Allocation of the Shortfall Shares will be at the discretion of the Underwriter, in consultation with the Company and otherwise subject to the terms of the Underwriting Agreement and the Lead Manager Mandate.

The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three (3) months following the Closing Date. The issue price for each Share to be issued under the Shortfall Offer shall be \$0.16, being the price at which Shares have been offered under the Offer.

All Shares issued under the Shortfall Offer shall be issued on the same terms as Shares being offered under the Offer (including the issue price).

Eligible Shareholders may apply for additional Shares in excess of their Entitlement under the Shortfall Offer in accordance with the Entitlement and Acceptance Form and by paying the appropriate Application Monies in accordance with the instructions set out in the Entitlement and Acceptance Form.

The Underwriter, in conjunction with the Company, reserves the right to issue an Eligible Shareholder a lesser number of Shortfall Shares than applied for or no Shortfall Shares at all. As such, there is no guarantee that any Shortfall Shares applied for will be issued to Eligible Shareholders.

The Company and the Underwriter will have no liability to any Applicant who receives less than the number of additional Shares they applied for under the Shortfall Offer. If the Company scales back any applications for Shares under the Shortfall Offer any application monies will be returned (without interest) in accordance with the provisions of the Corporations Act.

The Board and the Underwriter will ensure that the allocation of Shortfall Securities will be undertaken in a manner so as to not exacerbate a potential unacceptable control event.

Any application monies received for more than your final allocation of Shares (only where the amount is \$1.00 or greater) will be refunded. No interest will be paid on any application monies received or refunded.

3.11 Effect of Offer on Control of the Company

General

As set out in Section 3.4 of this Prospectus:

- (a) the Offer is fully underwritten by Canaccord Genuity (Australia) Limited (**the Underwriter**) upon and subject to the terms and conditions of the Underwriting Agreement; and
- (b) an unrelated party, Pipo Investment Pty Ltd ATF Pipo Investment Unit Trust (**Sub-Underwriter**) has entered into the Sub-Underwriting Agreement under which it has agreed to sub-underwrite the shortfall to the Offer to an amount of up to \$340,000 on a priority basis ahead of the Underwriter's other sub-underwriters.

As set out in Section 4.3 of this Prospectus Bolong (Australia) Investment Management Pty Ltd, holds approximately 23.05% of Shares on issue as at the date of this Prospectus.

Please see below for disclosures regarding the impacts on control of the Company as a result of the Offers in the context of the above parties.

Underwriter

As at the date of this Prospectus, the Underwriter does not hold any Securities in the Company and accordingly, the Underwriter has no present voting power in the Company.

Shareholders should be aware that the extent to which Shares are issued pursuant to the Underwriting Agreement could result in the Underwriter increasing its voting power in the Company. The Underwriter is not a related party of the Company for the purpose of the Corporations Act.

The Underwriting Agreement allows the Underwriter to enter into sub-underwriting agreements to pass on some or all of its obligations to subscribe for the Shortfall under the Underwriting Agreement. The Underwriter has confirmed to the Company that it has entered into a number of sub-underwriting agreements and firm commitments up to the full Underwritten Amount. The Underwriter has confirmed that as at the date of this Prospectus, no individual sub-underwriter:

- (a) is a substantial Shareholder of the Company; or
- (b) is a related party of the Company.

In the event that there is a Shortfall, these sub-underwriting and firm commitment arrangements will have the effect of decreasing the number of Shares to be subscribed for by the Underwriter to nil, given these sub-underwriting and firm commitment arrangements in aggregate cover the full Underwritten Amount.

For illustrative purposes, the Underwriter's present relevant interest and changes under several scenarios are set out in the table below:

Event	Shares held by the Underwriter	Voting Power of the Underwriter (%)
Date of Prospectus	Nil	0.00%
Completion of Offers		
Fully subscribed by Eligible Shareholders	Nil	0.00%
75% subscribed by Eligible Shareholders	8,153,338	3.57%
50% subscribed by Eligible Shareholders	16,306,676	7.14%
25% subscribed by Eligible Shareholders	24,460,014	10.71%
0% subscribed by Eligible Shareholders	32,613,353	14.29%

The above example scenarios show the potential effect of the underwriting of the Offer by the Underwriter. However, it is unlikely that no Eligible Shareholders will subscribe for their Entitlement under the Offer and as set out above, as the Underwriter has confirmed it has entered into sub-underwriting agreements and firm commitments to cover the full Underwritten Amount, so the Underwriter's Voting Power is unlikely to change. In addition, the above example scenarios do not take into account any Shortfall that may be subsequently placed to Eligible Shareholders or third parties which would reduce the control impact.

