About Patagonia Lithium Ltd

Patagonia Lithium has two major lithium brine projects – Formentera/Cilon in Salar de Jama, Jujuy province and Tomas III at Incahuasi Salar in Salta Province of northern Argentina in the declared lithium triangle. It has also applied **for 41,746 Ha**s of concessions exploring for **ionic REE clays, Niobium, and lithium in pegmatites**. The Company has applied for four exploration concession packages. Three have been granted to date one in Mato Grosso state and two in the Goais state adjacent to the Catalão rare earth complex.

Since listing on 31 March 2023, surface sampling and MT geophysics have been completed, drill holes JAM24-01 and JAM24-02 have been completed. Fractional Entitlements to Attaching Options under the Top-Up Offer will be rounded up to the nearest whole number.

The Entitlement Offer has been supplemented by the Convertible Note Issue that was announced to the market on 9 July 2024, which is intended to raise up to approximately \$400,000 (before expenses), at an issue price of \$0.09 per New Share, being the same issue price as the New Shares offered pursuant to the Entitlement Offer.

The Public Shortfall Offer, which is a separate offer to the Entitlement Offer and Top-Up Offer, is made under this Prospectus and will remain open for up to three months from the Closing Date. The New Shares and Attaching Options issued in accordance with the Public Shortfall Offer will rank equally with the New Shares and Attaching Options issued pursuant to the Entitlement Offer and Top-Up Offer.

The Directors reserve the right to pay a commission of up to 6% (exclusive of GST) of any amounts subscribed under the Public Shortfall Offer through any licensed securities dealers or Australian financial services licensee holders in respect of any Applications lodged and accepted by the Company.

4.5 Purpose of the Entitlement Offer

The purpose of the Entitlement Offer is to raise up to approximately \$1.75 million (before expenses).

4.6 Key Risks

There are various risk factors associated with an investment in the New Shares, Options and the Company. Some, but not all, of these risks are summarised in section 8 of this Prospectus. In addition, if the Company acquires any new project, it may need to raise further capital to fund the acquisition or exploration at the project once acquired.

For the foreseeable future, it is expected that this funding will be obtained from equity financing. Any equity financing undertaken will dilute existing Shareholders. There is

no guarantee that the Company will be able to secure any additional funding or will be able to secure funding on terms that are favourable or acceptable to the Company.

See section 8.2(a) for more information.

(b) Outstanding approvals of the Cilon Project

Approvals for the grant of drilling permits remain outstanding from local government authorities in the Jujuy Province of Argentina, where the Cilon Project is entirely based. The Company has been engaging with the Mining Directorate of the Jujuy Province to obtain the only outstanding required drilling permit approvals for its Cilon Project.

See section 8.2(b) for more information.

(c) Sovereign

The business of holding interests in Projects that are located outside of Australia, by its nature, involves significant risks. Sovereign risks associated with operating in Argentina, and investors should understand that no assurance can be given regarding future stability in this jurisdiction or any other country in which the Company may, in the future, have an interest.

If all Attaching Options are exercised, the Company will also receive a further \$1,901,626 on the exercise of the Attaching Options.

4.9 Dilution of Eligible Shareholders that do not accept their Entitlement

As the Entitlement Offer is an offer of one New Share for every three Shares held by Eligible Shareholders, the maximum dilution that will be experienced by any Eligible Shareholder that fails to subscribe for any Entitlement is approximately 25% of its existing Shareholding.

Eligible Shareholders should note that if they do not accept their Entitlements in full, their Shareholdings are likely to be diluted as follows:

Example Shareholder	Total Share Holding as at the date of this Prospectus	% as at the date of this Prospectus	Entitlement	Holding if Entitlement not taken up	% following allotment of New Shares
Shareholder 1	1,000,000	1.71%	333,333	1,000,000	1.21%
Shareholder 2	2,500,000	4.27%	833,333	2,500,000	3.03%
Shareholder 3	5,000,000	8.54%	1,666,667	5,000,000	6.06%
Shareholder 4	10,000,000	17.08%	3,333,333	10,000,000	12.12%

4.10 Effect on relevant interest of substantial security holders

As at 12 July 2024, the following persons were believed to have a relevant interest of 5% or more of the Company's Shares:

Substantial Holder	Shares	% ¹
10 Bolivianos Pty Ltd, Freedom Trader Pty Ltd and Niv Dagan (together, the Bolivianos Investors)	12,880,541	21.99
Fuyang Mingjin New Energy Development Co Ltd (Fuyang)	10,000,000	17.08
Southeast Mingqing Supply Chain (Fuyang) Co Ltd (Southeast)	3,750,000	6.40
TOTAL	26,630,541	45.47

Southeast has committed to subscribe for its full entitlement under the Entitlement Offer and to subscribe for an additional \$1,500,000 under the Top-Up Offer. However, that commitment is subject to Chinese Overseas Direct Investment Approval and, as such, there is a risk that this approval may not be obtained, or may not be obtained in time, in order to participate in the Entitlement Offer and the Top-Up Offer.

As at the date of this Prospectus, the Company has not received any commitment from any of the above persons as to whether it intends to subscribe for its Entitlement under the Entitlement Offer or participate in the Top-Up Offer except as set out above.

If the Entitlement Offer is fully subscribed and each of the above Shareholders subscribe for their full Entitlement, there will be no change to their relevant interests in the Company's Shares.

If the Entitlement Offer is not fully subscribed, the above parties may increase their relevant interest in the Company's Shares.

The extent to which each of the above may increase their respective relevant interest in the Company's Shares is dependent upon the extent of applications received under the Top-Up Offer by both those and other Shareholders.

4.11 Effect of Entitlement Offer on Control

As the Entitlement Offer, Top-Up Offer and the Public Shortfall Offer do not satisfy the requirements of exception 10 of section 611 of the Corporations Act, no person, including the major Shareholders, shall be entitled to acquire New Shares or Attaching Options pursuant to the Entitlement Offer or the Top-Up Offer if to do so would result in their, or another person's, Voting Power increasing from 20% or below to more than 20%, or from a starting point above 20% to below 90%, unless a separate exception to the restrictions contained in section 606 of the Corporations Act applies. The only two such exceptions that may apply are:

- (a) exception 9 of section 611 of the Corporations Act (i.e. the "3% creep" exception); and
- (b) exception 13 of section 611 of the Corporations Act (i.e. the "underwriter" exception).

¹ Based on 58,565,000 total Shares on issue and the substantial holder notices lodged.

As noted above, Southeast has agreed to subscribe for its entitlement and an additional \$1,500,000 under the Top-Up Offer. However, that commitment is subject to Chinese Overseas Direct Investment Approval and, as such, it is highly likely that this approval will not be obtained in time to participate in the Entitlement Offer and Top-Up Offer and, therefore, no reliance should be placed on this commitment.

Accordingly, this is not an 'underwriting' and Southeast will be limited to acquiring Voting Power of not more than 20% under the Top-Up Offer.

