

Neometals

Greener materials for future generations

Neometals Corporate Presentation | March 2022

ASX Code: **NMT** | OTC: **RDRUY** | Frankfurt: **9R9** | AIM Code: **NMT**

DISCLAIMER

Summary information:

This document has been prepared by Neometals Ltd (“Neometals” or “the Company”) to provide summary information about the Company and its associated entities and their activities current as at the date of this document. The information contained in this document is of general background and does not purport to be complete. It should be read in conjunction with Neometals’ other periodic and continuous disclosure announcements lodged with the Australian Securities Exchange, which are available at www.asx.com.au.

Forward-looking information:

This document contains, opinions, projections, forecasts and other statements which are inherently subject to significant uncertainties and contingencies. Many known and unknown factors could cause actual events or results to differ materially from the estimated or anticipated events or results included in this document. Recipients of this document are cautioned that forward-looking statements are not guarantees of future performance.

Any opinions, projections, forecasts and other forward-looking statements contained in this document do not constitute any commitments, representations or warranties by Neometals and its associated entities, directors, agents and employees, including any undertaking to update any such information. Except as required by law, and only to the extent so required, directors, agents and employees of Neometals shall in no way be liable to any person or body for any loss, claim, demand, damages, costs or expenses of whatever nature arising in any way out of, or in connection with, the information contained in this document.

Financial data:

All figures in this document are in Australian dollars (AUD) unless stated otherwise.

Not financial product advice:

This document is for information purposes only and is not financial product or investment advice, nor a recommendation to acquire securities in Neometals. It has been prepared without taking into account the objectives, financial situation or needs of individuals. Before making any investment decision, prospective investors should consider the appropriateness of the information having regard to their own objectives, financial situation and needs and seek legal and taxation advice appropriate to their jurisdiction.

Investment risk:

An investment in securities in Neometals is subject to investment and other known and unknown risks, some of which are beyond the control of Neometals. The Company does not guarantee any particular rate of return or the performance of Neometals. Investors should have regard to the risk factors outlined in this document.

Compliance Statement:

The information in this document that relates to the Mineral Resource Estimate for the Barrambie VTM Project has been extracted from the ASX Release set out below, which is available at www.neometals.com.au

17/04/2018 Barrambie Project - Mineral Resource Update

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates in the market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original market announcements.

EXECUTIVE SUMMARY

Neometals innovatively develops opportunities in minerals and advanced materials essential for a sustainable future.

Innovative project developer with demonstrable ESG conviction

Focus on circular, sustainable materials recovery and recycling.

Suite of growth projects supporting transition to circular supply and cleaner energy:

1. Li-ion Battery recycling
2. Vanadium Recovery Project
3. ELi® Lithium Process
4. Barrambie Ti/V Project

Project commonality - integrated minerals/materials for EV and ESS sectors to decarbonize the supply-chain

Strong team with track-record of strategy / project execution and shareholder return

ALIGNED MANAGEMENT TEAM WITH A TRACK RECORD OF PROJECT DEVELOPMENT

- Team with growing track record in delivering project outcomes – Mt Marion, Widgie Nickel
- Clear strategy and project model can be replicated
- Strong balance sheet to fund all projects through to FID
- A\$82M in dividends / buyback / return of capital in last 5 years
- Alignment with founders, board and management holding ~8% equity

Total Shareholder Returns⁽¹⁾
Annualized TSR Over the Last 5-years

MT MARION DEVELOPMENT CASE STUDY – Identify, Innovate, Integrate, Partner

Successful project development including:

- Acquisition, JV with Mineral Resources Ltd (ASX:MIN) earning 30% equity by funding to FID
- Internal DFS, Mining and Construction Approvals, Infrastructure
- Qualification of spodumene suitability for lithium hydroxide conversion

De-risked project development

- Secured LOM off-take and equity partner Ganfeng Lithium
- Funded share of development via an equity sell-down

Successful exit facilitates future growth

- ~A\$230MM of cash from exit against initial investment ~A\$3MM
- Proceeds provide shareholder returns and funding for future next stage growth focused on circular sustainable materials recovery