The underwriting obligation and therefore potential voting power of the Underwriter will reduce by a corresponding amount to the extent of the Entitlements under the Offer taken up by Eligible Shareholders and Shortfall taken up by sub-underwriters or placed to Eligible Shareholders and third parties.

To the best of the Underwriters knowledge, no sub-underwriter (together with their associates) can acquire a relevant interest in more than 19.99% of the issued share capital of the Company.

Pipo Investment Pty Ltd ATF Pipo Investment Unit Trust (Sub-Underwriter)

The Sub-Underwriter currently holds no Shares in the Company. Upon Completion of the Offers, the Sub-Underwriter will have a voting power of 0.09% in the Company (assuming all Shortfall is placed).

Such sub-underwriting is not a matter that the Company believes will have a material impact on control in the circumstances given the underwriting of the Offer by the Underwriter.

Bolong

The Company's largest Shareholder, Bolong (Australia) Investment Management Pty Ltd (**Bolong**), currently Voting Power of 23.05% in the Company's Shares based on its latest substantial shareholder notice lodged with the ASX. Please note that as per Section 4.3, Bolong's current intention is to subscribe for its Entitlements to the value

of \$800,000 out of Entitlements valuing \$1,200,000 and not to subscribe for Shortfall Shares. Accordingly, Bolong's Voting Power is expected to decrease and is not expected to increase.

3.12 Potential dilution of Shareholders

Shareholders should note that if they do not participate in the Offer, their holdings are likely to be diluted by approximately 16.7% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus). Examples of how the dilution may impact Shareholders are set out in the table below:

Holder	Holding at Record Date	% at Record Date	Entitlements under the Offer	Holdings if Offer not taken up	% post Offer
Shareholder 1	20,000,000	10.22%	3,333,333	20,000,000	8.76%
Shareholder 2	10,000,000	5.11%	1,666,667	10,000,000	4.38%
Shareholder 3	3,000,000	1.53%	500,000	3,000,000	1.31%
Shareholder 4	800,000	0.41%	133,333	800,000	0.35%
Shareholder 5	100,000	0.05%	16,667	100,000	0.04%
Total	33,900,000	17.32%	5,650,000	33,900,000	14.85%

Note:

1. The dilutionary effect shown in the table is the maximum percentage on the assumption that those Entitlements not accepted by Eligible Shareholders are placed under the Shortfall Offer.

3.13 ASX listing

Application for Official Quotation of the Shares offered pursuant to this Prospectus on the ASX will be made in accordance with the timetable set out at the commencement of this Prospectus. If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the expiration of three (3) months after the date of this Prospectus, (or such period as varied by the ASIC), the Company will not issue any Shares and will repay all Application Monies for the Securities within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the Shares is not to be taken in any way as an indication of the merits of the Company or the Shares now offered for subscription.

3.14 Issue

Shares issued pursuant to the Offer will be issued in accordance with the ASX Listing Rules and timetable set out in Section 2 of this Prospectus.

Shares issued pursuant to the Shortfall Offer will be issued on a progressive basis.

Where the number of Shares issued is less than the number applied for, or where no issue is made, surplus Application Monies will be refunded without any interest to the Applicant as soon as practicable after the Closing Date.

Pending the issue of the Shares or payment of refunds pursuant to this Prospectus, all Application Monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

Holding statements for Shares issued under the Offer will be mailed in accordance with the ASX Listing Rules and timetable set out at the commencement of this Prospectus. Holding Statements for any Shortfall Shares issued under the Shortfall Offer will be mailed as soon as practicable after their issue.

