

FOR IMMEDIATE RELEASE

PrIME Update

Sydney, Australia 29th January 2014 – NuSep Holdings Ltd (ASX:NSP) wishes to advise the market that Mr. Andrew Goodall has been appointed a non-executive director of PrIME Biologics which is currently the subject of a de-merger from its parent company namely NuSep Holdings Ltd. Mr. Goodall is also a non-executive director of NuSep Holdings Ltd.

The market has previously been advised of the progress towards the de-merger of PrIME Biologics from NuSep Holdings Ltd and the anticipated investment of Xeraya to enable the future development of the PrIME Biologics business. Mr. Andrew Goodall will join Dr. Hari Nair and Mr. John Manus on the PrIME Biologics board. In addition two representatives from the investment group will be joining the PrIME Biologics board at a later date and the market will be advised of these appointments at the appropriate time.

- END-

About NuSep

NuSep (ASX: NSP) is a publicly listed life sciences company that sells products into the global BioSeparations market. The company has offices in both Sydney Australia and Atlanta, USA.

With a 30 year heritage in biological separations, NuSep has forged a world class reputation for its innovative yet simple biological separation techniques based on its PrIME¹ technology. The PrIME technology has produced a number of world firsts including the world's first IVF sperm separation device. In short NuSep has redefined the BioSeparations market through innovation and simplification.

NuSep's world renowned research team has developed an extensive portfolio of patented products. In all, NuSep currently manufactures, distributes and sells 55 products to customers in the USA, Europe, Asia and Australia.

NuSep Products:

Gels – NuSep manufactures and sells precast gels including the innovative nUView Gels, which can be visualised 2 minutes after use.

¹ PrIME stands for **P**reparative **I**solation by **M**embrane **E**lectrophoresis

Separation Instruments – NuSep has developed two unique biological separation instruments. The ProteomeSep can separate biological samples into 8 fractions for use in the proteomic market. The SpermSep separates sperm for fertility treatments such as IVF.

Biological Products – NuSep supplies research grade biological products manufactured using its unique separation technologies. These products include human IgG and Albumin.

About PRIME Biologics Pte Ltd

PRIME Biologics is a Singapore based biotech company that has developed a disposable therapeutic plasma manufacturing process based on NuSep's PRIME Technology. PRIME Biologics process is based on the **P**reparative **I**solation by **M**embrane **E**lectrophoresis (PRIME) technology developed by NuSep. PRIME provides disposable modular processing that is 'electronically' driven membrane fractionation.

The PRIME process increases product yields to over 90% relative to the existing process 50% while increasing product safety. The PRIME has been shown to remove virus, bacteria, endotoxins and prions which cause 'Mad Cow Disease'. Further, PRIME Biologics process can produce multiple plasma products in hours compared to days, which is required by the current manufacturers.

The initial application for the PRIME process will be the *Currently Unprocessable Plasma* which represents approximately 50% of all the plasma collected in many Asian countries.