The table below sets out the number of Shares and voting power that Southeast may have after the completion of the Entitlement Offer and Top-Up Offer under several scenarios:

Shortfall	Shares held	Voting Power
0% acceptance of all Entitlements under Entitlement Offer (excluding Southeast)	13,703,700	20%
25% acceptance of all Entitlements under Entitlement Offer (excluding Southeast)	14,845,700	20%
50% acceptance of all Entitlements under Entitlement Offer (excluding Southeast)	12,885,833	16.77%
75% acceptance of all Entitlements under Entitlement Offer (excluding Southeast)	8,317,917	10.83%
100% acceptance of all Entitlements under Entitlement Offer	5,000,000	6.40%

Given the current Voting Power of each of the three largest Shareholders, and the expected participation of those Shareholders, the Entitlement Offer and Top-Up Offer are not expected to have any potential effect on the control of the Company.

4.12 Expenses of the Entitlement Offer

The total expenses of the Entitlement Offer, Top-Up Offer and Public Shortfall Offer are estimated to be approximately \$61,122 (excluding GST), which are expected to be applied towards the items set out in the table below:

Expense	Amount (\$)
ASIC fees	\$3,206
ASX fees	\$12,916
Legal fees	\$20,000
Printing, registry and distribution	\$25,000
TOTAL	\$61,122

4.14 Broker Option Offer

The Company has agreed to offer Options to the Lead Manager, Copeak Pty Ltd ACN 607 161 900 (or its nominees), for capital raising services provided to the Company.

This Prospectus includes a separate Broker Option Offer of 694,445 Options exercisable at \$0.15 each and exercisable prior to 5:00pm (Sydney time) on 31 August 2025 on the terms set out in Section 7. No application monies are payable pursuant to the Broker Option Offer.

Only the Lead Manager (or its nominees) may accept the Broker Option Offer. The relevant Application Form will be issued to the Lead Manager (or its nominees) together with a copy of this Prospectus.

4.15 Overseas shareholders

The offer of New Shares and Options pursuant to this Prospectus does not, and is not intended to, constitute an offer or invitation in any place or jurisdiction in which, or to any person to whom, it would be unlawful to make such an offer or to issue this Prospectus.

It is not reasonable for the Company to comply with the securities laws of all overseas jurisdictions in which Shareholders are resident having regard to the number of overseas Shareholders and the number and value of Shares these Shareholders would be offered and the cost of complying with the regulatory requirements in each relevant jurisdiction.

The Entitlement Offer and Top-Up Offer is not being extended to Shareholders that are recorded in the Company's share register as having an address that is outside Australia, New Zealand or the PRC.

Where the Convertible Note Option Offer, Broker Option Offer or Public Shortfall Offer is extended to non-Shareholders, it will only be extended to persons who are Australian residents and other persons to whom the Board is satisfied, in its sole discretion, that it would not be unlawful to offer Attaching Options to, with or without any such conditions as the Board sees fit (in its sole discretion), based on the local laws of the country in which an applicant may reside.

New Zealand

This Prospectus is prepared under Australian law and is not a product disclosure statement prepared under New Zealand law. New Zealand law normally requires people who offer financial products to give information to investors before they invest. This requires those offering financial products to have disclosed information that is important for investors to make an informed decision.

No New Zealand product disclosure statement is being prepared and the offer of New Shares and Attaching Options is being extended to Eligible Shareholders that were recorded in the Company's share register as having an address in New Zealand in reliance on the *Financial Markets Conduct (Incidental Offers) Exemption Notice 2021* (New Zealand).

As a result, Eligible Shareholders that were recorded in the Company's share register as having an address in New Zealand may not be given all the information usually required under New Zealand law and will also have fewer other legal protections for this investment. The taxation treatment of Australian financial products is not the same as for New Zealand financial products.

If you are uncertain about whether this investment is appropriate for you, you should seek the advice of an appropriately qualified financial adviser. The Entitlement Offer may involve a

currency exchange risk. The currency for the financial products is not New Zealand dollars. The value of the financial products will go up or down according to changes in the exchange rate between that currency and New Zealand dollars. These changes may be significant.

Any amounts paid on the financial products will be in Australian dollars and not New Zealand dollars. You may incur significant fees in having any such Australian dollar funds credited to a bank account in New Zealand in New Zealand dollars.

If the financial products are able to be traded on a financial product market and you wish to trade the financial products through that market, you will have to make arrangements for a participant in that market to sell the financial products on your behalf. The financial products are not currently traded on any financial product market in New Zealand. The way in which any financial product trading market operates, the regulation of participants in that market, and the information available to you about the financial products and trading may differ from the financial product trading markets that operate in New Zealand.

Eligible Shareholders that are resident in Australia or New Zealand that hold Shares on behalf of persons who are resident in jurisdictions other than Australia and New Zealand are responsible for ensuring that taking up any Entitlement pursuant to the Entitlement Offer does not breach regulations in the relevant overseas jurisdiction. The return of a duly completed Application will be taken by the Company to constitute a representation that there has been no breach of those regulations.

People's Republic of China

This Prospectus has not been approved by, nor registered with, any competent regulations authority of the PRC (excluding for the purposes of this paragraph, Hong Kong Special Administration Region, Macau Special Administration Region and Taiwan). Accordingly, the New Shares and Attaching Options may not be offered or sold, nor may any invitation, advertisement or solicitation for the New Shares and Attaching Options be made from within the PRC. This Prospectus does not constitute an offer of securities within the PRC.

The New Shares and Attaching Options may not be offered to legal or natural persons in the PRC other than to:

- (a) "qualified domestic institutional investor" as approved by the relevant PRC regulatory authorities to invest in overseas capital markets;
- (b) sovereign wealth fund or quasi-government investment fund that has the authorisation to make overseas investment; or
- (c) other type of qualified investor that has obtained all necessary PRC governmental approvals, registrations and/or filings (whether statutory or otherwise).

Furthermore, the offer of Options pursuant to the Convertible Note Option Offer, Broker Option Offer and Public Shortfall Offer is only being extended to persons who are Australian residents and other persons to whom the Board (in consultation with the Lead Manager) is satisfied, in its sole discretion, that it would not be unlawful (with or without such conditions as the Board sees fit) based on the local laws of the country in which an Applicant may reside to offer Options.

4.16 Lead Manager Engagement

The Company and the Lead Manager are party to a letter of engagement pursuant to which the Lead Manager has agreed to lead manage the Capital Raising (**Mandate**).

The Company must pay the Lead Manager a Top-Up Offer Fee of 6% cash fee (plus GST if applicable) on the gross proceeds raised under the Top-Up Offer.

In addition to the above cash fee, upon a successful placement and Top-Up Offer, subject to a minimum of \$400,000 raised, the Company must issue to the Lead Manager (or its nominees) 694,445 Broker Options, with an exercise price of \$0.15 and exercisable prior to 5:00pm (Sydney time) on 31 August 2025. Further details regarding the rights and liabilities attaching to the Broker Options are contained in section 7 of this Prospectus.

