13 December 2010

NEXTDC to commence trading on ASX on 13 December 2010

The Directors of NEXTDC Limited (**ASX:NXT**) are pleased to announce that the Company has been admitted to the Official List of ASX Limited following a successful IPO capital raising of $40 million.

NEXTDC will commence trading under the ticker **"NXT"** at 11.00 am AEDT (10.00 am AEST) on Monday, 13 December 2010.

Mr Roger Clarke, Chairman of NEXTDC said the Board was delighted with the success of its recent IPO capital raising and excited about becoming Australia's first ASX-listed dedicated data centre provider.

"The Company is committed to establishing NEXTDC as a key market participant in the Australian and New Zealand data centre services market - by designing, developing and operating a network of secure, efficient and stable enterprise class data centres," he said.

"I would like to congratulate everyone involved in the IPO process including NEXTDC staff, its advisers including Moelis & Company, RBS Morgans, Clayton Utz and PricewaterhouseCoopers and, most importantly its institutional and retail shareholders."

Earlier this month NEXTDC also announced that it executed a heads of terms for 1,000m² of data centre space with Harbour MSP as its first and anchor client at its state-of-the-art Melbourne data centre facility.

The company is on track to achieve its planned 'online' date for its initial data centres in Brisbane (March 2011) and Melbourne (November 2011). It is also on track to announce a Sydney site by March 2011.

About NEXTDC

NEXTDC has been established in May 2010 by one of Australia's most successful information technology and internet entrepreneurs, Mr Bevan Slattery to build and operate carrier and systems integrator neutral data centres in Australia and New Zealand. The organisation is planning to offer a range of highly flexible, scalable, resilience, energy efficient and secure data centres and related services to corporate, government and wholesales customers.

NEXTDC's green facilities are being designed to address the markets growing appetite for energy efficient, neutral facilities in which organisations can host their critical IT infrastructure and to address emergence and growth of cloud (internet-based) computing.

As a Cloud enabler, NEXTDC's enterprise class data centre facilities address the challenges of security, connectivity and neutrality that have hindered the wider acceptance of Cloud.