DOWNSTREAM – MATERIALS PROCESSING

Li-ion Battery Recycling Process

100% Neometals (SMS group earning 50%)

Primobius GmbH – Commercialisation

Incorporated 50:50 JV with SMS group

Primobius

Battery recycling without limits

ISSUE

PARTICIPANTS IN THE BATTERY VALUE CHAIN ARE SEEKING ALTERNATIVE SOLUTIONS THAT REDUCE THEIR CARBON FOOTPRINTS, REGULATORY AND MORAL OBLIGATIONS

⚡ **Electric car**

💧 **Internal combustion engine car**

OPPORTUNITY

LARGE OPPORTUNITY FOR A HANDFUL OF ADVANCED HYDROMETALLURGICAL RECYCLING PROVIDERS

- Solution to OEMs needing to meet proposed regulations
- Strategic supply chain resilience
- Support to circular economy
- Compelling total addressable market ("TAM")

NEOMETALS SOLUTION

**NEOMETALS PROCESSING TECHNOLOGY BACKED BY
LEADING GERMAN PLANT BUILDER**

**SAFE, ENVIRONMENTALLY-FRIENDLY PROCESS PRODUCING
HIGH PURITY, LOW CARBON BATTERY MATERIALS**

TOTAL	165

BUSINESS MODEL

MULTIPLE REVENUE GENERATION OPPORTUNITIES VIA FLEXIBLE OPERATING MODEL

- Target industrial-scale feed volumes direct from OEMs
- Primobius JV to execute global rollout
- Primobius underpinned by large delivery partner (SMS) with ability to guarantee plant performance

Principal

- Primobius to responsibly process production scrap or EOL batteries for a fee. Customer option to purchase all products under offtake agreement

Partnership

- Primobius to build and operate recycling plant(s) both share economic returns – JV etc. Partner option to purchase all products under offtake agreement

License

- License IP directly for royalty and potentially EPC recycling plant(s)

STATUS

FIRST SHREDDING COMMERCIAL OPERATIONS PENDING H1 2022.

NEXT STEPS

Indicative Primobius Evaluation Timeline to 50tpd FID

Running Feedstock and Offtake Negotiations in parallel

** Subject to Board Approval and Primobius Board Approvals.*

INVESTMENT CASE

LITHIUM-ION BATTERY RECYCLING

1

Auto OEMs and Batterymakers Require a LiB Recycling Solution

Global volume of 'end of life' LIBs available for recycling expected to grow at 18.8% per annum over the next ~10 years⁽¹⁾. Highlighted by Stelco whole of vehicle recycling business model.

2

Environmentally Friendly Process Differentiated from Incumbent Technology –16 National Phase Patents pending

Hydromet process has a negligible CO₂ emission footprint compared to primary minerals extraction or the incumbent pyromet recycling process for Li-B batteries

3

Flexible and Robust LiB Recycling Technology

Multiple battery chemistries, formats and types can be processed with lower emissions and less transport required than pyrometallurgical incumbents.

4

Attractive Economics and Exposure to Battery Metal Prices

High purity chemicals not intermediates for ethical supply to the cathode producer supply chain with better recovery and lower emissions than pyrometallurgical incumbents

5

SMS Partnership and Flexible Business Plan Attracting OEM Partners

SMS operational and manufacturing capability applied to a flexible business model provides a material speed to market advantage. Technology and business model validation from brand names like Mercedes and Stelco

DOWNSTREAM – MATERIALS RECOVERY

Vanadium Recovery Process
100% Neometals

Vanadium Recovery Project 1 - Finland
Evaluating a 50:50 Incorporated
JV with Critical Metals Ltd

NEED

- Globally China represents >50% of the current supply with limited current production from Tier-1 jurisdictions
- Low or zero carbon supply footprint required for the circular economy and battery industry
- Steel by-product stockpiles need to be remediated

