Jingemia 3 Weekly Progress Report, Onshore Perth Basin, Western Australia

Origin Energy Resources Limited* advises that the appraisal well Jingemia 3 located in the onshore Perth Basin Exploration Permit 413 was at 0630 hours WST running 7 inch casing at a total measured depth of 2,625 metres.

Jingemia 3 intersected the primary objective Dongara Sandstone at a measured depth of 2,533.5 (2411mTVDSS) metres, 31 metres low to Jingemia 1 and 30 metres high to Jingemia 2. Analysis of the Dongara Sandstone reservoir in the well has confirmed it to be in pressure communication with Jingemia 1. The oil water contact in the well is estimated to be 2,414 metres subsea. This compares to an assumed oil water contact for the field of approximately 2,411 metres subsea prior to the drilling of Jingemia 2 and 3. Reservoir quality is interpreted to be suitable for water injection and the well will now be completed to provide pressure support.

Following completion of the well, other associated activities and obtaining necessary approvals, it is anticipated that a second Extended Production Test of the field will commence in October.

Once the drilling rig is released from Jingemia 3 it will move to Hovea 9 with drilling of this well expected to occur in mid October.

Participants in EP 413 and Jingemia 3 are:

Origin Energy Developments Pty Limited* (Operator)	49.189%
Hardman Oil and Gas Pty Ltd	22.376%
AWE (Perth Basin) Pty Ltd	15.245%
Voyager Energy Limited	6.270%
Victoria Petroleum NL	5.000%
Norwest Energy NL	1.278%
Roc Oil (WA) Pty Limited	0.250%
ARC Energy NL	0.250%
John Kevin Geary	0.142%

Participants in Hovea 9 are:

Origin Energy Developments Pty Limited* (Operator)	50.00%
ARC Energy NL	50.00%

*a wholly owned subsidiary of Origin Energy Limited
