PINNACLES NICKEL PROJECT

23 April 2003

The Pinnacles Project is located 130 kilometres east-northeast of Kalgoorlie and covers approximately 15 strike kilometres of Archaean Komatiitic volcanic rocks.

The Company advises that a regional airborne transient electromagnetic (TEM) survey is scheduled to be undertaken in the first week of May 2003 covering the entire ultramafic contact under tenure.

The results and targeting interpretation should be available within 3 weeks of the completion of the survey. It is proposed to drill test the highest order targets in the coming months.

Yours faithfully
KANOWNA LIGHTS LIMITED

CHRIS BATH
Company Secretary
