## ASX Release

19 September 2003

### Jingemia 2 Weekly Progress Report, Onshore Perth Basin, Western Australia

Origin Energy Resources Limited\* advises that the appraisal well Jingemia 2 located in the onshore Perth Basin Exploration Permit 413 was plugged and sidetracked on 17 September 2003.

Jingemia 2 reached a total measured depth of 2781 metres on 9 September 2003. The Dongara Sandstone was intersected approximately 42 metres below the prognosed intersection and approximately 62 metres low to Jingemia 1. Evaluation of the Dongara Sandstone has indicated that the reservoir has thinned from Jingemia 1, is of poor quality and unsuitable for water injection. It has not been possible to determine if the oil shows recorded at the top of the Dongara Sandstone represent a residual saturation of oil or the base of a live oil column.

The Joint Venture agreed to abandon the Jingemia 2 well bore and sidetrack to a location approximately 400m north of the Jingemia 2 top Dongara Sandstone location. This sidetrack is designated Jingemia 3. Jingemia 3 is designed to intersect improved reservoir quality and provide a point for water injection to provide reservoir pressure support.

The sidetracked (Jingemia 3) was commenced on 17 September 2003. At 06:00 hours WST the sidetrack hole was drilling ahead at a measured depth of 1899 metres.

Participants in EP 413, Jingemia 2 and Jingemia 3 are:

Origin Energy Developments Pty Limited* (Operator)	49.189%
Hardman Oil and Gas Pty Ltd	22.376%
AWE (Perth Basin) Pty Ltd	15.245%
Victoria Petroleum NL	5.000%
Voyager Energy Limited	6.270%
Norwest Energy NL	1.278%
Roc Oil (WA) Pty Limited	0.250%
ARC Energy NL	0.250%
John Kevin Geary	0.142%

\*a wholly owned subsidiary of Origin Energy Limited
