

FOR IMMEDIATE RELEASE

NuSep Raises \$200,000 by Placing Shares at 7 cents per share

Sydney, Australia 18th May 2012 - NuSep (ASX: NSP) wishes to advise that it has placed 2,857,142 shares at 7¢ per share to raise \$200,000. These shares have been transferred from the 4,869,826 shares held in the Company's share suspense account.

The placement of these shares will not increase the issued capital of the Company as these shares were previously issued and held in a suspense account by the Company as advised to the market on 12 December 2011.

Since the release of the company's half year results and following the above placement the balance of the suspense account has now been reduced to 2,012,684 shares. The Company will advise the market once it has placed these remaining shares.

About NuSep

NuSep (ASX: NSP) is a publicly listed life sciences company that sells products into the global BioSeparations market. NuSep recently acquired BioInquire which developed the ProteoIQ software enabling NuSep to offer a total Proteomics solution from **Fraction to Function**. The company has offices in both Sydney Australia and Atlanta, USA.

With a 30 year heritage in biological separations, NuSep has forged a world class reputation for its innovative yet simple biological separation techniques including the world's first IVF sperm separation device. In short NuSep has redefined the BioSeparations market through innovation and simplification.

NuSep's world renowned research team has developed an extensive portfolio of patented products. In all, NuSep currently manufactures, distributes and sells 55 products to customers in the USA, Europe, Asia and Australia.

About PrIME Biologics Pte Ltd

PrIME Biologics is a Singapore based biotech company that has developed a disposable procedure for the processing of plasma proteins. PrIME Biologics is currently a wholly owned subsidiary of NuSep Holdings Limited (ASX: NSP). PrIME Biologics process is based on the **P**reparative **I**solation by **M**embrane **E**lectrophoresis (PrIME) technology developed by NuSep. PrIME provides disposable modular processing that is 'electronically' driven membrane fractionation.

The PrIME process increases product yields to over 90% relative to the existing process 50% while increasing product safety. The PrIME has been shown to remove virus, bacteria, endotoxins and prions which cause 'Mad Cow Disease'. Further, PrIME Biologics process can produce multiple plasma products in hours compared to days, which is required by the current manufacturers.

The initial application for the PrIME process will be the *Currently Unprocessable Plasma* which represents approximately 50% of all the plasma collected in many countries.
