NEXTDC achieves ISO9001:2008 certification

NEXTDC Limited (ASX:NXT) ("NEXTDC" or "the Company") is pleased to announce that the Company has achieved the ISO9001:2008 quality management system certification.

The achievement recognises that NEXTDC operates a quality management system which complies with the requirements of ISO9001:2008 for the design, development and provision of secured data centre infrastructure and associated services. The certification is for the Company's Brisbane head office, and its three operational data centres - Brisbane (B1), Melbourne (M1) and Canberra (C1). The Company also intends to apply for certification of its Sydney (S1) and Perth (P1) data centres on their commencement of operations.

Commenting on the achievement, NEXTDC CEO Craig Scroggie said, "we welcome this certification as recognition of the Company's ongoing dedication to quality management system best practices. ISO9001:2008 certification will also assist NEXTDC's future efforts in meeting the high service standards required by many major customers in the Australian data centre market.

About NEXTDC

NEXTDC is an ASX 300 company and is the only independent data centre operator with a strategic footprint in all major growth markets in Australia.

NEXTDC offers a range of highly flexible, scalable, resilient and secure colocation services to corporate, government and IT services companies.

NEXTDC's purpose-built facilities have been designed to address the market's growing appetite for energy-efficient, independent data centres in which organisations can host their critical IT infrastructure, and also to address the emergence and growth of cloud (internet-based) computing.

As a cloud enabler, NEXTDC's enterprise-class data centre facilities address the challenges of security, connectivity and neutrality that have hindered the wider acceptance of cloud computing.
