ASX ANNOUNCEMENT

European Pentrox® Update.

Medical Developments International Limited (ASX: MVP) advises that the roll out and acceptance of Pentrox in the United Kingdom, Republic of Ireland and the EU is going to plan.

CEO of Medical Developments, Mr. John Sharman said: “We have just received our first order from Mundipharma for the French market and expect another order shortly for Belgium. The French order is the largest single order in our company’s history.”

In the United Kingdom, Pentrox was launched in February 2016 and in the Republic of Ireland in April 2016. Since that time, MVP’s marketing partner Galen Limited has worked closely with major hospitals in the preparation and submission of more than 130 Hospital Formulary Applications. The hospitals targeted in the first phase of formulary applications cover a significant percentage of the emergency cases seen in the UK and Ireland.

Galen Managing Director Mr. David Bennett said:

“Formulary applications take circa 6 months before a new product is listed for use. So far, we have achieved 11 formulary listings and we have confirmed hospital drug and therapeutic committee dates for a further 21. Our roll out of Pentrox is going to plan and we are very confident of acceptance in the Emergency Departments.

In terms of Ambulance, South East Coast Ambulance Service, one of ten Ambulance Trusts in England, is currently using Pentrox and administering doses to patients. South East Coast Ambulance Service has completed an “in market” evaluation and shared the preliminary results in the Spring Edition of Ambulance Today. By the end of the year, the South East Coast Ambulance Service evaluation is expected to be published and reviewed by the Joint Royal Colleges Ambulance Liaison Committee (JRCALC), which should result in a positive recommendation and adoption by all Ambulance Trusts.

In the Republic of Ireland, the Pre-Hospital Emergency Care Council (PHECC) guidelines are expected to be published in September with the inclusion of Pentrox, which will result in adoption across the National Ambulance Service. The response to Pentrox has been extremely positive and we have already received 9 formulary listings from major hospitals.”

Mr Sharman said: “In addition to the UK, Ireland, France and Belgium we are confident of introducing Pentrox to the other European countries during 2017 and confirming our expectations in terms of the market penetration and uptake of Pentrox. Elsewhere in Europe we are also progressing our plans with some Eastern Bloc countries.”