3.15 Overseas shareholders

This Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

Other Places

In relation to Shareholders with registered addresses on the Record Date in places other than Australia, Hong Kong or New Zealand, the Company has decided that it would be unreasonable to make the Offer to those Shareholders having regard to:

- (a) the number of Shareholders in each such place;
- (b) the number and value of securities the holders would be offered; and
- (c) the costs of complying with legal requirements, and requirements of regulatory authorities, each such place.

Custodians and nominees

The Company is not required to determine whether or not any registered holder is acting as a nominee or the identity or residence of any beneficial owners of Shares. If any nominee or custodian is acting on behalf of a foreign person, that holder, in dealing with its beneficiary, will need to assess whether indirect participation by the beneficiary in the Offer is compatible with applicable foreign laws.

Ineligible Shareholders

Shareholders with registered addresses on the Record Date in places other than Australia, Hong Kong or New Zealand are not eligible to participate in or accept the Offer (**Ineligible Shareholders**).

Nominee

No nominee has been appointed for Ineligible Shareholders under section 615 of the Corporations Act and, as such, Eligible Shareholders will not be able to rely on the exception for rights issues in item 10 of section 611 of the Corporations Act. Accordingly, when an Eligible Shareholder applies for some or all of its Entitlement, it must have regard to the takeovers prohibition in section 606 of the Corporations Act (that is, the 20% Voting Power threshold). Eligible Shareholders who may be at risk of exceeding the 20% Voting Power threshold in section 606 of the Corporations Act as a result of acceptance of the Entitlement Offer should seek professional advice before applying for Shares under this Prospectus.

3.16 CHESS and Issuer Sponsorship

The Company will not be issuing share certificates for the Shares offered under this Prospectus. The Company is a participant in CHESS, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHESS will be issuer sponsored by the Company. Because the sub-registers are electronic, ownership of securities can be transferred without having to rely upon paper documentation.

Investors who are issued Shares under this Prospectus will be provided with a holding statement (similar to a bank account statement) that sets out the number of Shares issued to them under this Prospectus. The notice will also advise holders of their

Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHESS and issuer sponsorship.

Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

3.17 Rounding

Fractional entitlements will be rounded up to the nearest whole number. All references to numbers of Shares to be issued pursuant to this Prospectus are expressed subject to rounding.

3.18 Privacy Act

If you complete an Application for Shares, you will be providing personal information to the Company (directly or by the Share Registry). The Company collects, holds and will use that information to assess your Application, service your needs as a holder of equity securities in the Company, facilitate distribution of payments and corporate communications to you as a Shareholder and carry out administration.

The information may also be used from time to time and disclosed to persons inspecting the Company's register of members, bidders for your securities in the context of takeovers, regulatory bodies, including the Australian Taxation Office, authorised securities brokers, print service providers, mail houses and the Share Registry.

You can access, correct and update the personal information that we hold about you. Please contact the Company or the Share Registry if you wish to do so at the relevant contact numbers set out in this Prospectus.

Collection, maintenance and disclosure of certain personal information is governed by legislation including the *Privacy Act 1988* (Cth) (as amended), the Corporations Act and certain rules such as the ASX Settlement Operating Rules. The Projects consists of 44 mining tenements being 2 Prospecting Licences, 26 Exploration Licences and 1 Exploration Licence Applications, 11 Mining Leases and 4 Miscellaneous Licences, which are 100% owned by the Company other than 3 Exploration Licences to which the Company has 100% rights to all minerals other than lithium and tantalum, 3 Exploration Licences and 1 Mining Lease to which the Company has 100% rights to all minerals other than nickel, copper and platinum group elements and 1 Exploration Licence held as to 80%.

5.2 Company Update

Medallion has completed 46,211m of combined Reverse Circulation (**RC**) and Diamond (**DDH**) drilling at **RGP** since listing on the ASX in March 2021. Of the drilling that has been undertaken, 40,696m was carried out at Kundip Mining Centre (**KMC**), with the remainder completed at Medallion's regional targets.

In June 2022, Medallion completed an interim Mineral Resource Estimate (**MRE**) update at KMC based on 26,308m of the new drilling. The expanded MRE at KMC now totals 16.5Mt @ 2.1 g/t gold and 0.3% copper for 1.1 million ounces of gold and 50,000 tonnes of copper metal contained, with 67% of the gold estimated is in the Indicated category, the remainder in Inferred¹. The revised gold content represents a 64% increase from the previous MRE of 674,000 ounces @ 2.4 g/t as set out in the Company's prospectus dated 16 February 2021.