Subject to certain exclusions relating to fraud, wilful misconduct or negligence, the Company indemnifies the Lead Manager against certain liabilities and losses incurred or sustained in connection with the services provided by the Lead Manager.

The Mandate is for an initial term from 27 June 2024 to 24 December 2024 and may be extended by the Company.

The Mandate contains various indemnities and undertakings in favour of the Lead Manager that are usual for an arrangement of this sort. In particular, the Mandate contains provisions relating to the disclosure of information to the Lead Manager.

5. **Acceptance of Entitlement Offer, Top-Up Offer and Public Shortfall Offer**

5.1 **Acceptance of Entitlement Offer**

Your acceptance of the Entitlement Offer must be made in accordance with the instructions contained in your personalised Application Form accompanying this Prospectus. Your acceptance must not exceed your Entitlement as shown on that form. If it does, your acceptance will be deemed to be for your maximum Entitlement.

You may participate in the Entitlement Offer as follows:

- (a) if you wish to accept your full Entitlement, you must either
 - (1) pay your application monies via BPAY® in accordance with the instructions, and for the amount indicated, on the Application Form. Please refer to section 5.4 for further information regarding payment via BPAY®; or
 - (2) if you are unable to pay via BPAY® (for example, because you are a New Zealand shareholder who does not have an Australian bank account) you can make a payment by Electronic Funds Transfer (**EFT**). To do this, you must use the unique EFT Reference Number shown on your Personalised Application Form. **If you make your payment via BPAY or EFT you do not need to return your Application Form,**

in each case, by no later than 5.00pm (Sydney time) on the Closing Date;

- (b) if you only wish to accept part of your Entitlement, you must either:
 - (1) pay the appropriate application monies for the relevant part via BPAY® or EFT in accordance with the instructions on Application Form. Please refer to section 5.4 for further information regarding payment via BPAY® and EFT; or
 - (2) if you are unable to pay via BPAY® (for example, because you are a New Zealand Shareholder who does not have an Australian bank account), you can make a payment by Electronic Funds Transfer (EFT). To do this, you must use the unique EFT Reference Number shown on your Personalised Application Form. **If you make your payment via BPAY or EFT you do not need to return your Application Form,**

in each case, by no later than 5.00pm (Sydney time) on the Closing Date; or

- (c) if you do not wish to accept any part of your Entitlement, you are not obliged to do anything.

Eligible Shareholders who do not take up their Entitlement in full will not receive any payment or value for any part of their Entitlement that they do not take up and their Shareholding in the Company will be diluted.

The Directors retain the discretion to refuse to accept applications for New Shares (in whole or in part) where the effect of issuing New Shares to the Applicant will result in the Applicant's, or another person's, Voting Power in the Company increasing from 20% or below to more than 20%, or from a starting point above 20% to below 90%.

5.2 Application for Top-Up Shares

If you wish to apply for Top-Up Shares in excess of your Entitlement under the Top-Up Offer, you may do so in accordance with the instructions referred to in the Application Form. Please read the instructions carefully. Any Top-Up Shares applied for in excess of your Entitlement will be issued from the excess of any New Shares not applied for in accordance with the Entitlement Offer (if any) and there is no guarantee that you will receive all, or any, of the amount of the Top-Up Shares applied for pursuant to the Top-Up Offer.

Application monies received by the Company in excess of the amount in respect of your Entitlement will be treated as an application to apply for as many New Shares as that excess amount will pay for, in full, at the issue price of \$0.09 per New Share (up to the maximum number of New Shares available as per the discretion in 5.1 above).

For payment methods, please refer to section 5.6.

5.3 Allocation of Top-Up Shares

Subject to the Directors retaining discretion to refuse to accept applications (in whole or in part) for Top-Up Shares under the Top-Up Offer where the effect of issuing Top-Up Shares to the Applicant will result in the Company breaching the ASX Listing Rules or the Applicant's, or another person's, Voting Power in the Company increasing from 20% or below to more than 20%, or from a starting point above 20% to below 90%, applicants under the Top-Up Offer will be allocated the lesser of:

- (a) the number of Top-Up Shares applied for by the Applicant; and
- (a) if the number of Top-Up Shares available for subscription is less than the aggregate number of Top-Up Shares applied for by all unsatisfied Applicants, the number of Top-Up Shares applied for, scaled on a pro rata basis according to all unsatisfied Applicants' respective Shareholdings in the Company as at the Closing Date for the Entitlement Offer.

If, following the allocation process referred to in paragraphs (a) and (b) immediately above, there are any remaining Top-Up Shares and Top-Up Options, that allocation process will be repeated continuously until all applications for Top-Up Shares have been satisfied in full or there are no further Top-Up Shares.

The Directors intend to place the shortfall of any Shares not subscribed for pursuant to the Entitlement Offer or Top-Up Offer, within three months following the Closing Date, and to carry out additional capital raising activities if necessary.

5.4 Application for Attaching Options under Convertible Note Option Offer

Participants in the Convertible Note Issue can apply for Attaching Options on the basis of one (1) Attaching Options for every two (2) New Shares issued pursuant to the exercise of Convertible Notes, in accordance with the Application Form accompanying a copy of this Prospectus and the instructions provided to them by the Company and/or Lead Manager.

5.5 Application and allocation of Public Shortfall Offer

Following completion of the process set out in section 5.3, the Directors reserve the right to offer and place the shortfall of any New Shares or Attaching Options not subscribed for pursuant to the Entitlement Offer or Top-Up Offer, at their discretion, together with one (1) Attaching Option for every two (2) New Shares placed (for no additional consideration), at any time within three months of the Closing Date, which New Shares will, in no circumstances, be issued at an issue price of less than \$0.09.

Applicants may apply for New Shares and Attaching Options pursuant to the Public Shortfall Offer by completing an Application Form accompanying a copy of this Prospectus and following the instructions contained in the Application Form and otherwise given to them by the Company.

New Shares and Attaching Options issued pursuant to the Public Shortfall Offer will be issued on a progressive basis. Where the number of New Shares and Attaching Options issued is less than the number applied for, or where no issue is made, surplus application money will be refunded, without any interest, to the Applicant as soon as practicable.

The Directors retain absolute discretion as to who may receive New Shares and Attaching Options pursuant to the Public Shortfall Offer and/ or to proceed with the Public Shortfall Offer at all. Accordingly, there is no guarantee that an Applicant under the Public Shortfall Offer will receive all or any New Shares applied for pursuant to an Application lodged in accordance with the Public Shortfall Offer.

Applicants under the Public Shortfall Offer may only pay the relevant application money by cheque, electronic funds transfer or bank draft and cannot do so via BPAY.

5.6 Payment Methods

Eligible Shareholders may make payment of your application monies in the following ways:

- (a) by BPAY® and EFT; or
- (b) if you are unable to pay via BPAY® (for example, because you are a New Zealand Shareholder who does not have an Australian bank account), you can make a payment by Electronic Funds Transfer (EFT). To do this, you must use the unique EFT Reference Number shown on your Personalised Application Form.

