OVERVIEW www.pacifiedge.co.nz www.pacifiedgedx.com

Pacific Edge Limited (NZX: PEB) is a New Zealand publicly listed, cancer diagnostic company specialising in the discovery and commercialisation of diagnostic and prognostic tests for better detection and management of cancer. Its non-invasive, simple to use and accurate Cxbladder tests enable the detection of bladder and other urinary tract cancers from a small volume of a patients' urine. Cxbladder provides actionable results and better detection and management of urothelial cancer. The company is developing and commercialising its range of Cxbladder tests globally and has two wholly owned accredited laboratories in New Zealand and the USA. The company's products have been tested and validated in multiple international clinical studies.

ABOUT Cxbladder Triage

Cxbladder Triage accurately identifies patients with haematuria who have a low probability of bladder cancer and may not require a more extensive urological evaluation. Cxbladder Triage is a tool for use by clinicians and physicians in primary evaluation of patients with haematuria and is intended to reduce the need for an expensive and invasive work-up in patients who have a low probability of having urothelial cancer.

ABOUT Cxbladder Detect

Cxbladder Detect provides clinicians with a quick, cost effective and accurate measure of the presence of the cancer as an effective adjunct to cystoscopy. Is often used in conjunction with Cxbladder Triage to provide greater rule-out and resolution of patients who have UC.

ABOUT Cxbladder Monitor

Cxbladder Monitor allows urologists to monitor bladder cancer patients for recurrence of the disease. Bladder cancer has a recurrence rate of 50-80% and requires life-long surveillance. Cxbladder Monitor accurately identifies patients with a prior history of urothelial cancer whose Cxbladder Monitor score shows that they have a low probability of recurrent urothelial cancer. Cxbladder Monitor is designed to be used as the preferred adjunct test to cystoscopy in the management of patients for ongoing evaluation of recurrent bladder cancer.

ABOUT Cxbladder Resolve

Cxbladder Resolve identifies those patients who are likely to have aggressive or more advanced bladder cancer. Cxbladder Resolve, when used as part of the primary evaluation of haematuria and/or in conjunction with other Cxbladder tests (Triage, Detect), is designed to assist clinicians by accurately identifying patients with a high probability of having high grade or late stage bladder cancer, for whom alternative or expedited treatment options may be warranted, or who can be prioritised for further investigation in high throughput settings.

Refer to www.cxbladder.com for more information.