Numerous projects are underway reviewing the data gathered during the 2021-22 drill programme. These include structural mapping and analysis, processing and interpretation of Down Hole Electro-Magnetic (**DHEM**) surveys and ground based Sub-Audio Magnetic (**SAM**) surveys completed during the drill programme at KMC and the regional targets. These various work streams will form the basis for planning future drill programmes.

The proceeds of the Offer will primarily be applied to further drilling at RGP to drive additional growth of Project resources and for the general working capital requirements of the Company.

6. Rights and Liabilities attaching to Shares

6.1 Shares

The following is a summary of the more significant rights and liabilities attaching to Shares being offered pursuant to this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

(a) General meetings

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution.

(b) Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at general meetings of Shareholders or classes of shareholders:

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote (even though he or she may represent more than one member); and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for each Share held, but in respect of partly paid shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) Dividend rights

Subject to the Corporations Act, Listing Rules, the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit.

(d) Winding-up

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the Company's property, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of shareholders.

(e) Shareholder liability

(g) Future increase in capital

The issue of any new Shares is under the Directors' control. Subject to restrictions on the issue or grant of securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

(h) Variation of rights

(k) Proportional Takeover Provisions

Pursuant to section 648G of the Corporations Act, the Constitution includes provisions that provide that a proportional takeover bid for Shares may only proceed after the bid has been approved by a meeting of Shareholders held in accordance with the terms set out in the Corporations Act. These provisions will cease to have effect on the third anniversary of the adoption of the Constitution unless renewed with Shareholder approval in accordance with the Corporations Act.

7. Risk factors

7.1 Introduction

The Shares offered under this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors consider the risk factors described below, together with information contained elsewhere in this Prospectus, and to consult their professional advisers, before deciding whether to apply for Shares pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors.

The risks identified in this Section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Shares.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

7.2 Company Specific Risks

(a) Exploration and Development

Potential investors should understand that mineral exploration and development are high-risk undertakings. There can be no assurance that future exploration of the Company's tenements, or any other mineral licences that may be acquired in the future, will result in the discovery of an economic resource. Even if an apparently viable resource is identified, there is no guarantee that it can be economically exploited. The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns or adverse weather conditions, unanticipated operational and technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, industrial and environmental accidents, industrial disputes, unexpected shortages and increases in the costs of consumables, spare parts, plant, equipment and staff, native title process, changing government regulations and many other factors beyond the control of the Company.

(b) Additional Funding

The Company will generate losses for the foreseeable future. While the funds to be raised under the Offer are considered sufficient to meet the stated objectives of the Company, the Company will require additional funding for its activities.

The Company's ability to effectively implement its business and operational plans in the future, to take advantage of opportunities for future acquisitions or other business opportunities and to meet any unanticipated liabilities or expenses which the Company may incur may depend in part on its ability to raise additional funds.

The Company may seek to raise additional funds through equity or debt financing or other means.

There can be no assurance that additional funding will be available when needed or, if available, the terms of the funding may not be favourable to the Company and might involve substantial dilution to Shareholders.

Inability to obtain sufficient funding for the Company's activities and future projects may result in the delay or cancellation of certain activities or projects, which would likely adversely affect the potential growth of the Company.

Loan agreements and other financing arrangements such as debt facilities, convertible note issues and finance leases (and any related guarantee and security) that may be entered into by the Company may contain covenants, undertakings and other provisions which, if breached, may entitle lenders to accelerate repayment of loans and there is no assurance that the Company would be able to repay such loans in the event of an acceleration.

(c) RGP Funding

Should the Company decide to develop the Ravensthorpe Gold Project (**RGP**), the Company will require additional project funding.

The Company will require additional funding to repay the \$4 million loan from Bolong (Australia) Investment Management Pty Ltd (ACN 134 507 449) (**Shareholder Loan**). The Shareholder Loan is repayable 120 days following any decision by the Company to develop RGP. If sufficient funds are unable to be raised to repay the Shareholder Loan when due, Bolong could take action against the Company, including seeking to enforce any security it has at that time over the Company's assets. The loan document for the Shareholder Loan provides that the Shareholder Loan shall be secured against the Company's interest in the Projects, but no action has been taken by Bolong to perfect any security in this regard as at the date of this Prospectus. If Bolong seeks to perfect its security, this is expected to involve the Company granting a first ranking general security and mining mortgages over the Tenements.