Cash and cheque payments will not be accepted. Receipts for payment will not be issued. Any application monies received for more than your final allocation of New Shares and Attaching Options (only where the amount is \$1.00 or greater) will be refunded as soon as practicable. No interest will be paid on any application monies received or refunded.

By making payment by BPAY® or EFT:

- (a) you are taken to have made the declarations on that Application Form; and
- (b) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of New Shares and Attaching Options which is covered in full by your application monies.

It is your responsibility to ensure that your BPAY® or EFT payment is received by the Share Registry by no later than 5.00pm (Sydney time) on the Closing Date. You should

be aware that your financial institution may implement cut-off times with regards to electronic payment and you should therefore take this into consideration when making payment.

Any application monies received for more than your final allocation of New Shares and Attaching Options (only where the amount is \$1.00 or greater) will be refunded. No interest will be paid on any application monies received or refunded.

5.7 Representations you will be taken to make by acceptance

A payment of application monies made through BPAY® and EFT or otherwise constitutes a binding offer to acquire New Shares and Attaching Options on the terms and conditions set out in this Prospectus and, once paid, cannot be withdrawn. The Company's decision whether to treat an Application as valid is final.

By making a payment of application monies by BPAY® and EFT or otherwise, you will be deemed to have:

- (a) acknowledged that you have fully read and understood this Prospectus and the Application Form in their entirety and you acknowledge the matters and make the warranties and representations and agreements contained in this Prospectus and the Application Form;

- (f) in respect of the Entitlement Offer or the Top-Up Offer (as applicable), declared that you were the registered holder as at the Record Date of the Shares indicated in the Application Form as being held by you on the Record Date;
- (g) agreed to apply for and be issued up to the number of New Shares and Attaching Options specified in the Application Form, or for which you have submitted payment of any application monies via BPAY® or EFT or otherwise at the issue price of \$0.09 per New Share;
- (h) authorised the Company, the Share Registry and their respective officers, employees or agents to do anything on your behalf necessary for New Shares and Attaching Options to be issued to you;

- (i) acknowledged and agreed that:
 - (1) determination of eligibility of investors for the purpose of the Entitlement Offer is determined by reference to a number of matters, including legal and regulatory requirements, logistical and registry constraints and the discretion of the Company; and
 - (2) the Company, and each of its Affiliates, disclaim any duty or liability (including for negligence) in respect of that determination and the exercise or otherwise of that discretion, to the maximum extent permitted by law;
- (j) acknowledged that the information contained in this Prospectus and your Application Form is not investment advice nor a recommendation that the New Shares and Attaching Options are suitable for you given your investment objectives, financial situation or particular needs;

The Directors' (or their delegates') decision as to whether to treat an Application as valid and how to construe, amend or complete the Application is final and binding.

5.8 Enquiries concerning your Entitlement

If you have any queries concerning your Entitlement please contact the Company's Share Registry on 1300 288 664 (within Australia) or +61 2 9698 5414 (outside Australia).

5.9 No Cooling-Off Rights

Cooling-off rights do not apply to an investment in New Shares and Options. You cannot, in most circumstances, withdraw your application once it has been accepted.

6. Rights and liabilities attaching to Shares

Shares issued pursuant to this Prospectus (including the Shares underlying the Attaching Options) will have the same rights and liabilities as the Company's existing Shares on issue as at the date of this Prospectus. The full details of the rights attaching to Shares are set out in the Constitution, a copy of which is available on the Company's website www.patagonialithium.com.au and may also be inspected at the Company's registered office. A summary of the rights and liabilities attaching to the Shares is set out below. This summary is not exhaustive, nor does it constitute a definitive statement of a Shareholder's rights and obligations.

6.1 General meetings

- (a) Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.
- (b) Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution.

6.2 Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of Shares, at general meetings of Shareholders or classes of Shareholders, each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;

- (a) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (b) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for the Share, but in respect of partly paid Shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

6.3 Dividend Rights

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

6.4 Winding-up

(a) Distribution of assets

If the Company is wound up, the liquidator may, with the authority of a special resolution of the Company, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

(b) Powers of liquidator to vest property

The liquidator may, with the authority of a special resolution of the Company, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any Shares or other securities in respect of which there is any liability.

6.5 Shareholder liability

As the Shares issued will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

6.6 Transfer of Shares

Generally, Shares are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act or the ASX Listing Rules.

6.7 Future Increase in Capital

The issue of any new Shares is under the control of the Directors. Subject to restrictions on the issue or grant of securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

6.8 Variation of rights

Pursuant to section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

If at any time the share capital is divided into different classes of Shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three- quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

6.9 Alteration of Constitution

The Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

7. Rights and liabilities of Options

Options issued in accordance with this Prospectus will be issued on the following terms and conditions.

7.1 Exercise Period and Expiry Date

The Options are exercisable at any time on a Business Day prior to 5:00pm (Sydney time) on 31 August 2025 (**Expiry Date**). Options not exercised by that date will lapse.

7.2 Exercise Price

Each Option entitles the holder with the right to be issued one Share on payment of the sum of \$0.15 per Option (**Exercise Price**) to the Company.

7.3 Notice of Exercise

Option holders will receive an exercise notice at the same time that they receive a holding statement in respect of the Options (**Exercise Notice**).

Option holders may not exercise less than 100,000 Options at any one time, unless the Option holder has less than 100,000 Options, in which case they may do so provided they exercise all Options then held.

Options may be exercised at any time prior to 5:00pm (Sydney time) on the Expiry Date by delivering a duly executed Exercise Notice to the Company, together with payment for the aggregate Exercise Price for the Options being exercised.

Options will be deemed to have been exercised on the date that the Company has received the aggregate Exercise Price (in cleared funds) in respect of the Options exercised in accordance with the Exercise Notice.

7.4 Shares Issued on Exercise of Options

Shares to be issued pursuant to the exercise of Options will be issued following receipt of all the relevant documents and payments (in cleared funds) and will rank equally with the then issued Shares.

Shares issued pursuant to the exercise of Options will have the same rights and liabilities as the Company's existing Shares on issue as at the date of the exercise of the Options. The full details of the rights attaching to Shares are set out in the Company's Constitution. A summary of the rights and liabilities attaching to the Shares as at the date of this Prospectus is set out in section 6 of this Prospectus.

If the holder of any Options exercises less than the total number of Options registered in their name, the Company will provide the holder of any Options with a new holding statement stating the remaining number of Options registered in that holder's name, together with a new exercise notice.

7.5 Quotation of Options and Shares on Exercise

The Company has applied to the ASX for Quotation of the Options. However, the Company cannot guarantee that ASX will accept Quotation of the Options in which case they will remain

unlisted. Accordingly, Option holders should be aware that there is unlikely to be a viable market for them and a sale or transfer of the Options will be difficult.

An Application will also be made at the time of the exercise of any Options for Quotation of the Shares to be issued upon exercise of Options.