⁽¹⁾ H2GS MoU is non-binding. For full details refer to ASX release dated 13th September 2021 titled "H2GreenSteel MOU for 4 Mt High-Grade Vanadium Slag"

OPPORTUNITY

INDUSTRIAL SCALE DEMAND FOR DOMESTIC SUPPLY OF HIGH PURITY V FOR ENERGY STORAGE AND OTHER APPLICATIONS

VANADIUM RECOVERY PROJECT – PORI, FINLAND (VRP1)

- Supply Agreement with Scandinavian steel giant SSAB for ≥2Mt of high-grade vanadium-bearing by-product ("Slag") stored at 3 steel mills (Lulea, Raahé and Oxelosund)
- Neometals funding evaluation to FID for the recovery of vanadium using NMT's proprietary eco-friendly hydromet process and developing as a 50:50 Incorporated JV

NEOMETALS & CRITICAL METALS PARTNERSHIP

- Executed agreement on 6/4/20 to jointly evaluate production of high-purity vanadium in Scandinavia. Positive FID will lead to a 50:50 JV
- Neometals will fund joint studies and receive a royalty on sales for entering into a process technology licence agreement with the JV

VANADIUM RECOVERY PROJECT – BODEN, SWEDEN (VRP2)¹

- MoU⁽¹⁾ with H2 Green Steel (future green steel producer) to evaluate second, larger, vanadium production operation
- New feed source for potential second Slag supply agreement

NEOMETALS SOLUTION

UNIQUE PROCESS TO SUSTAINABLY RECOVER HIGH GRADE VANADIUM AND SALEABLE BY-PRODUCTS

- Unique (EU patent pending) hydrometallurgical process to recover vanadium from stockpiled slag utilising captured CO₂ from local emitters as primary reagent in process.
- Conventional equipment configured in a fully piloted novel process
- Potential for negative/zero carbon production of battery-grade material
- Can permanently chemically sequester CO₂ in tailings product, potential for use in building products as inert.

ROBUST METRICS – NO MINING RISK

SALE OF HIGH PURITY V TO BATTERY INDUSTRY PLUS BY-PRODUCTS TO INDUSTRIAL APPLICATIONS. SUPPORTED BY LOWEST QUARTILE COSTS AND ESG CREDENTIALS

⁽¹⁾ All figures expressed on a 100% ownership and pre-tax basis. For further information, refer to ASX release dated 4th May 2021 – “Vanadium Recovery Project - Outstanding PFS Results” and the assumptions set out therein. Page 3 of the announcement contains the financial summary which is the source of the throughput rate, production rate, operating costs (“OPEX”), initial capital costs, pre-tax net present value using a 10% discount rate (“NPV10”) and pre-tax payback period. The internal rate of return was calculated by Neometals Management.

Vanadium Cost Curve 2021

Operating Cost US\$/lb V₂O₅

○ Mineral Concentrate Grade % V₂O₅

Source: TTP Squad – Cost Curve, Neometals Management – Mineral Concentrate grades for select vanadium producers market as “O”

STATUS / NEXT STEPS

FUNDED TO FID. CLASS 3 FEASIBILITY AND CUSTOMER PRODUCT TRIALS UNDERWAY IN PARALLEL WITH ENVIRONMENTAL PERMITTING IN FINLAND

Indicative Project Timeline - Vanadium Recovery Project

** Subject to successful studies and Neometals/Critical Metals Board Approval. ** Subject to FID, approvals, finance*

INVESTMENT CASE

VANADIUM RECOVERY

1

Strong Fundamentals for low-carbon Vanadium in EU

Forecast supply / demand imbalance for Vanadium with demand upside from new lithium vanadium battery cathode chemistries and Vanadium redox flow batteries

2

Piloted, environmentally-friendly Technology – PCT/EU patents pending

Pilot plant produced high-grade V_2O_5 powder (exceeding 99.5%) using a process which utilises carbon as major reagent and can sequester carbon in by-product.

3

Secure Feedstock for first commercial operation

10 year, minimum 2 million tonne purchase agreement with leading Scandinavian steel maker SSAB.

