

4 April 2022

Investor Presentation – Spin Out of Ortus Resources including the Orokolo Bay Iron & Industrial Sands Project

Mayur Resources Limited (ASX:MRL) is pleased to release the attached Investor Presentation relating to the proposed spin out of its subsidiary Mayur Iron, into a new company called Ortus Resources Limited.

Ortus Resources is to hold the flagship, construction ready, Orokolo Bay Iron and Industrial Sands project in Papua New Guinea.

If successful, funding from the Spin Out and listing of Ortus Resources on the ASX, will be utilised to construct and operate the Orokolo Bay project with first product shipment planned for H1 2023.

Following in-principle support for the spin out from the Board of Mayur Resources, the Company is now working through the necessary regulatory and approval requirements and subject to Shareholder approval, have finalised in principle the appointment of advisors to assist with the spin out process.

This announcement was authorised by Mr Paul Mulder, Managing Director of Mayur Resources Limited.

ABOUT MAYUR RESOURCES

Mayur Resources is focused on the development of natural resources in Papua New Guinea. Our diversified asset portfolio spans iron sands, lime and cement, battery minerals and renewable power generation. Mayur also holds a 43% interest in copper gold explorer/developer Adyton Resources, a company listed on the TSX-V (TSXV:ADY).

Mayur's strategy is to serve PNG and the wider Asia Pacific region's path to decarbonisation by developing mineral projects that deliver higher quality, lower cost, and net zero inputs for the mining and construction industries, as well as constructing a renewable energy portfolio of solar, wind, geothermal, carbon mitigation, and battery storage.

Mayur is committed to engaging with host communities throughout the lifecycle of its projects, as well as incorporating internationally recognised Environmental, Social and Governance (ESG) standards into its strategy and business practices.

The distribution of this Document may be restricted by law in certain other countries. Neither this Document nor any copy or portion of it may be sent or taken, transmitted or distributed, directly or indirectly, into any other jurisdiction where to do so would be unlawful. No liability

Mayur Resources has prepared this Document based on information available to it to date. No representation or warranty, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this Document. To the maximum extent permitted by law, none of Mayur Resources, Mayur Iron or any of their respective related entities, directors, employees, officers, professional advisers or agents, the Lead Manager nor any independent third party or other person accepts any responsibility or liability, including, without limitation, any liability arising from fault, negligence or omission on the part of any person (including but not limited to Mayur Resources, Mayur Iron or any of their respective related entities, directors, employees, agents or advisers), for any loss or damage (whether direct or indirect) arising from the use of this Document or its contents or otherwise arising in connection with it. The information contained in this Document is subject to change without notice and Mayur may, in its absolute discretion, but without being under any obligation to do so, update or supplement the information.

This information has been prepared by Mayur Resources without taking account of any person's investment objectives, financial situation or particular needs and because of that, you should, before acting on this information, consider the appropriateness of the information having regard to your own investment objectives, financial situation and needs. All potential investors receiving this Document should make their own enquiries. No person is authorised to give information or make any representation that an offering will occur. Investigations, independent analysis and judgment about the investment opportunities and the data/information stated or contained in this Document and consult an accountant, stockbroker, lawyer, qualified financial adviser or other professional or investment adviser before making any decision in relation to Mayur or the Securities.

