About Silver Star-1 Exploration Well

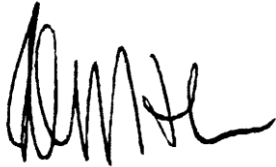

The Silver Star-1 well is a high impact exploration well and will target basin centred gas in the Permian sandstones.

The properties of the reservoir have successfully met certain criteria and a lateral section of 1,180 metres has been drilled. 5½" production casing is now being set. Fracture stimulation and testing of the well will then follow.

Planet Gas' 12.5% interest is free carried by joint venture partners Senex Energy Limited and Origin Energy Limited.

For further information, contact Peter Nightingale on +61 2 9300 3322.

Yours sincerely
