# Aeromagnetic Survey and Drilling Update

- **Atlas Geophysics completes aeromagnetic drone survey**
- **Norfolk progresses to firm drill targeting and ranking**

**Figure 1. PAS H100 Rotary Wing with operator at EL20/2020**

Norfolk Metals Limited (ASX:NFL) (Norfolk or the Company) progress to determine drilling targets defined via the aeromagnetic drone survey and recent gravity survey. This new data will be interpreted with the previous exploration work conducted by Leached Cap Pty Ltd to develop a final drill program. Working with Australian Mining Technologies (AMT) the Company has confirmation on ancillary drill equipment packing schedule being completed in China with container mobilised to Shanghai port to be ship to Tasmania. The Hanjin D&B10 rig located in Perth will soon be transported via rail to Melbourne and shipped to Tasmania.

END

This announcement has been authorised by the board of directors of Norfolk.

### About Norfolk Metals

Norfolk Metals is an ASX listed exploration company holding the Roger River Gold Project and the Orroroo Uranium Project.

The Roger River Gold Project comprises one granted exploration licence, EL20/2020, and one exploration licence application EL17/2021, which together cover 261km<sup>2</sup>, located 410km northwest of the capital city of Hobart, Tasmania. The Project is prospective for gold as indicated by gold and arsenic soil anomalies associated with intense silicification, argillisation and diatreme breccias in close proximity to the Roger River Fault along with carbonate-rich host rocks.

The Orroroo Uranium Project is located approximately 274km northwest of the capital city of Adelaide, South Australia within the Walloway Basin, which is an elongate Tertiary Basin approximately 50km long and up to 15km wide. It consists of Tertiary and Quaternary sediments unconformably underlain by Adelaiddian basement.