Any debt financing, if available, may involve granting security over the Company's assets, restrictions on other forms of financing and operating activities. Any equity funding has the potential to be substantially dilutive to Shareholders and may be undertaken at prices lower than the Share issue price under the Offer. No assurance can be given that adequate funding will be available, or available on suitable terms. The ability to raise the required additional capital is subject to entry into binding agreements and may be influenced by other factors including the other risks as set out in this Section 7.

(d) Key Personnel

The Company is substantially reliant on the expertise and abilities of its key personnel in overseeing the day-to-day operations of its projects. There can be no assurance that there will be no detrimental impact on the Company if one or more of these employees or contractors cease their relationship with the Company.

(e) Liquidity

Certain Securities are currently under ASX mandated escrow for 24 months from the date the Company achieved official quotation on the ASX (which occurred on 22 March 2021). During the period in which these securities are prohibited from being transferred, trading in Shares may be less liquid which may impact on the ability of a Shareholder to dispose of his or her Shares in a timely manner. Prior to the Offers, the Shares available for trading is approximately 54%. Assuming the Offer is fully subscribed (or all Shortfall is fully placed) the Shares available for trading will be approximately 61%.

(f) Environmental (including permitting)

The Company's activities will be subject to the environmental laws inherent in the mining industry and in Australia. The Company intends to conduct its activities in an environmentally responsible manner and in compliance with all applicable laws. However, the Company may be the subject of accidents or unforeseen circumstances that could subject the Company to extensive liability. The occurrence of any such environmental incident could delay future production or increase production costs.

In addition, environmental approvals will be required from relevant government or regulatory authorities before certain activities may be undertaken which are likely to impact the environment, including for land clearing and ground disturbing activities. Failure or delay in obtaining such approvals will prevent the Company from undertaking its planned activities.

Further, the Company is unable to predict the impact of additional environmental laws and regulations that may be adopted in the future, including whether any such laws or regulations would materially increase the Company's cost of doing business or affect its operations in any area.

7.3 Industry Specific Risks

(a) Commodity Price

Changes in the market price of a range of commodities but in particular, gold and copper, which in the past has been subject to material fluctuations, will affect the profitability of the Company's operations and its financial condition in the future, if the Company is able to develop RGP and commences production. Gold and copper prices are affected by numerous industry and market factors and events that are beyond the control of the Company including expectations with respect to the rate of inflation, interest rates, currency exchange rates (particularly the strength of the US dollar), the demand for jewellery and other products containing gold and copper, production levels, inventories, cost of substitutes, changes in global or regional investment or consumption patterns and sales by central banks and other holds of gold and other metals in response to the above factors as well as general global economic conditions and political trends.

A decline in the market price of gold and copper below the Company's future costs of production for any sustained period due to these or other factors and events, would have a material adverse effect on the profit, cash flow, financial performance and position and future operations of the Company. Such a decline could also have a material adverse impact on the ability of the Company to finance the exploration and development of its existing and future projects. A decline in the market price of gold may also require the Company to write down any Ore Reserves that may be declared in the future which would have a material adverse impact on the value of the Company's

securities. The Company will also have to assess the economic impact of any sustained lower gold prices on recoverability and therefore, on cut-off grades and the level of its Mineral Resources and any Ore Reserves it may estimate in the future.

A delay in exploration or production or the abandonment of one or more of the Company's Projects may have a material adverse effect on the Company's production, earnings and financial position.

(b) Exchange Rate

The international price of various commodities the Projects are prospective for are typically denominated in United States dollars, whereas the income and expenditure of the Company with respect to the Projects will be denominated in Australian dollars, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined by international markets.

