AWE's Trefoil-1 drilling update

Australian Worldwide Exploration Limited, on behalf of its wholly owned subsidiary AWE Petroleum Pty Ltd ("AWE"), advises that at 0600 hours today, the Trefoil-1 well was drilling ahead at a measured depth of 2,171 metres. Progress for the week was 1,956 metres.

Trefoil-1 is an exploration well located approximately 37 kilometres west of the Yolla gas and condensate field. The primary objective of Trefoil-1 is a series of stacked reservoirs within the Eastern View Coal Measures. These reservoirs are gas-bearing in the Yolla gas and condensate field.

AWE will only contribute 10.1% of the costs of drilling Trefoil-1 because of the financial carry by Wandoo Petroleum Pty Ltd, which resulted from our previously announced farmout of equity.

Trefoil-1 is the third well in AWE's current exploration and development drilling programme in the offshore Bass Basin. On a "trouble free" basis, the well is expected to take approximately 30 days to reach its planned total depth of approximately 3,160 metres.

Participants in T/18 P are:

AWE Petroleum Pty Ltd ("AWE")	22.6%
Origin Energy Resources Limited (operator) ("Origin")	41.4%
CalEnergy Gas (Aust) Limited	23.5%
Wandoo Petroleum Pty Ltd ("Mitsui")	12.5%
