

A man with a beard, wearing a yellow shirt and a lanyard with 'DISCOVER' written on it, is looking closely at a rock sample held in his hand. The sample is part of a collection in a green plastic tray. Other samples in the tray are marked with handwritten numbers like '350', '349', and '348'. The background is a solid orange color.

PACGOLD

Unlocking an Entire Gold Corridor Alice River Gold Project

Blue Ocean Equities - NSW and QLD Precious and Base Metals Mining Conference - 5 February 2024

ASX : PGO

Cautionary statement

Disclaimer & Competent Persons statement

PURPOSE OF THIS DOCUMENT

This presentation has been prepared by Pacgold Limited ("PGO") for general information purposes only using the information available to PGO at the time of publication. This presentation does not purport to be all-inclusive or to contain all the information that you or any other party may require to evaluate the prospects of PGO.

NO RELIANCE

The information contained in this presentation is not investment, tax, accounting, legal or financial product advice and is not intended to be used as the basis for making any investment decision. The presentation has been prepared without taking into account the investment objectives, financial situation or particular needs of any particular person. To the fullest extent permitted by law, PGO, its related bodies corporate and their representatives expressly disclaim liability for any loss or damage arising in respect of your reliance on the information contained in this presentation (including your reliance on the accuracy, completeness or reliability of that information), or any errors in or omissions from this presentation, including any liability arising from negligence.

EXCLUSION OF REPRESENTATIONS OR WARRANTIES

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of PGO's directors, employees or agents, nor any other person accepts any liability, including, without limitation, any liability arising out of fault or negligence, for any loss arising from the use of the information contained in this presentation. In particular, no representation or warranty, express or implied is given as to the accuracy, completeness or correctness, likelihood of achievement or reasonableness of any forecasts, prospects or returns contained in this presentation nor is any obligation assumed to update such information. Such forecasts, prospects or returns are by their nature subject to significant uncertainties and contingencies. Before making any investment decision, you should consider whether an investment is appropriate in light of your particular investment needs, objectives and financial circumstances. Past performance is no guarantee of future performance. You should seek professional advice from your accountant, financial adviser, stock broker, lawyer or other professional adviser before making any investment decision.

FORWARD LOOKING INFORMATION

Certain statements in this presentation constitute "forward looking information" that is based on expectations, estimates and projections as of the date of this presentation. This forward-looking information includes, among other things, statements with respect to PGO's business strategy, plan, development, objectives, performance, outlook, growth, cash flow, projections, targets and expectations, and exploration results. Generally, this forward-looking information can be identified by the use of forward-looking terminology such as 'outlook', 'anticipate', 'project', 'target', 'likely', 'believe', 'estimate', 'expect', 'intend', 'may', 'would', 'could', 'should', 'scheduled', 'will', 'plan', 'forecast', 'evolve' and similar expressions. These statements are subject to risks and uncertainties. The forward looking information should not be relied upon as representing the view of PGO after the date of this presentation. PGO has attempted to identify important factors that could cause actual actions, events or results to differ materially from those current expectations described in the forward looking information. There can be no assurance that the forward looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, the reader should not place undue reliance on the forward looking information. PGO disclaims any intent or obligations to or revise any forward-looking statements whether as a result of new information, estimates, or options, future events or results or otherwise, unless required to do so by law.

EVENTS AFTER THE DATE OF THIS DOCUMENT

Statements in this presentation are made only as of the date of this presentation unless otherwise stated and the information in this presentation remains subject to change without notice. PGO is not responsible for updating nor undertakes to update this presentation.

This presentation has been authorised for release to the ASX by the Managing Director.

COMPETENT PERSONS STATEMENT

The information in this document that relates to Exploration Results is based on, and fairly represents, information compiled or reviewed by Mr Geoff Lowe, who is a Member of The Australian Institute of Mining and Metallurgy. Mr Lowe is PGO's Exploration Manager and holds shares and options in PGO.

Mr Lowe has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'.

Mr Lowe consents to the inclusion in the public report of the matters based on his information in the form and context in which it applies.

Alice River Project - Unlocking an Entire Gold Corridor

PACGOLD LIMITED (ASX:PGO)

● Strong momentum continues with multiple high-grade gold discoveries

● Central Target

- F1a zone - **24m @ 8.0g/t Au** and **14.9m @ 10.3g/t Au**
- F1a zone - **open along strike >1km and beyond 500m depth**
- F1a northern extension – **1m @ 61.2g/t Au** (*first hole*)
- F1-2 zone – **1m @ 41.1g/t Au** (*first hole*)

● Southern Target

- Initial step-out drilling – **1m @ 89.1g/t Au**
- Shallow historical drilling – **8m @ 55.9g/t Au**

● Capitalising on discovery driven growth opportunities defined on a district scale

- 30km long structure confirmed with a pipeline of high-grade targets being defined and systematically drilled
- Successful exploration strategy combined with cutting edge geophysics accelerating district-scale advances

● Well-funded to continue to unlock an entire gold corridor and build gold resources

Corporate Overview (ASX : PGO)

Well-funded, tight register and strong institutional backing

Shareholders

Key facts

- Only 84.1M shares on issue
- Strong cash position and institutional support:

District-scale Opportunity

First-mover advantage

- Previous mining (1990s) recovered 30,000oz @ 5.6g/t Au
- Limited exploration in past 30 years
- Pacgold's regional IP Geophysics - gamechanger
- Demonstrated 30km gold belt - dominantly sand-covered

IP Resistivity Geophysics

Success targeting resistivity lows (blue-purple) defining mineralised fault zone – First detailed IP survey

