Exploration commences at Bluebell Copper/Gold/Silver project

Australian-American Mining Corporation Limited ("AusAmerican" or "the company") is pleased to announce that exploration fieldwork has commenced on the Bluebell copper/gold/silver project in Arizona.

Highly experienced exploration geologists will be undertaking detailed geological and structural mapping. The mapping program will be complimented by surface geochemical sampling. The program will focus on delineating the geological formation which is known to host VMS mineralisation.

The results from this program will aid in the targeting of a drilling program, which is planned to be undertaken in Q1 2013.

Sincerely,

Richard Holmes
Managing Director