4

Robust Economics and Cost Position

PFS incorporating an AACE Class 4 engineering confirms superior project economics and the projects 1st quartile cost of production. Economics strongly supported by vanadium grades in Slag stockpiles

5

Significant Future Growth Potential from Additional Sites

MoU signed with H2GS AB for a second larger Vanadium Recovery Project – Boden, Sweden. Testing third party feedstocks ex-EU

DOWNSTREAM – MATERIALS PROCESSING

ELi[®] Lithium Process

70% Neometals / 30% Mineral Resources Ltd

ELi[®] Lithium Project - Portugal

Co-funding evaluation of 50:50 JV with
Bondalti Chemicals SA using ELi[®] Process

NEED

**LITHIUM NON-SUBSTITUTABLE IN LIB
EU HAS NO OPERATING LITHIUM DEPOSITS
LARGEST CONTRIBUTOR TO CO2 FOOTPRINT OF LIB**

Source: Benchmark Forecasts

OPPORTUNITY

**DEPLOY PROPRIETARY PATENTED ELI PROCESS
INTO EUROPE WITH STRONG LOCAL PARTNER**

- Grow global lithium production from lithium chloride (brine) deposits in South America, largest known resources and lowest carbon intensity
- ELi Process uses electrolysis to convert lithium chloride into battery-quality lithium hydroxide, replaces traditional carbon-intensive reagents with electricity in conventional chlor-alkali cells

SOLUTION

**UTILISES OFF-THE-SHELF
CHLOR-ALKALI ELECTROLYSERS**

**BATTERY QUALITY LITHIUM
CHEMICALS, NO IMPORTED
SODA ASH/CAUSTIC SODA**

**CAN UTILISE RENEWABLE
POWER AND SEQUESTER
CARBON**

**SIGNIFICANT OPERATING AND
CAPITAL COST ADVANTAGES**

Source: Hatch (2016)

Source: Orocobre, Lithium Americas, E3 Metals Company Reports, Exyte Cl.3 Engineering Cost Study (2016)

BONDALTI PARTNERSHIP

LEVERAGE BONDALTI'S STRONG EXPERIENCE IN CHLOR-ALKALI

EXTENSIVE INFRASTRUCTURE ENABLES FAST-TRACK EVALUATION AND PILOTING AT THEIR ESTARREJA CHEMICAL SITE

Bondalti:

- Private Grupo Jose de Mello company
- Focus on chlor-alkali chemical and aniline production
 - Largest Portuguese chemical producer
 - Production base in Estarreja chemical cluster
- Bondalti seeking entry into LiOH production using chlor-alkali process infrastructure
- Production synergy for ELi[®] to ship H₂ and Cl₂ by-products “over the fence”
- Experienced and competent industrial operator of same type of chlor-alkali plant used for ELi[®]

Cooperation:

- Binding cooperation to pilot Eli and evaluate future 50:50 JV to produce LiOH for European auto value chain
- RAM would issue the JV a royalty free license to the technology
- Equal co-funding on pilot and evaluation activities

STATUS / NEXT STEPS

FUNDED THROUGH PILOT PLANT TO CLASS 2 FEED STUDY

Indicative Timeline - Bondalti ELi[®] Cooperation *

* Subject to Steering Committee approvals

INVESTMENT CASE

ELi[®] LITHIUM PROCESS

1 Unique Technology with 12 granted patents and 18 pending

Technology well guarded. Importantly the process has been proven at semi-pilot scale and supported by Feasibility Study economic evaluation.