The holder of any Options may transfer some or all of their Options in any manner authorised by the ASX or the Corporations Act.

7.6 Participation or Entitlements

There are no participating rights or entitlements inherent in the Options and holders will not be entitled to participate in new issues of securities offered to Shareholders during the term of the Options, except in their capacity as existing Shareholders.

7.7 Bonus Issues

If, prior to the expiry of the Options, the Company makes a bonus issue of Shares to Shareholders for no consideration, the number of Shares over which an Option is exercisable will be increased by the number of Shares which the holder would have received if the Option had been exercised before the relevant record date for the bonus issue.

7.8 Pro-Rata Issue

If, from time to time, before the expiry of the Options, the Company makes a pro-rata issue of Shares to shareholders, the exercise price of the Options may be amended in accordance with ASX Listing Rule 6.22.2.

7.9 Capital reorganisation

If there is a reorganisation of the issued capital of the Company (including any consolidation, subdivision, reduction, or return of capital), the rights of the Option holders shall be changed to the extent necessary to comply with the ASX Listing Rules at the time of the reorganisation.

8. Risks

8.1 Introduction

The New Shares and Options offered in accordance with this Prospectus are considered highly speculative. An investment in the Company is not risk free and the Directors strongly recommend that potential investors consider the risk factors described below, together with information contained elsewhere in this Prospectus and otherwise disclosed to the ASX, and consult their professional advisers before deciding whether to apply for New Shares or Options pursuant to this Prospectus.

In addition to the specific risks that relate directly to the Company, there are also other general risks, many of which are largely beyond the control of the Company and the Directors, that investors should consider. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of any New Shares and/or Options issued pursuant to this Prospectus.

8.2 Business specific and industry risks

(a) Funding risk

The Company's capital requirements depend on numerous factors, including the success of its planned exploration programs, the future exploration programs for its Projects, the Company's ability to generate income from its operations and possible acquisitions or other corporate opportunities. The Company may require further capital to achieve its objective of transitioning from explorer to producer. If the Company acquires any new Project it may need to raise further capital to fund the acquisition or the project once acquired.

For the foreseeable future, it is expected that this funding will be obtained from equity financing. Any equity financing undertaken will dilute existing Shareholders.

There is no guarantee that the Company will be able to secure any additional funding or will be able to secure funding on terms that are favourable or acceptable to the Company.

This may require that the Company reduce the scope of its operations or, if necessary, surrender or dispose of some of its interest in one or more of its Projects to a third party.

There is a risk that the Company will not be able to meet the work commitments or satisfy the required licence fees, which may result in one or more of its Tenements being forfeited.

Similarly, while debt financing is unlikely to be available to the Company for the foreseeable future, any debt financing, if available, may involve restrictions on financing and operating activities.

(b) Outstanding approvals of the Cilon Project

The grant of the drilling permit approvals for the Cilon Project have not yet been granted by the local government authority.

In Argentina, each province is the owner of the natural resources located in their respective territories and permitting is managed by both the mining and environmental departments of each province. The Cilon Project is entirely located in the Jujuy Province of Argentina.

The Company has been engaging with the Mining Directorate of the Jujuy Province to obtain the required drilling permit approvals for its Cilon Project.

As at the date of this Prospectus, the Company has been advised that the only outstanding approval that is required to be for the Company to commence drilling at the Cilon Project is the approval of a drilling program and environmental impact assessment at the Cilon Project. The grant of these approvals is out of the control of the Company and there is no guarantee that it will occur.

(c) Sovereign

The Company currently holds interests in Projects that are located in Argentina and Brazil.

Possible sovereign risks associated with operating in this jurisdiction include, without limitation, changes in the terms of mining legislation, changes to royalty arrangements, changes to taxation rates and concessions and changes in the ability to enforce legal rights. Any of these factors may, in the future, adversely affect the financial performance of the Company and the market price of its shares.

No assurance can be given regarding future stability in this jurisdiction or any other country in which the Company may, in the future, have an interest.

Specifically, it is possible that the current system of exploration and mine permitting may change, resulting in impairment of rights and possibly expropriation of the Company's properties without adequate compensation.

(d) Exchange rate volatility and inflation

The Company's revenue and expenditure will be taken into account in Australian dollars. The Company's operating and exploration expenses may be incurred in United States Dollars, Argentinian Peso and Brazilian Real.

Furthermore, international prices of various commodities are denominated in United States dollars and, if the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to United States.

Therefore, the Company is exposed to fluctuations and volatility in the United States dollar, the Australian dollar and the Argentinian Peso and Brazilian Real exchange rates.

Furthermore, the Argentinian Peso is subject to strict foreign export control laws which often mean that the official rate of exchange is not reflective of the actual rate of exchange and the Argentinian Peso is exposed to a high rate of inflation.

Movements in these exchange rates, inflation and the actual rates at which the Company is able to convert USD to Argentinian Peso and/ or Brazilian Real may adversely or beneficially affect the Company's results or operations and cash flows.

(e) Operational and exploration risk

The tenements comprising the Projects are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings.

There can be no assurance that exploration of the Tenements, or any other tenements that may be acquired in the future, will result in the discovery of an economic ore deposit. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited.

The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns or adverse weather conditions, unanticipated operational and technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, industrial and environmental accidents, industrial disputes, unexpected shortages and increases in the costs of consumables, spare parts, plant, equipment and staff, native title process and Indigenous heritage factors, changing government regulations and many other factors beyond the control of the Company.

The success of the Company will also depend upon the Company being able to maintain title to the mineral exploration tenements forming its Projects and obtaining all required approvals for their contemplated activities. In the event that exploration programs prove to be unsuccessful this could lead to a diminution in the value of its Projects, a reduction in the cash reserves of the Company and possible relinquishment of one or more of the mineral exploration tenements forming its Projects.

(f) Access and infrastructure

Access on and to tenements may be subject to the availability of appropriate infrastructure or the consent of third parties.

There is no guarantee that agreement can be reached with interested third parties or that the necessary infrastructure required to access or develop the tenements will be available or viable.

The Company's Projects are and may be further affected by legitimate native title rights of Indigenous peoples as discussed in the native title section below.

(g) Native title

In relation to tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas of indigenous owned land exist. Where such rights exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected.

The Company understands the importance of establishing and maintaining positive relationships with all affected by any future exploration activities, particularly with the Indigenous peoples whose lands we may operate on.

The Directors will closely monitor the potential effect of native title processes, determinations and claims and Indigenous heritage matters involving tenements in which the Company has or may have an interest and will undertake such heritage surveys and seek such consents as are required to comply with these obligations.

(h) Tenure and title risk

Mining and exploration tenements are subject to periodic renewal. There is no guarantee that current or future tenements or future applications for production tenements will be approved. Tenements are subject to the applicable mining acts and regulations of the relevant jurisdiction. The renewal of the term of a granted tenement is also subject to the discretion of the relevant minister. Renewal or conversion conditions may include increased expenditure and work commitments or compulsory relinquishment of areas of the tenements comprising the Company's Projects. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of the Company.