Financial performance

This Document contains certain "forward-looking statements" (including forecasts, estimates and projections). All statements, other than statements of historical fact, that address activities, events or developments that Mayur believes, expects or anticipates will or may occur in the future, including without limitation those regarding Mayur's financial position, business strategy, plans and objectives of management for future operations. Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", and events or results which "may", "will", "can", "should", "could", or "might" occur or be achieved and other similar expressions. These forward-looking statements reflect the current internal projections, expectations or beliefs of Mayur based on information currently available to Mayur and are subject to a number of risks (both known and unknown), uncertainties and other important factors that may cause the actual results, performance or achievements of Mayur to differ materially from those expressed or implied by such forward-looking statements. Such forward-looking statements are based on the numerous assumptions regarding Mayur's present and future business strategies and the environment in which Mayur will operate and must be read together with those assumptions. These forward-looking statements speak only as at the date of this Document. Predictions, projections or forecasts of the economy or economic trends of the markets are not necessarily indicative of the future or likely performance of Mayur. No assurance can be given as to the accuracy or likelihood of fulfilment of any forward-looking statements, events or results or that future events will occur, that projections will be achieved, or that assumptions are correct. The forecast financial performance of Mayur is not guaranteed. Past performance is not a reliable indication of future performance, and you are cautioned not to place undue reliance on these forward-looking statements, which are based on the current views of Mayur on future events. Mayur Resources, Mayur Iron and their respective affiliates, advisers and representatives expressly disclaim any obligation or undertaking to disseminate any updates or revisions, except as required by law, to any forward-looking statements contained in this Document to reflect any change in Mayur's expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based. Neither Mayur Resources, Mayur Iron, their respective affiliates, nor any of their respective related entities, directors, employees, agents or advisers, nor any independent third party represents or warrants to any recipient that any forward-looking statements will be achieved or will prove to be correct. Actual results could vary materially from any forward-looking statements. Similarly, no representation or warranty is made that the assumptions on which any forward-looking statements are based are reasonable.

Disclaimer

Bell Potter Securities Limited (ABN 25 006 390 772 / Licence No. 243480) and its affiliates and related entities, and the directors, employees, officers and advisers of each of them (Bell Potter Group) has not independently verified the information in the Document and accepts no responsibility or liability (whether direct or indirect or arising in negligence or otherwise) for the contents of this Document and makes no warranty or representation as to the accuracy of the information in this Document and to the maximum extent permitted by law, excludes and disclaims all liability for any losses incurred as the result of any information being inaccurate or incomplete. Any information or representation made in this Document, may not be relied on as being authorised by Bell Potter Group.

You acknowledge that neither you nor Bell Potter Group intends that Bell Potter Securities Limited or any member of the Bell Potter Group act or be responsible as a fiduciary to you, your officers, employees, consultants, agents, security holders, creditors or any other person. Each recipient and Bell Potter Securities Limited (on behalf of each other member of the Bell Potter Group), by accepting and providing this Document respectively, expressly disclaims any fiduciary relationship and the recipient agrees that it is responsible for making its own independent judgments with respect to any matters contained in the Document..

3 ORTUS RESOURCES

Not for distribution in the United States

Background & Value Proposition

- Mayur Resources Ltd (ASX:MRL) is a listed diversified mining company with a suite of construction-ready assets in PNG
- MRL is pursuing a spin-off strategy for its subsidiary **Mayur Iron** to unlock value for shareholders and new investors
- Mayur Iron to be re-branded as **Ortus Resources**
- Ortus Resources to hold multi commodity portfolio including the construction ready, Orokolo Bay Iron & Industrial Sands Project

Mayur Resources is contemplating a spin-off of its subsidiary Mayur Iron, to be rebranded Ortus Resources

Value creation to be achieved via providing an appropriate structure and bringing Orokolo Bay into production

Proposed Spin out

- ✓ In principle Mayur Resources Board support confirmed
- ✓ Reviewing regulatory requirements and approvals (ASX, ASIC, ATO)
- ✓ All key advisors appointed
- ✓ Spin out will require Mayur Resources shareholder approval (Shareholder Meeting on 13 April 2022)

Strategic rationale

- ✓ Logical separation of Mayur Iron from its Renewables and Industrials businesses, allowing shareholders to gain separate exposure to different verticals
- ✓ Unlock value potential for Mayur Iron which is currently being underappreciated by the market inside Mayur Resources
- ✓ Provide an appropriate structure to focus on bringing the construction-ready Orokolo Bay project into first production and cash flow generation
- ✓ Enables Mayur Resources shareholders to continue to participate in the growth of Mayur Iron through a well-financed standalone entity
- ✓ Formation of a highly credentialed leadership team at core of a new entity

Why Papua New Guinea?

Strategically located between China and Australia, PNG is embarking on a growth trajectory already experienced by most neighboring Asian countries.

