

ASX/MEDIA RELEASE

10th September 2014

Kalengwa Project Update - Permit Transfers Lodged

Integrated Resources Group Limited (ASX:IRG) ("Integrated" or "the Company") wishes to announce that applications for the transfer of title of the Kalengwa permits (17211, 17212, 18162 & 18211) have been lodged with the Zambian Ministry of Mines in accordance with the Kalengwa farm-in agreement.

The Company expects to receive notification of the title processing at the end of the month following the meeting of the Mining Advisory Committee of the Zambian Ministry of Mines.

Following the completion of desktop studies, including detailed review of historical exploration which has furthered management's understanding of the geology and targets of the Kalengwa projects, an exploration program is now being finalised with details to be announced shortly.

Further, the Company is waiting on formal confirmation of environmental approvals from the Zambian Environmental Management Agency and hopes to update shareholders in the coming days.
