,000 cars off the road⁴.
- A 30% reduction in organic waste going to landfill can deliver \$600k average annual savings for councils².

MyEco Group's strategy is designed to capture market opportunities created by changes in state legislation mandating FOGO recycling program rollouts, in NSW from 2026, and other Australian States and Territories in the future. MyEco Group has been deploying a new council-focused value proposition and introducing new services which support new-to-FOGO councils, such as MyEco Group's council-residents online ordering portal, a differentiating factor in the successful tender with the Penrith City Council.

MyEco Group CEO, Marie de Perthuis, said: "*We are delighted to continue to partner with Penrith City Council, one of the councils leading the way in driving FOGO roll-out in NSW. The new arrangements, such as MyEco Group's online ordering portal, enhance services provided to households, and reflects Penrith City Council's commitment to drive meaningful change by making the composting experience more seamless for Penrith residents.*"

Penrith City Council said: *“Based on detailed evaluation and best overall value, the Tender was awarded to [MyEco Group]. [MyEco Group] is the incumbent and has performed well in the current contract with consistently high-quality product and service levels.”*

This announcement was authorised for release by the Board of MyEco Group Ltd and Penrith City Council.