2 Significant operating and capital cost advantage

Recovery and regeneration of key reagents on site eliminates expensive imports

3 Compelling environmental benefits to reduce CO₂ footprint

Potential for significant reduction carbon footprint due to shift in primary reagent to electricity and elimination of carbon intensive transportation of feedstocks and reagents, potential for additional savings with renewable power

4 Strong partner to scale up and commercialise in EU

Bondalti is Portugal's largest chemical business in with extensive chlor alkali experience, and plant that can be repurposed to produce lithium hydroxide,

5 Flexible business models that can be replicated globally

Neometals (through RAM) can deploy globally (ex-EU) as principal, in partnership with, or licence to lithium developers/producers for royalty stream

UPSTREAM - MINERAL EXTRACTION

Barrambie Titanium and Vanadium Project
100% Neometals

NEED & OPPORTUNITY

CHINA IS HALF WORLD MARKET AND SWITCHING TITANIUM PIGMENT PRODUCTION TO MORE SUSTAINABLE CHLORIDE PROCESS

WORLD SUPPLY OF QUALITY CHLORIDE FEEDSTOCKS IN DECLINE, PRICES STEADILY INCREASING FOR LAST 5 YEARS

- Chloride Pigment production requires high-grade feedstocks such as rutilles, high quality ilmenites and high-grade titanium slags
- Primary mineral sands (rutile, ilmenite) deposits are being depleted, smelting of hard-rock titanium concentrates from Rio and China set benchmark prices
- Barrambie is one of the highest-grade hard rock Titanium assets globally¹
- Key mining/construction permits in place
- Working with Chinese partners to realise and optimise value² from production

Source: TZMI Price Forecast May 2021; TZMI Supply Demand Forecast August 2021

1. See Barrambie Mineral Resource Estimate on slide 43.
2. For further details of commercial partnerships via MOU please see:
ASX release of 16/4/2021 titled "Barrambie - MOU for Cornerstone Concentrate Offtake" and
ASX release of 4/10/2019 titled "MOU for JV to develop Barrambie"

NEOMETALS SOLUTION

SIMPLE TRUCK AND SHOVEL MINING FOLLOWED BY GRAVITY SEPARATION TO PRODUCE MIXED CONCENTRATES FOR EXPORT TO CHINA FOR SMELTING OR FURTHER REDUCTION TO PRODUCE SEPARATE ILMENITE AND VANADIUM CONCENTRATES

Neometals activities to prepare mineral concentrates for sale

STATUS / NEXT STEPS

MOU FOR POTENTIAL 50:50 JV OPERATING JV WITH IMUMR¹ (CHINA)

MOU FOR OFFTAKE WITH TITANIUM SLAG PRODUCER JIUXING TITANIUM²

COMPLETING PFS TO BENCHMARK NEGOTIATIONS FOR BUILD-OWN-OPERATE CONTRACTORS

Indicative Project Timeline - Barrambie Mixed Gravity Concentrate Route

** Subject to successful Jiuxing trial, positive PFS and Board approval*

1. for full details refer to ASX announcement entitled "MOU for JV to develop Barrambie" released on 4th October 2019

2. for full details refer to ASX announcement entitled "Barrambie - MOU for Barrambie Concentrate Offtake" released on 16th April 2021

INVESTMENT CASE

BARRAMBIE PROJECT

1 Strong Demand/Supply Fundamentals for Titanium

China is transitioning from sulphate to more environmentally friendly and sustainable chloride titanium production, so securing access to cleaner, higher grade chloride feedstock is a strategic imperative.

2 Large, High-Grade Resource¹ in Tier 1 Jurisdiction

One of the World's highest grade hard-rock titanium assets¹ with revenue upside from vanadium rich iron by-products. \$37M spent over +15 years.

3 'Mine-ready'

Granted mining proposal and Ministerial Approval to construct 3.2Mtpa concentrator MoUs with Chinese partners for potential operating JV and separate take-or-pay offtake

4 Capital Light Development Strategy

Potential BOO/T mining and concentration in Australia with intermediate product exported to China

5 Proven Partnering Business Model

Track record of working with partners to de-risk and deliver project execution outcomes with strong returns to shareholders (Mt Marion & Widgie Nickel examples)

1. For full details refer to Neometals ASX release dated 17th April 2018 titled "Barrambie Project - Mineral Resource Update" and Appendix: Barrambie Mineral Resource Estimate on slide 43

DIVERSIFIED ESG ALIGNED PORTFOLIO

INTEGRATED MINERALS / MATERIALS FOR EV AND ESS
SECTORS TO DECARBONISE THE SUPPLY CHAIN

SUSTAINABILITY

Neometals is committed to optimising finite resources with circular practices to benefit society and the environment for a sustainable future.

