Joint Announcement to ASX

Cliff Head Joint Venture

Effectively held by the following group entities:

ASX: TEG Triangle Energy (Global) Limited - 78.75%

ASX: PGY Pilot Energy Limited - 21.25%

CLIFF HEAD OIL EXPORT CONTINUES

Second oil delivery to refinery

- **Tanker returns from Thailand refinery having delivered 52,900 barrels of oil**
- **Additional 25,500 barrels loaded onto tanker at Geraldton**

The Cliff Head Joint Venture (**CHJV**) is pleased to advise that the AB Paloma tanker unloaded 52,900 barrels of oil at a refinery in Thailand early December for which the CHJV will be paid early February 2023.

Following the delivery of oil, the tanker has returned to Geraldton and has completed the fifth load-out of oil from its onshore Arrowsmith Stabilisation Plant (**ASP**) facility to the AB Paloma at the Port of Geraldton.

The CHJV trucked approximately 25,500 barrels of oil from ASP to the Port of Geraldton between the 17th and the 20th December, in a 24 hour per day operation and loaded it onto the tanker AB Paloma. The tanker will now anchor off Geraldton awaiting a second loading in approximately 5-6 weeks.

Oil production from the Cliff Head oil field, operated by the CHJV in the Perth Basin is now firmly demonstrated to have a viable export route for both the Cliff Head Oil Field and other Perth Basin producers, enabling continuation of valuable production from the Perth Basin.

Triangle Energy Managing Director, Mr Conrad Todd said: *“This second delivery of Cliff Head oil demonstrates the successful ongoing progress and management of the Cliff Head Joint Venture. The second delivery of oil to a refinery in Thailand clearly confirms the viability of the truck to tanker export route. This export route is now progressing with the fifth tanker loading of crude oil complete which ensures that we will continue exporting and selling the oil produced from the Cliff Head Oil Field for the foreseeable future as we progress plans on the future utilisation of the Cliff Head facilities.”*

Triangle Energy (Global) Limited and Pilot Energy Limited are currently working cooperatively to maximise production and income from the Cliff Head oil field whilst finalising working arrangements and JV alignment regarding the future development plans for Cliff Head, which are focussing on the development of a Carbon Capture and Storage (**CCS**) operation to provide carbon management services to third parties. This is expected to significantly extend the working life of the CHJV infrastructure and facilities.
