Jingemia 2 Progress Report, Onshore Perth Basin, Western Australia

Origin Energy Resources Limited* advises that the appraisal well Jingemia 2 located in the onshore Perth Basin Exploration Permit 413 was at 0630 hours WST finalising wireline logging at a total measured depth of 2781metres.

Analysis of the Dongara Sandstone reservoir in the well has indicated it to be of poor reservoir quality and unsuitable for water injection likely due to thinning of the section from Jingemia 1. It has therefore been agreed to sidetrack the well to a revised bottom hole location to intersect improved reservoir quality.

Participants in EP 413 and Jingemia 2 are:

Origin Energy Developments Pty Limited* (Operator)	49.189%
Hardman Oil and Gas Pty Ltd	22.376%
AWE (Perth Basin) Pty Ltd	15.245%
Victoria Petroleum NL	5.000%
Voyager Energy Limited	6.270%
Norwest Energy NL	1.278%
Roc Oil (WA) Pty Limited	0.250%
ARC Energy NL	0.250%
John Kevin Geary	0.142%

*a wholly owned subsidiary of Origin Energy Limited