Natural Resources are critical to the PNG economy

Favourable mining regulations

Emerging market growth opportunities

- **Strong track record of resource/energy industry projects** including the US\$19 bn PNG LNG project
- Centralised government with a Westminster system of parliamentary democracy.
- Continued major oil, gas, infrastructure, agriculture and resource investments from China, Australia, USA, and Japan set to transform PNG's economy
- Well-regulated mining industry administered by the Mineral Resources Authority (MRA) in Port Moresby and aligned with international best practice
- Beneficiary of the US/Japan/Australia Trilateral Partnership for Infrastructure Investment in the Indo-Pacific and China Belt and Road Initiative
- Very strong and long-standing relationship between Australian and PNG governments

Mayur Resources - deep experience in PNG

- Mayur Resources has been developing a nation building project portfolio across PNG over the last 10 years including:
 - Iron & Industrial Minerals
 - Lime & Cement
 - Power Generation
 - Copper & Gold
 - Renewables (solar, geothermal and nature-based carbon offsets)
- Mayur's strategy has prioritised coastal regions for ease of development and future access to sea borne markets.
- Mayur has developed deep in-country experience, networks and knowledge

Developing projects across PNG for over a decade

Ortus Resources - Investment Highlights

1	Orokelo Bay is the flagship project	• Orokelo Bay is a fully-permitted, construction-ready project in PNG targeting production in H1 2023 • Expected to produce multiple products including magnetite iron ore, DMS, construction sands and zircon concentrate • Offtake discussions ongoing with focus on magnetite into Asian markets
2	Proven in country delivery partner	• Delivery partner (HBS) has 30 years of in country experience as PNGs leading construction and mining services company • HBS 'skin in the game' as a cornerstone investor in Ortus with a 20% shareholding
3	Robust economics at Orokelo Bay	• Low forecast capital requirement – initial stage capex of US\$15.3M^ to produce magnetite product • Project expected to deliver an NPV₁₀ of US\$ 131M, generating LOM EBIT of US\$24M (A\$32M) p.a.* • Low-cost Magnetite opex US\$35.38/t (CFR) with ability to reduce via use of by-product credits (providing major downside protection)
4	Strong growth pipeline	• Portfolio of similar projects proximate to Orokelo Bay, allowing for potential expansion and duplication of the Orokelo Bay development • Pipeline of other projects, offering future longer term value creation opportunities
5	Net Zero Products	• Future ability to attach nature-based carbon forestry offsets (generated in PNG from Mayur Resources) • Potential to offer customers net-zero carbon products from Orokelo Bay for supply chain de-carbonisation
6	Experienced Board & Management Team	• Board & Management with proven track record of initiating, developing and managing major resource projects in various jurisdictions • Team engaged to lead Ortus Resources has generated US\$1bn in value accretion

Orokolo Bay Iron & Industrial Sands Project

Fully permitted, construction underway

- 25-year Environmental Permit in place for the Project
- **Mining Lease granted** in December 2021¹, main construction work to commence in 2022, targeting initial production in early 2023 with a short ramp up to 500kt pa of magnetite
- Initial development to prioritise early cashflow from magnetite
- Expansion capex to produce construction sands, DMS and zircon concentrate to be funded from initial cashflow within 12 months
- Site enabling works commenced
- Offtake discussions on-going with focus on higher value magnetite into the Asian market
 - Term Sheet for offtake with Leading Japanese Trading House²
- A\$8m cornerstone investment from leading PNG mining contractor HBS³

¹ See MRL ASX release 13 December 2021

² See MRL ASX release 14 December 2021

³ See MRL ASX release 15 December 2021

Orokolo Bay and surrounding tenements

1 Orokolo Bay	2 Malalaua
• FLAGSHIP PROJECT to be brought into production in 2023 • 8 years of development including +2000 drill holes and extensive studies (PFS & DFS) • De-risked with Mining Lease granted and HBS secured as strategic delivery partner (December 2021)	• Future expansion target Extensive drilling completed • Malalaua to be the “next cab off the rank” (very similar mineralisation to Orokolo Bay)