Irrespective of the Company's compliance with the conditions of the tenements, and applicable mining acts and regulations, there is no guarantee that applications for forfeiture or cancellation will not be made against the tenements. If any application for forfeiture or objection to the grant of an exemption is lodged, the Company may be required to defend such applications or objections and incur significant costs.

(i) Grant and renewal of permits

The Company's mineral exploration activities are dependent upon the granting and maintenance (including renewal) of the Tenements or other tenements in which the Company acquires an interest.

Maintenance of the Company's Tenements is dependent on, among other things, its ability to meet the licence conditions imposed by relevant authorities including minimum annual expenditure requirements which, in turn, is dependent on it being sufficiently funded to meet those expenditure requirements. The extent of work performed on each Tenement may vary depending upon the results of the exploration programme which will determine the prospectivity of the relevant area of interest. There is a risk that if the Company fails to satisfy these minimum expenditure requirements at the time of expiry of the granted Tenements, the Company may be required to relinquish part or all its interests in these granted Tenements. As at the date of this Prospectus, the Company is not in breach of its minimum expenditure commitments.

8.3 Industry Specific Risks

There are a number of industry specific risks associated with the Company which have a reasonable likelihood of occurring, are difficult to mitigate, and if they do eventuate, would have a significant effect on the Company's financial position, prospects or the price of its Shares and are, therefore, key risks. These risks include:

(a) Commodity price fluctuations

It is anticipated that any future revenues derived from mining will primarily be derived from the sale of minerals. Consequently, any future earnings are likely to be closely related to the price of lithium and other mined commodities. Similarly, prior to production, the Company's Share price will also be affected by these prices and investor outlook and sentiment in respect of these prices.

The prices of minerals are influenced by numerous variable factors beyond the control of the Company, including laws and regulations, economic conditions and trading demand and supply. Fluctuations in mineral prices may, positively or negatively, influence the operating and financial performance of projects and businesses in which the Company has an interest or proposes to have an interest.

Even if this is not the case, general sentiment towards one or more minerals may have a significant adverse affect on the price of Shares.

(b) Land access

The Company will be required to negotiate access arrangements and pay compensation to land owners, local authorities, traditional land users and others who may have an interest in the area covered by the Tenements. The Company's ability to resolve access and compensation issues will have an impact on the future success and financial performance of the Company's operations.

In addition, where the relevant part of the Tenements is not accessible without crossing land which is not owned by the Company, the Company may be required to obtain the consent of owners and occupiers of land within the Tenements to carry out its planned activities on such land or otherwise pass through such land. Compensation may be required to be paid to the owners and occupiers of land in order for exploration and development activities to be carried out.

Negotiations with land owners, local authorities, traditional land users and others may therefore be required before the Company can access land for exploration or mining activities. Inability to access, or delays experienced in accessing, the land may impact on the Company's activities. Special conditions may also attach to exploration (if permitted) in special locations within the Tenements, including those of environmental or heritage significance. There may be delays experienced in negotiating these conditions, and there is a risk that the parties cannot reach agreement and the matter could result in the Company not being able to conduct the exploration or production activities on terms acceptable to the Company (or at all).

Access is critical for exploration and development to succeed and the ability to be able to negotiate satisfactory commercial arrangements with land owners, local authorities, traditional land users and occupiers is often essential.

(c) Exploration costs

The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainties and, accordingly, the actual costs may materially differ from these estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.

(d) Potential acquisitions and investments

The Company may pursue and assess other new business opportunities in the resource sector in order to realise benefits including complementary revenue streams and future platforms for growth. The identification, evaluation and negotiation of these opportunities may require significant time and effort from key management and employees, and may result in disruptions to the business.

These new business opportunities may take the form of direct project acquisitions, investments, joint ventures, farm-ins, acquisition of tenements and permits, and/or direct equity participation. Such transactions (whether completed or not) may require the payment of monies (as a deposit and/or exclusivity fee) after only limited due diligence or prior to the completion of comprehensive due diligence. There can be no guarantee that any proposed acquisition will be completed or be successful. If the proposed acquisition is not completed, monies advanced may not be recoverable, which may have a material adverse effect on the Company.

If an acquisition is undertaken, the Directors will need to reassess at that time, the funding allocated to current projects and new projects, which may result in the Company reallocating funds from other projects and/or raising additional capital (if available). There is also a risk that the Company is unsuccessful in integrating new businesses or assets into its existing operations in a timely manner, or that the new businesses or assets do not result in the benefits anticipated. The Company cannot guarantee that every acquisition or partnership that it makes or enters into will result in favourable outcomes for the business. In addition, the process of integrating new businesses or assets may require significantly more financial and management resources, or time to complete, than originally planned.

(e) Mineral Resource estimates

Mineral resource estimates are expressions of judgement and are estimates based on knowledge, experience and industry practice. While these estimates may be appropriate when made, they may change significantly when new information or techniques become available.

Estimates are a necessary practice and may change significantly or cease to be accurate when new information or techniques become available through additional fieldwork and analysis. Mineral Resource estimates are, by their nature, imprecise and, to an extent, depend on interpretation, which may result in inaccuracies. Should the Company encounter mineralisation or formations different from those predicted by past drilling, sampling and similar examinations, resource estimates may have to be adjusted and mining plans may have to be altered in a way which could adversely affect the Company's operations. New information, practices or techniques may result

in the Company revising any initial estimates of its Mineral Resources or Ore Reserves, which may could adversely affect the Company's operations.

(f) Native Title risk

In relation to tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas of indigenous owned land exist. Where such rights exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected.

The Company understands the importance of establishing and maintaining positive relationships with all affected by any future exploration activities, particularly with the Indigenous peoples whose lands we may operate on.

The Directors will closely monitor the potential effect of native title processes, determinations and claims and Indigenous heritage matters involving tenements in which the Company has or may have an interest and will undertake such heritage surveys and seek such consents as are required to comply with these obligations.

(g) Joint venture parties, agents and contractors

There is a risk of financial failure or default by a participant in any joint venture to which the Company is, or may in the future become, a party, or the insolvency or managerial failure by any service provider used by the Company for any activity.

Any failure by any of the Company's existing or future joint venture partners could result in the Company being required to expend significant time and monetary resources, for which it may not have made provision, requiring it to raise additional funds and direct its energies and/ or reallocate budgeted expenditure.

(h) Environmental

The operations and proposed activities of the Company are subject to laws and regulations concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds.

Mining operations have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products occurring as a result of mineral exploration and production. The occurrence of any such safety or environmental incident could delay production or increase production costs. Events, such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by current, future or previous operations or non-compliance with environmental laws or regulations.

It is the Company's intention to conduct its activities to the highest standard of its environmental obligations, including by complying with all environmental laws and regulations.