(c) COVID-19

The global economic outlook is facing uncertainty due to the current COVID-19 (Novel Coronavirus) pandemic, which has been having, and is likely to continue to have, a significant impact on global capital markets, the gold price and foreign exchange rates. While to date COVID-19 has not had any material impact on the Company's operations, should any Company personnel or contractors be infected, it could result in the Company's operations being suspended or otherwise disrupted for an unknown period of time, which may have an adverse impact on the Company's operations as well as an adverse impact on the financial condition of the Company. Supply chain disruptions resulting from the COVID-19 pandemic and measures implemented by governmental authorities around the world to limit the transmission of the virus (such as travel bans and quarantining) may, in addition to the general level of economic uncertainty caused by the COVID-19 pandemic, also adversely impact the Company's operations, financial position and prospects.

(d) Mineral Resource and Ore Reserve Estimates

Mineral Resource and Ore Reserve estimates are expressions of judgement based on knowledge, experience and industry practice. Estimates which were valid when initially calculated may alter significantly when new information or techniques become available. In addition, by their very nature Mineral Resource and Ore Reserve estimates are imprecise and depend to some extent on interpretations which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and mining plans which may, in turn, adversely affect the Company's operations.

The Company has identified a number of exploration prospects based on geological interpretations and limited geophysical data, geochemical sampling and historical drilling. While the Company intends to undertake additional resource drilling with the aim of defining new Mineral Resources, and upgrading its existing Mineral Resources, no assurance can be given that additional exploration or development results will result in the determination of a new Mineral Resources or upgrade of existing Mineral Resources. Even if a Mineral Resource is identified, or upgraded, no assurance can be given that this can be economically extracted.

(e) Tenure and Title

The ability of the Company to carry out successful exploration and mining activities will depend on the ability to maintain or obtain tenure to mining titles. The maintenance or issue of any such titles must be in accordance with the laws of the relevant jurisdiction and in particular, the relevant mining legislation. Conditions imposed by such legislation must also be complied with.

It is the Company's intention to satisfy the conditions that apply to the Tenements. However, no guarantee can be given that tenures will be maintained or granted, or if they are maintained or granted, that the Company will be in a position to comply with all conditions that are imposed or that they will not be plagued by third parties.

If the conditions that apply to a Tenement are not satisfied, it may be subject to additional conditions, penalties, objections, or forfeiture applications. Any of these events could have a materially adverse effect on the Company's prospects and the value of its assets.

Tenements are subject to periodic renewal or extension of term. There is no guarantee that any renewal or extension applications will be approved, or that future applications for renewal or extension will be approved. The consequence of failure to renew or involuntary surrender of all or part of a granted tenements could be significant.

The *Forrest & Forrest Pty Ltd vs Wilson* (2017) 346 ALR 1 recent High Court decision (**Forrest Decision**) in relation to the validity of grants of Western Australian mining leases and other tenements could bring the validity of mining leases and other tenements into question, as any mining lease or other tenement granted other than in strict compliance with the relevant legislative regime may result in the grant of that mining lease or other tenement being deemed invalid by a court.

The Company's Mining Leases M74/0136, M74/0163, M74/0165, M74/0180 and M74/0184 were all applied for after 10 February 2006. Any of these may be affected by the same procedural defect and/or may have been granted other than in strict compliance with the relevant legislative regime and therefore may be subject to challenge. It is expected that legislation will be passed by the Western Australian Parliament to address these issues. It is also not clear how long it will take for such legislation to be passed and whether it will trigger additional negotiation or compensation requirements under the *Native Title Act 1993* (Cth).

(f) Native Title and Aboriginal Heritage

In relation to the Tenements which the Company has an interest in, there may be areas over which legitimate common law native title rights of Aboriginal Australians exist. If native title rights do exist, the ability of the Company to gain access to Tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected. Considerable expense may be incurred in negotiating and resolving issues, including any compensation arrangements reached in settling Native Title claims lodged over any of the Tenements held or acquired by the Company.

The Directors will closely monitor the potential effect of native title claims involving the Tenements in which the Company has or may have an interest.

The presence of Aboriginal sacred sites and cultural heritage artefacts on the Tenements is protected by State and Commonwealth laws. Any destruction or harming of such sites and artefacts may result in the Company incurring significant fines and Court injunctions, which may adversely impact on exploration and mining activities. The Company will review and, as required, conduct surveys before conducting work which could disturb the surface of the land. The Tenements currently contain, and may contain additional, sites of cultural significance which will need to be avoided during field programs and resulting mining operations. The existence of such sites may limit or preclude exploration or mining activities on those sites and delays and expenses may be experienced in obtaining clearances.