HBS Group – Our Delivery Partner & Investor

- HBS has ‘skin in the game’ as a cornerstone investor in Ortus with a 20% shareholding
- Established in 2006, HBS (PNG) has national coverage and is an industry leader in all aspects of heavy equipment and contract services
- Extensive in-country systems, processes and logistics networks to support Orokolo Bay development
- Based out of Lae with Operations across PNG and employs over 1000 people.
- Contracting in Mining and Support Services and Civil & Building Construction.
- Operates across the resources & energy, oil & gas, transport, infrastructure and property development

HBS has established contracts with major mining companies across PNG

Selected mining contracts

Contract	Project	Client	Term
Mine Support Services	Hidden Valley, Morobe	Harmony Gold	2010 - ongoing
Ore Haulage Contract	Simberi, New Ireland	St Barbara Ltd	2015- ongoing
Mine Support Services	Lihir, New Ireland	Newcrest Mining	2016- ongoing
Contract Bulk Earthworks	Ok Tedi Mine, Tabubil	Ok Tedi Mining Ltd	2018- ongoing

Mining Overview

At surface deposit facilitates a simple mining process

Mine plan sequence

At surface deposit facilitates simple mining process:

1. Clearing/ripping and stockpiling of topsoil and vegetation
2. Prior to mining closely spaced infill drilling to be undertaken to optimise mining process
3. Small excavator side casts ore from shallow pit <5m
4. Side cast ore is loaded by Front end loader (FEL) into Feed Preparation Plant and pumped to Processing Plant
5. Ore is processed with product pumped to river wharf
6. Sand tailings are pumped back to the pit, with water captured and re-used
7. Final contouring and spreading of topsoil and vegetation in preparation for Sago Palm plantation
8. Mechanized Sago Plantations as part of rehabilitation provides major ESG opportunity for Landowner's post mining

Processing Overview

Tried and tested Process Flow Sheet

- Significant metallurgical testing program via large bulk samples
- Process Flow Sheet similar to the established and proven Taharoa iron sands mine in New Zealand
- Previous Taharoa team integral in process plant design and will be utilised throughout the project execution and operations
 - 2 x 2.5mtpa relocatable processing plants at full production
 - Low capex modular construction
- Simple bolt together design limits site expertise during construction and operations
- Known equipment with broad operating parameters
- Future option to access potential high margin DMS market in Australia via simple grinding and classifying on site
- Gravity and magnetic processing with all waste material to be deposited in-pit
- Water recycling from pit with make-up water coming from pit dewatering and general overland flow

^AInitial production to be magnetite with production of construction sands, DMS and zircon concentrate to be funded from initial cashflow within 12 months

12 ORTUS RESOURCES

Not for distribution in the United States

Process flow sheet for Orokolo Bay^

Logistics Chain Overview

Simple, low capital cost logistics

- Simple low cost and flexible barging and transshipping solution modelled on Indonesian operations
- PNG's timber industry is currently operating barges in the Purari River as well as other nearby river systems
- No need for expensive fixed infrastructure
- Barge loader has already been purchased and is stored in Port Moresby
- Low-cost jetty solution designed and easily implemented
- Product movement extensively modelled utilising dedicated stockpiles, prevailing tides and climatic conditions
- Currently tendering water side operations with well known and credentialled operators

Oroko Bay products and target markets

Annual Production:

Magnetite		500 ktpa
Construction Sands		1 Mtpa
Zircon concentrate		~10 ktpa

Robust economics

- A Definitive Feasibility Study (DFS) was completed for Orokolo Bay in September 2020*
- The DFS has been updated in **March 2022** for several key inputs including revised project capex and construction and phased production profile, updated product pricing, exchange rates and shipping costs
- The net effect of the updates has been that the project NPV remains at US\$131M (same value as the September 2020 DFS*)

All assumptions should be read in conjunction with the risks summarised in the additional information section of this presentation

* See MRL ASX release 11 September 2020

Orokolo Bay financial model - March 2022 update

March 2022 DFS Financial Evaluation	
Post tax (real) NPV ₁₀	US\$131M
IRR	90%
Payback	2 years
Average LOM EBIT p.a.	US\$24M

