## **Global Medtech Specialist Appointed as New Chairman**

- **Lifespot appoints Philippa Lewis as Chairman**
- **Lewis has extensive experience in the development & commercialisation of medical devices & disruptive digital technologies**
- **Lewis' appointment comes after Tilo Brandis' resignation as Chairman**
- **Dr Phil Behkor to move to Advisory Board**

**Lifespot Health (ASX: LSH) ("Lifespot" or "Company")** is pleased to announce the appointment of medical digital technologies expert, **Philippa Lewis** as the Company's new Chairman, effective as of 1 September 2017.

Lewis has over 20 years experience within the Medtech and healthcare industries. During this time she has founded multiple private and publicly listed start-up enterprises and held roles as professional company director, corporate advisor and as a global health and aged care industry specialist. Lewis has valuable experience in digital consumer healthcare commercialisation with a diverse set of corporate skills and capabilities in the areas of licensing, mergers and acquisitions, capital management, intellectual property, media and communications, international joint ventures and big data. Lewis is currently Chairman of Karista Pty Ltd and The Big Smoke Media Group.

Lewis has been engaged in the development of Healthy Aging Living Laboratories on behalf of the Economic Advisory Board of South Australia and is leading a healthcare industry strategy in collaboration with Quantum in relation to the development of a Big Data report on Older Australians.

Lewis currently serves as an official CEO mentor for the Australian Technology Competition and is appointed as a grants assessor for the Medtech and Pharma Growth Centre (MTPconnect). She is a strategic advisor to the Investment Community Visibility Organisation based in New York and is active in the social, impact and philanthropic investment community worldwide.

More specifically related to her role at Lifespot, the experience gained in Aged Care, Blockchain and Artificial Intelligence will be of great assistance as counsel to the Board and Management team.

### **Philippa Lewis said:**

"I am delighted to be joining the board of Lifespot Health. The Company is poised to grow its portfolio and expand its global applications via a platform of innovative technologies. The Board will have a keen focus on the management of the company including, its governance, risk and strategy with revenue uplift as a priority".

### **Mark Talbot, Director of Lifespot Health, said:**

"We are very fortunate to have secured this high calibre appointment. Philippa's expertise comes at an ideal time in the Company's evolution to help guide Lifespot's continued growth and development. Her experience in steering the commercialisation of digital healthcare solutions is exemplary and I am very excited to have her join our Company.

"The Board acknowledges Philippa's highly qualified skill set making her the right appointment for the role of Chairman. She has extensive experience in the Medtech industry with an additional focus on strong governance having led ASX companies which will be a great advantage as the Company looks to develop further in the global marketplace."

Lewis' appointment follows Tilo Brandis' resignation as Chairman, effective 31 August 2017. The Board also wishes to advise that Dr Philip Behkor will now sit on the Company's Advisory Board after resigning as Non-Executive Director, effective 31 August 2017.

All parties associated with Lifespot are extremely grateful to Tilo and Philip for their contribution and support during the period of transition of Lifespot listing on the ASX and wish them continued success in their future roles.

### **About Lifespot Health Ltd.**

Lifespot Health operates within the digital health sector and is focused on developing and commercialising medical diagnostic and monitoring technology, which includes the BodyTel system and the Lifespot Skin system. Lifespot Health Ltd was incorporated in 2016 and is based in Melbourne, Australia.

Lifespot's systems and applications aim to bring efficiencies in the medical system to clients and end users, saving time and money by providing real-time medical information and recommendations.

The widespread adoption of smartphones has equipped the world's increasingly aging society with the ability to self-cater for its medical needs by using modern telemedical systems. In providing treatment to patients wherever they are and whenever it is needed, telemedical systems have the capacity to decrease health care costs while still improving the quality of patient care.

Lifespot systems use modern software to combine enhanced sensor technology with self-learning algorithms, allowing patients to monitor chronic diseases and critical conditions with their smartphones.