Central Target

Excellent high-grade gold continuity extending to 520m below surface

- F1a Zone - High-Grade Discovery**

- 17m @ 9.3g/t Au from 192m
- 24m @ 8.0g/t Au from 168m
- 14.9m @ 10.3g/t Au from 241m
- Open along strike >1km and beyond 500m depth

- F1-2 Zone – Potential Repetition**

- Bonanza grade in first hole
- 1m @ 41.1g/t Au from 71m

Central Target

Gold mineralisation open along strike and at depth – Massive Gold System

- Interpreted top of a 'High-level' Intrusion Related Gold System (IRGS)
- Wide Spaced Drilling - nominally >80m centres
- Internal high-grade 'shoots' with visible gold

Southern Target

Next big gold system along strike from Central Target

Remarkably no exploration in last 30 years:

- 8m @ 55.9g/t Au from 18m (*historical drilling*)
- 4m @ 22.7g/t Au from 32m (*historical drilling*)

Pacgold IP geophysics and step-out drilling defining multi-lode gold system with >3.8km potential

- 1m @ 89.1g/t Au from 84m
- High priority IP geophysics targets defined along strike concealed by shallow sand cover

Drilling on SE Extension completed – results awaited

Southern and Central Targets – Long Section

Massive gold mineralised structure

Regional Targets – Posie Prospect

High priority underexplored gold system

- Shallow mining (1.5m deep) of high-grade gravel colluvium completed from 5 pits over 1.4km in 1997
- No exploration completed since mining 25 years ago
- **Pacgold** IP geophysics and high-grade rock chip results define **NNW-trending structural zone over 2km**
- Drilling completed, results pending

Experienced Board & Management

Discovery | Project Financing | Mine Development

Cathy Moises Non-Executive Chair

Geologist with over 30 years' resource finance experience, including senior roles for several of the most prominent stockbroking firms in Australia. Director of ASX-listed companies (ASX: ARU, APC, WAK and POD).

Michael Pitt Non-Executive Director

Co-founder of New Century Resources, playing an instrumental role in the restart of the Century zinc mine. Strong background in chemical engineering, project financing and management, and business development.

Shane Goodwin Non-Executive Director

Extensive experience in mining corporate affairs and external relations for New Century Resources, MMG and Barrick Gold. Currently a Director of the Aboriginal Development Benefits Trust (Gulf of Carpentaria).

Tony Schreck Managing Director

Geologist with over 35 years' precious and base metal exploration, business development and discovery experience (Australia and overseas) combined with extensive ASX-listed corporate management. Graduate of the Australian Institute of Company Directors.

Geoff Lowe Exploration Manager

Geologist with over 35 years of precious and base metal exploration, business development, project management and mining services experience in Australia and internationally.

Suzanne Yeates CFO & Company Secretary

Chartered accountant with over 20 years' experience as Chief Financial Officer and Company Secretary for many private and ASX-listed companies including ASX: NVX, CML, GAS, IHR and CTD.

Creating wealth through sustainable innovative exploration and development of under-explored gold assets in Australia

www.pacgold.com.au

ASX: PGO

Unlocking an entire gold corridor

Applying modern exploration to an overlooked opportunity

- First mover advantage – First to apply our successful exploration targeting strategy
- Results expected soon for 3,000m drill programme (RC and bedrock)
 - Southern Target extension (IP targets under cover)
 - Southern Target step-out drilling
 - Posie
 - Initial drilling on priority targets along 30km long corridor

● Exceptional gold growth opportunity on a district scale

The logo for PACGOLD, with 'PAC' in white and 'GOLD' in yellow, set against a background of a mining site at sunset.

Appendices

Regional Targets – Posie Prospect

High priority underexplored gold system

- Posie discovered in the late 1980s with trenching defining a surface layer of gold-bearing quartz gravel (colluvium) up to 1.5m thick
- Trenching defined five zones of colluvial Au which were mined in 1997; approximately 3000oz of gold recovered
- Gold results (colluvium now mined) from trenching include:
 - 44m @ 7.7g/t Au
 - 34m @ 3.8g/t Au incl. 6m @ 17.1g/t Au
 - 170m @ 1.4g/t Au incl. 90m @ 2.0g/t Au and 22m @ 3.3g/t Au
- Limited drilling completed prior to mining intersected quartz veining below the colluvium - gold results including:
 - 2m @ 26.1g/t Au from 46m (PDH02A)
 - 4m @ 11.5g/t Au from 23m (POD01)
 - 4m @ 4.7g/t Au from 42m (PDH04)
- No exploration undertaken at Posie from 1997 to 2022

IP Resistivity Geophysics

Success targeting resistivity lows (blue-purple) defining mineralised fault zone – First detailed IP survey

Donlin Exploration Model – Intrusion-related gold

Success applying the Donlin model to the Alice River Gold Project

Drill core Alice River Gold Project

1. Early-stage – ‘dark grey’ quartz (As – Sb – low-grade Au)

2. Late-stage – ‘white’ quartz (high-grade, visible Au)

Donlin Gold Model (Tier 1 deposit in Alaska)

~1km below surface at time of deposit formation (paleodepth)

~2km

District-scale Opportunity – regional long section

Large-scale structures completely overlooked by modern exploration with limited drilling

Project Pipeline – regional structures

Excellent regional prospectivity – district-scale opportunity

First-mover advantage

- Pacgold first to apply new geophysics methods to an entire, previously underexplored corridor

Excellent historical scout drill results

- Multiple gold mineralised regional structures now identified over 30km