(g) Exploration Costs

The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainty, and accordingly, the actual costs may materially differ from the estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely impact the Company's viability.

(h) Operating and Development Risks

If the Company becomes a producer, the Company's ability to achieve production, development, operating cost and capital expenditure estimates on a timely basis cannot be assured. The business of mining involves many risks and may be impacted by factors including ore tonnes, grade and metallurgical recovery, input prices (some of which are unpredictable and outside the control of the Company), overall availability of free cash to fund continuing development activities, labour force disruptions, cost overruns, changes in the regulatory environment and other unforeseen contingencies. Other risks also exist such as environmental hazards (including discharge of pollutants or hazardous chemicals), industrial accidents, occupational and health hazards, cave-ins, and rock bursts. Such occurrences could result in damage to, or destruction of, production facilities, personal injury or death, environmental damage, delays in mining, increased production costs and other monetary losses and possible legal liability to the owner or operator of the mine. The Company may become subject to liability for pollution or other hazards against which it has not insured or cannot insure, including those in respect of past mining activities for which it was not responsible. In addition, the Company's profitability could be adversely affected if for any reason its production and processing of or mine development is unexpectedly interrupted or slowed. Examples of events which could have such an impact include unscheduled plant shutdowns or other processing problems, mechanical failures, the unavailability of materials and equipment, pit slope failures, unusual or unexpected rock formations, poor or unexpected geological or metallurgical conditions, poor or inadequate ventilation, failure of mine communications systems, poor water condition, interruptions to gas and electricity supplies, human error, and adverse weather conditions.

(i) Failure to Satisfy Expenditure Commitments

Interests in tenements in Western Australia are governed by the mining acts and regulations that are current in that State and are evidenced by the granting of licences or leases. Each licence or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as

other conditions requiring compliance. Consequently, the Company could lose title to or its interest in its tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments.

(j) Safety

Safety is a fundamental risk for any exploration and production company with regard to personal injury, damage to property and equipment and other losses. The occurrence of any of these risks could result in legal proceedings against the Company and substantial losses to the Company due to injury or loss of life, damage or destruction of property, regulatory investigation, and penalties or suspension of operations. Damage occurring to third parties as a result of such risks may give rise to claims against the Company.

7.4 General Risks

(a) Inflation and costs of goods and services

The Company's operations are being impacted by inflation and the current rise in costs of goods and services. Should inflation and the costs of goods and services continue to rise this will affect the Company's operations and the Company may have to adjust and revise its budgets and operations.

(b) Share Market Risk

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. General share market conditions are affected by many factors such as:

- (i) general economic and political outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) interest rates and inflation rates;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of the Company's Shares may fluctuate significantly based on a number of factors including the Company's operating performance and the performance of competitors and other similar companies, the public's reaction to the Company's press releases, other public announcements and the Company's filings with securities regulatory authorities, changes in earnings estimates or recommendations by research analysts who track the Company's Shares or the shares of other companies in the gold and mineral exploration sector, changes in general economic conditions, the number of the Company's Shares publicly traded and the arrival or departure of key personnel, acquisitions, strategic alliances or joint ventures involving the Company or its competitors.

In addition, the market price of the Company's Shares is affected by many variables not directly related to the Company's success and are therefore not within the Company's control, including other developments that affect the

market for all resource sector shares, the breadth of the public market for the Company's Shares, and the attractiveness of alternative investments.

(c) Taxation

The acquisition and disposal of Securities will have tax consequences which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Securities from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Securities under this Prospectus.

(d) Agents and Contracts

The Directors are unable to predict the risk of insolvency or managerial failure by any of the contractors used (or to be used in the future) by the Company in any of its activities or the insolvency or other managerial failures by any of the other service providers used (or to be used by the Company in the future) for any activity.

(e) Force Majeure

The Company and its Projects, now or in the future may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, extreme weather conditions, fires, floods, explosions or other catastrophes, epidemics, or quarantine restrictions.

