Research Report

Integrated Resources Group Limited (ASX: **IRG**, “**IRG**”, “**the Company**”) is pleased to announce that Beer & Co. has prepared a commissioned research report on the Company.

A copy of the research report can be found on the Company’s website at www.integratedresources.com.au under the ‘Investor/Reports & Presentations’ section.

Kind regards

On behalf of Integrated Resources Group Limited

Tim Moore
Chairman

Kalengwa Projects

The 'Kalengwa South' Project has been determined as the flagship project in the portfolio, located on Prospecting Licence 17212, with an area totalling 557km². The other three permits are contiguous and together comprise the 'Kalengwa East' project totalling 2,632km² (Prospecting Licences 18211, 17211 & 18162).

Historical drilling has been conducted on the Kalengwa South project and a significant database has been developed including over 300 shallow holes, 120 percussion holes, and 16 diamond holes which have identified four highly prospective targets. Refer to ASX announcement on 7 May 2014 for details of the project and JORC reporting. The Kalengwa East project is located in an area that is prospective for IOCG style mineralisation, similar to that of First Quantum's Kansanshi mine to the north. Several exploration targets have been identified from the regional magnetics.