(i) Metallurgy

Metal and/or mineral recoveries are dependent upon metallurgical processes and, by their nature, contain elements of significant risk such as:

- (1) identifying a metallurgical process through test work to produce a saleable metal and/or concentrate;
- (2) developing an economic process route to produce a metal and/or concentrate; and
- (3) changes in the mineralogy of the ore deposit can result in inconsistent metal recovery, affecting the economic viability of the Company's Projects.

(j) Competition risk

The industry in which the Company will be involved is subject to domestic and global competition. Although the Company will undertake all reasonable due diligence in its business decisions and operations, the Company will have no influence or control over the activities or actions of its competitors, which activities or actions may, positively or negatively, affect the operating and financial performance of the Company's Projects and business.

In particular, the Company's ability to undertake exploration and mining activities is dependent upon its ability to source and acquire appropriate mining equipment and personnel. Equipment and personnel are not always readily available and the market for mining equipment and personnel experiences fluctuations in supply and demand. Increases in worldwide mining activities may create cost pressures for services and skilled personnel in the resources industry, which may affect the ability to purchase or hire equipment, supplies, and services and to recruit skilled personnel in relation to the Projects. In addition, the availability of drilling rigs and other equipment and services is affected by the level and location of drilling activity around the world. An increase in drilling activity in Australia may reduce the availability of equipment and services to the Company. In addition, an increased demand for mineral commodities may significantly increase the demand for many mining and processing inputs, which has resulted in shortages, as well as longer lead times for delivery and increases in pricing, of mining equipment and metallurgical plant, strategic spares and critical consumables. The reduced availability of equipment, services and skilled personnel may delay the planned exploration, development, and production activities at the projects. A shortage of skilled labour in the Australian mining industry could result in the Company having insufficient employees or contractors to operate its business, which could adversely affect the Company's business, results of operations and financial condition.

8.4 General Investment Risks**(a) Regulatory risks and Government Policy changes**

The Company's exploration and development activities are subject to extensive laws and regulations relating to numerous matters including resource licence consents, conditions including environmental compliance and rehabilitation, taxation, employee relations, health and worker safety, waste disposal, protection of the environment, native title and heritage matters, protection of endangered and protected species and other matters. Changes in government policies or legislation may affect ownership of mineral interests, taxation, royalties, land access, labour relations, and mining and exploration activities of the Company.

The Company requires permits from regulatory authorities to authorise the Company's operations. These permits relate to exploration, development, production, and rehabilitation activities. Obtaining necessary permits can be a time consuming process and there is a risk that the Company may not obtain these permits on acceptable terms, in a timely manner, or at all. Any costs or delays associated with obtaining necessary permits and complying with these permits and applicable laws and regulations could materially delay or restrict the Company from proceeding with the development of a Project or the operation or development of a mine. Any failure to comply with applicable laws and regulations or permits, even if inadvertent, could result in material fines, penalties or other liabilities. In extreme cases, failure could result in suspension of the Company's activities or forfeiture of one or more of the Company's Tenements.

(b) Economic and market conditions

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's ability to fund its operations. Share market conditions may affect the value of the Company's Equity Securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (1) general economic outlook;
- (2) commodity prices;
- (3) interest rates and inflation rates;
- (4) changes in investor sentiment toward particular market sectors and commodity types;
- (5) the demand for, and supply of, capital; and
- (6) terrorism or other hostilities.

The market price of Equity Securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for securities in general. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(c) Taxation

The acquisition and disposal of Equity Securities will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Equity Securities from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Equity Securities in accordance with this Prospectus.

(d) Liquidity risk

An application will be made to ASX for Quotation of the New Shares and the Options offered pursuant to this Prospectus within 7 days of the date of this Prospectus. The

Company will also apply for Quotation of any Shares issued on the exercise of the Options if quoted by the ASX at that time.

However, no assurance can be given of the price at which New Shares or the Options will trade or that they will trade at all. Potential Applicants should, therefore, be prepared to hold their New Shares or Options for extended periods pending the development of the Company's Projects and potential opportunities emerging in the future. The market price of Equity Securities can fall, as well as rise, and may be subject to varied and unpredictable influences on the market for equities and, in particular, resources entities. Neither the Company nor the Directors provide any warranty as to the future performance of the Company or any return on an investment in the Company.

This may affect the liquidity of trading in the Company's Shares, which may result in a lower volume of Shares being traded than would otherwise have been the case, potentially making it difficult to realise any return on your investment.

If the Options are not accepted for Quotation, the Entitlement Offer and Top-Up Offer will proceed, but Applicants should be aware that there is unlikely to be a viable market for the Options in those circumstances and a sale or transfer of the Options may be difficult.

(e) Reliance on key personnel

The Directors are primarily responsible for overseeing the operations and the strategic management of the Company. The day-to-day operations of the Company are the responsibility of the Executive Chairman. There can be no assurance that there will be no detrimental impact on the Company if one or more of the Directors, particularly the Executive Chairman, no longer act as Directors.

(f) Information technology/privacy

The Company relies heavily on its own computer systems and those of third party service providers to store and manage private and confidential information. A malicious attack on the Company's systems, processes or people from external or internal sources could put the integrity and privacy of the Company's data at risk. If the Company's efforts to combat any malicious attack are unsuccessful or the Company has actual or perceived vulnerabilities, the Company's business reputation and brand name may be harmed, potentially having a material adverse effect on the Company's operations and financial position.

(g) Insurance

The Company insures its operations in accordance with industry practice. However, in certain circumstances the Company's insurance may not be of a nature or level to provide adequate insurance cover. The occurrence of an event that is not covered or fully covered by insurance could have a material adverse effect on the business, financial condition and results of the Company.

Insurance of all risks associated with mineral exploration and production is not always available and where available the costs can be prohibitive.

(h) Climate change

There are a number of climate-related factors that may affect the operations and proposed activities of the Company.

Climate change may be said to cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. These risks said to be associated with climate change may have a direct impact on Company's ability to perform its mining operations, and may significantly change the industry in which the Company operates.

In addition, changing investor sentiment towards climate change, including a view that all mining should be avoided due to its contribution to greenhouse gas emissions (despite the reliance on the various metals by the renewables sector) and, thus, cause investors to cease investing in mining and exploration entities, may have a significant adverse effect on the Company's ability to secure additional funding and other ancillary products and services (including, for example, appropriate insurance at affordable prices).

(i) Occupational health and safety

There is an inherent risk of workplace accidents occurring during the conduct of mining activity. Hazardous activities are avoided wherever possible, but when necessary, all employees and contractors are required to conduct themselves in accordance with all applicable laws and policies in force from time to time in respect of occupational health and safety.

8.5 Speculative investment

The above risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially effect the financial performance of the Company and the value of the New Shares and Options offered under this Prospectus.

Therefore, the New Shares and Options to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those New Shares or Options.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for any New Shares and Options pursuant to this Prospectus.