(f) Unforeseen Expenditure Risk

Expenditure may need to be incurred that has not been taken into account. Although the Company is not aware of any such additional expenditure requirements, if such expenditure is subsequently incurred, this may adversely affect the financial performance of the Company.

(g) Management of Growth

There is a risk that the Company's management may not be able to implement the Company's growth strategy. The capacity of the Company's management to properly implement the strategic direction of the Group may affect the Company's financial and operating performance.

(h) Litigation Risk

The Company in the future be exposed to possible litigation risks including native title claims, tenure disputes, environmental claims, occupational health and safety claims and employee claims. It may also in the ordinary course of business become involved in litigation and disputes with, for example, competing mining tenement holders or applicants, government departments affecting or overseeing the Company's activities or proposed activities, service providers and customers. Any such litigation or dispute could involve significant economic costs and adversely affect the Company's operations and cause damage to relationships with contractors, customers

or other stakeholders. Such outcomes may have an adverse impact on the Company's business, reputation and financial performance.

(i) Competition

The Company intends to compete with other companies, including major gold companies. Some of these companies have greater financial and other resources than the Company and, as a result, may be in a better position to compete for future business opportunities. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the Company's Projects and business. There can be no assurance that the Company can compete effectively with these companies.

(j) Insurance

The Company intends to maintain adequate insurance over its operations within the ranges that the Company believes to be consistent with industry practice and having regard to the nature of activities being conducted. However, the Company may not be insured against all risks either because appropriate cover is not available or because the Directors consider the required premiums to be excessive having regard to the benefits that would accrue.

(k) Changes to Laws and Regulations and Policy

The Company may be affected by changes to laws, regulations and policy (in Australia and other countries in which the Company may operate) concerning mining and exploration, property, the environment, superannuation, taxation trade practices and competition, government grants, incentive schemes, accounting standards and other matters. Such changes could have adverse impacts on the Company from a financial and operational perspective.

7.5 Investment is Speculative

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above may, in the future, materially affect the financial performance of the Company and the value of the Company's Securities.

Potential investors should consider that investment in the Company is highly speculative and should consult their professional advisers before deciding whether to apply for Securities pursuant to this Prospectus.

Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company’s securities. The Offer is an offer of Shares which are ‘continuously quoted securities’ for the purposes of the Corporations Act.

This Prospectus is a “transaction specific prospectus”. In general terms a “transaction specific prospectus” is primarily required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is issued in circumstances where significant publicly available information in relation to the Company exists by virtue of disclosures to ASX. Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three (3) months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Information that is already in the public domain has not generally been included in this Prospectus other than certain information required to be included in this Prospectus by the Corporations Act.

The Company, as a disclosing entity under the Corporations Act, states that:

- (a) the Company is subject to regular reporting and disclosure obligations;
- (b) copies of documents lodged with the ASIC in relation to the Company may be obtained from, or inspected at, the offices of the ASIC; and

Remuneration

The remuneration of an executive director is decided by the Board, without the affected executive director participating in that decision-making process. The total maximum remuneration of non-executive directors is initially set by the Constitution and subsequent variation is by ordinary resolution of Shareholders in general meeting in accordance with the Constitution, the Corporations Act and the ASX Listing Rules as applicable. The determination of non-executive directors' remuneration within that maximum will be made by the Board having regard to the inputs and value to the Company of the respective contributions by each non-executive director. The current amount has been set to not exceed \$300,000 per annum.

A director may be paid fees or other amounts (i.e. non-cash performance incentives such as Options, subject to any necessary Shareholder approval) as the other directors determine where a director performs special duties or otherwise performs services outside the scope of the ordinary duties of a director. In addition, Directors are also entitled to be paid reasonable travelling, hotel and other expenses incurred by them in or about the performance of their duties as Directors.

The following table shows the total (and proposed) annual remuneration paid to both executive and non-executive directors.

Director	FY2021 (Actual)	FY2022 (Actual)	FY2023 (Proposed)
Paul Bennett	\$279,425	\$286,654	\$290,000
John Fitzgerald	\$52,184	\$79,077	\$80,000
Edmund Ainscough	\$32,615	\$49,423	\$50,000
Anthony (Tony) James	\$32,615	\$49,423	\$50,000