- All projects, particularly EU, focused on materials for decarbonisation and the clean energy revolution
- Further – to support domestic supply chain resilience and increasing the lifetime of ethical resources
- Genuine ESG conviction – core business to support resilience and adaptability. Partners being attracted accordingly.
- All projects align with corporate purpose and sustainability objectives. 2nd ESG report lodged - TCFD, ESG remuneration KPIs, CY2021 NMT carbon neutrality, quantifiable targets for CY2022

CORPORATE DASHBOARD

NEOMETALS HAS SIGNIFICANTLY OUTPERFORMED THE ASX200, WITH LTM SHARE PRICE APPRECIATION OF 351% AND A\$82M RETURNED VIA DIVIDENDS AND BUY BACKS IN THE LAST ~5 YEARS

ASX: NMT OTC:RDRUY

12 MONTH SHARE PRICE PERFORMANCE

THREE OF OUR CORE BUSINESSES REACHING INVESTMENT DECISIONS IN 2022

**CORE PROJECTS ALL AT MATURE STAGES OF DEVELOPMENT.
LITHIUM HYDROXIDE PROJECT FOLLOWING HOT ON THE HEELS**

LITHIUM-ION BATTERY RECYCLING

(50:50 Incorporated JV)

VANADIUM RECOVERY

(Earning into 50:50 JV)

ELi LITHIUM HYDROXIDE

(Earning into 50:50 JV via RAM (70% NMT/30% MIN))

BARRAMBIE TITANIUM

(MOU for 50:50 Operating JV)

INVESTMENT HIGHLIGHTS

1. EV driving ever increasing volumes of production scrap, warranty returns and end-of life
2. Demonstrating proprietary green process – high recovery, high purity products, low cost, CO2 footprint
3. Partnered with leading global plant supplier SMS group
4. Flexible business models

1. Increasing demand from EV/ESS Piloted proprietary green process - high-purity low-carbon vanadium
2. Secure 10-year feedstock supply contract
3. Lowest quartile cost domestic production in EU
4. Global rights (ex-Scandinavia) to deploy – growth options

1. Potential for domestic production of lithium in EU
2. Piloting Patented Process to prove significant operating and capital cost advantages
3. Green powered, low carbon
4. Committed industry partner
5. Global rights (ex-EU) to deploy – growth options

1. Diminishing supply of Titanium feedstocks driving price consistent growth for last 6 years
2. One of the highest-grade hardrock Ti resources globally (for chloride slags)
3. Tier-1 jurisdiction with key permissions to mine
4. Offtake MoU (non-binding) in place

NEAR-TERM CATALYSTS

- 10tpd commercial plant opening H1 2022 – disposal service as Principal
- Licence and Option Agreement to deploy into NA with Stelco
- for initial 20ktpa operation

- FS completion end June 2022
- Key decision point end Dec 2022 for first plant in Pori, Finland
- MOU for potential 2nd larger plant in Sweden and testing new sources

- Updated FS and Co-funded pilot trials in 2022
- Evaluation on multiple brine/hardrock feed sources
- FEED Study and FID H2 2023

- Smelting trials in Q2 2022 for industrial scale validation
- Negotiate full-form off-take agreements
- Target key decision point end 2022

COMPANY HIGHLIGHTS

NEOMETALS IS AN ATTRACTIVE INVESTMENT

Innovative processing technologies for sustainable advanced materials

Clear strategy to commercialise with proven partnering business model

Growing portfolio of ESG-aligned battery materials projects with near-term decision points

Strong team with track record and commitment to green circular economy principles

Strong balance sheet to fund developments up to key investment decisions

Strong organic growth potential from our pipeline of opportunities to deploy our technology around the globe as principal, partner or technology licensor