9. Additional information

9.1 Director interests

Other than as set out below or elsewhere in this Prospectus, no Director or proposed Director holds, or has held within the two years preceding lodgement of this Prospectus with ASIC, any interest in:

- (a) the formation or promotion of the Company;
- (b) any property acquired or proposed to be acquired by the Company in connection with:
 - (1) its formation or promotion; or
 - (2) the offer of New Shares or Options pursuant to this Prospectus; or
- (c) the offer of New Shares or Options pursuant to this Prospectus,

and no amounts have been paid or agreed to be paid and no benefits have been given or agreed to be given to a Director or proposed Director:

- (d) as an inducement to become, or to qualify as, a Director; or
- (e) for services provided in connection with:
 - (1) the formation or promotion of the Company; or
 - (2) the offer of New Shares or Options pursuant to this Prospectus.

The relevant interest of each of the Directors in the Company's Shares as at the date of this Prospectus, together with their respective Entitlements in accordance with the Entitlement Offer, is set out in the table below:

Director	Shares	Entitlement to New Shares under the Entitlement Offer	Entitlement to Attaching Options under the Entitlement Offer
Phillip Thomas	1,140,000	380,000	190,000
Feiyu Qi – Non-Executive Director	Nil	Nil	Nil
Richard Anthon	Nil	Nil	Nil

The remuneration of an executive Director is decided by the Board, without the affected executive Director participating in that decision-making process. The total maximum remuneration of non-executive Directors is initially set by the Constitution and subsequent variation with the Constitution, the Corporations Act and the ASX Listing Rules, as applicable. The total aggregate amount of remuneration for non-executive directors approved by Shareholders as at the date of this Prospectus is \$500,000 per annum. The determination of non-executive Directors' remuneration within that maximum will be made by the Board having regard to the inputs and value to the Company of the respective contributions by each non-executive Director.

A Director may be paid fees or other amounts (i.e. non-cash performance incentives such as Options, subject to any necessary Shareholder approval) as the other Directors determine where a Director performs special duties or otherwise performs services outside the scope of the ordinary duties of a Director. In addition, Directors are also entitled to be paid reasonable travelling, hotel and other expenses incurred by them respectively in or about the performance of their duties as Directors.

Details of the remuneration paid and payable to each Director of the Company are set out in the Company's annual report for the financial year ending 31 December 2023. A copy of this report can be accessed on the Company's website <https://patagonialithium.com.au/> or on ASX webpage for the Company (ASX Code: PL3).

The following table details the total compensation each Director received for the financial years ending 31 December 2022 and 31 December 2023 (including allowances and share based payments):

Director	Directors' Fees (including superannuation)	
	2022	2023
	\$	\$
Phillip Thomas – Executive Chairman	\$228,067	\$96,999
Richard Anthon – Non-Executive Director ²	-	-
Feiyu Qi – Non-Executive Director	-	\$21,197

The above figures do not include any New Shares or Attaching Options that the Directors may acquire pursuant to the Entitlement Offer.

9.2 Market price of Shares

The Company's Shares are Quoted on the ASX (ASX Code: PL3).

In the three (3) months prior to 5 July 2024 the highest and lowest market sale prices of Shares on the ASX and the respective dates of those sales were:

9.3 Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all ASX listed companies, the Company is required to immediately disclose to the market any information that a reasonable person would expect to have a material effect on the price or the value of the Company's securities.

² Appointed 20 February 2024. Mr Anthon is entitled to receive a non-executive director fee of \$60,000 plus statutory superannuation per annum.

The Company ensures compliance with these obligations through the establishment of a formal 'Continuous Disclosure Policy', which establishes formal protocols for the notification and disclosure of information by the Company's Directors, employees, consultants and contractors that may potentially be material. This Prospectus is a "transaction specific prospectus". In general terms a "transaction specific prospectus" is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

As such, this Prospectus should be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus prepared in accordance with the Corporations Act for the initial public offering of securities in an entity that is not already listed on a securities exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision as to whether or not to invest.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.

The Company, as a disclosing entity under the Corporations Act, advises that:

- (a) it is subject to regular reporting and disclosure obligations;

Before making an investment decision, you should consider the appropriateness of the information in this Prospectus having regard to your own objectives, financial situation and needs and seek legal and taxation advice appropriate to your jurisdiction. If you have any questions about whether you should participate in any of the offers under this Prospectus, you should seek professional advice before making any investment decision. The Company is not licensed to provide financial product advice in respect of the New Shares and Options.

9.5 Allotment

New Shares and Options issued pursuant to the Entitlement Offer and Top-Up Offer will be allotted in accordance with ASX Listing Rules and the timetable set out in this Prospectus.

New Shares and Options issued pursuant to the Public Shortfall Offer will be allotted on a progressive basis within three months of the Closing Date.

Attaching Options issued pursuant to the Convertible Note Option Offer will be allotted on a progressive basis within thirteen months of the date of this Prospectus.

Where the number of New Shares and Options issued is less than the number applied for, or where no allotment is made, any surplus application money received by the Company will be refunded to the Applicant in full as soon as practicable after the Closing Date of the Entitlement Offer. No interest will be paid on any application money refunded to Applicants.

Pending the allotment and issue of New Shares and Options or payment of refunds pursuant to this Prospectus, all application money will be held by the Company on trust for the Applicants in a separate bank account as required by the Corporations Act. The Company will, however, be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

Holding statements for New Shares and Options issued pursuant to the Entitlement Offer and Top-Up Offer will be mailed to Applicants in accordance with the ASX Listing Rules and timetable set out at the commencement of this Prospectus and for Shares and Attaching Options issued under the Public Shortfall Offer as soon as practicable after their issue.

9.6 Brokerage and Stamp Duty

No brokerage fee is payable by Eligible Shareholders who accept their Entitlement. No stamp duty is payable for applying for New Shares and Options pursuant to the Entitlement Offer.

9.7 ASX listing

An application will be made for Quotation of the New Shares and Options offered pursuant to this Prospectus within 7 days of the date of this Prospectus. If ASX does not grant Quotation of the New Shares offered pursuant to this Prospectus, before the expiration of three months after the date of this Prospectus (or such period as varied by ASIC), the Company will not issue any New Shares or Options and will repay all application money for the Shares and Options within the time prescribed under the Corporations Act, without interest.

If the Options are not accepted for Quotation, the Entitlement Offer, Broker Option Offer and Convertible Note Option Offer will proceed, but Applicants should be aware that there is

unlikely to be a viable market for the Options in those circumstances and a sale or transfer of the Options may be difficult.

The fact that ASX may grant Quotation of the Shares offered pursuant to this Prospectus is not to be taken in any way as an indication of the merits of the Company or the New Shares or Options offered for subscription.

9.8 Clearing House Electronic Sub Register System (CHES) and Issuer Sponsorship

The Company will not be issuing share certificates. The Company is a participant in CHES, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHES will be issuer sponsored by the Company. Because the sub registers are electronic, ownership of securities can be transferred without having to rely upon paper documentation.

Electronic registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with a statement (similar to a bank account statement) that sets out the number of Shares allotted to them in accordance with this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures pursuant to CHES and issuer sponsorship.

Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.