Key pricing inputs^ (average over LOM)	
Iron ore (62%Fe CFR) price	US\$80/t (current spot price ~US\$150/t)
Dense Media Separation (DMS) magnetite price	A\$220/t (delivered to Queensland customer site)
Zircon concentrate price	US\$20 per % Zr (CFR China)
Construction Sands price	A\$38 /t (CFR Sydney)

The March 2022 DFS has included the following updates since Sept 2020 DFS :

- Updated product pricing consensus forecasts for Iron ore, zircon concentrate, construction sands and DMS
- Updated AUD/USD exchange rates
- Updated Shipping rates from PNG to China (Mag Conc and Zr Conc) and Australia (DMS and Construction Sand)
- Updated project timing, Capex and phasing :
 - Initial Construction Capex of US\$13.2 in Q1-4/22 and US\$2.0m in Q1/23, First Magnetite production in Q1/23 ramping up to 100% in Q4/23
 - DMS plant Capex of US\$1.1m in Q2/24, First DMS production in Q3/24 ramping up to 100% in Q1/25
 - Sand and Zr plant Capex of US\$2.4m in Q2-3/24, First Sand and Zr Conc production in Q4/24 ramping up to 100% in Q2/25
- Mining and Reserves remain unchanged from the September 2020 DFS (i.e. 5 Mtpa (ROM) mining operation)

^ Basis of pricing inputs: Iron ore and zircon prices based on long term consensus pricing from Bell Potter; DMS and Construction Sands pricing based on market intelligence undertaken by the Company

Robust forecast cashflows

- Sales revenue based on revenues from multiple products (titano magnetite, zircon concentrate, DMS and construction sands)
- Low capital intensity (~2-year payback on initial construction capex)
- Staged ramp up profile and strong ongoing cash flows (US\$284m in free cash flow over LOM delivers post tax (real) NPV₁₀ of US\$131m)

All assumptions should be read in conjunction with the risks summarised in the additional information section of this presentation

Exposure to iron ore & pricing upside

- Orokolo Bay magnetite price is based on the prevailing 62%Fe CFR iron ore index with discounting formula applied
- Discounts are applied to account for iron content and quality to arrive at a realized sales price for the Orokolo Bay product
- March 2022 DFS uses long-term consensus iron ore price (62%Fe CFR) that averages US\$80/t over the life of the mine (15 years)

Orokolo Bay magnetite pricing based on a discount off the 62%Fe CFR iron ore index

Low-cost Magnetite & benefit of large by-product credits

- Low costs driven by near surface mining
- Short distance from pit to port supports low-cost logistics
- Magnetite Opex costs CFR basis:
 - US\$35.38/t (before by-product credits)
 - US\$39.47/t of by-product credits^
 - Negative US\$4.09/t (after credits)
- Significant by-product credits provide downside protection through the commodity price cycle

^Credits available from sale of DMS, Construction Sands and Zircon Concentrate

Iron ore producers Global Cost Curve (US\$/t)

Impact of by-product credits on opex (US\$/t)

Orokolo Bay Timeline to production in 2023

Growth Pipeline

A portfolio of Iron and Industrial sands projects from pre-production to exploration

- **Gulf Project Precinct** includes 2 other projects near to Orokolo Bay (Gulf South and Malalaua) offering potential for future expansion together with delivery and operational synergies
- Other projects in the pipeline include **Amazon Bay** (with Vanadium potential) and **Western Gulf**
- All projects are coastal, facilitating access for development and for supply of products to future seaborne markets.

Ability to provide Net Zero Products

- Ortus as a related entity to **Mayur Renewables** has the ability to gain exposure to the Heads Of Agreement[^] and other documents entered into between Mayur Renewables with the PNG Forestry Department, PNG Landowners, Climate Change Development Authority and subsequent permits to develop nature-based REDD+ carbon offset projects in PNG.
- Ortus through a pre-existing intercompany agreement will have rights to certain volumes of carbon offsets once these are verified and released to the market.
- Ortus to potentially offer its products with a stapled verified carbon credits.
- Ortus will only attach a stapled carbon credit if the end user is willing to pay a premium to the market price

[^]see MRL ASX releases dated 12 and 20 January 2022

Access to Mayur's large carbon credit inventory in PNG

Charts not to scale – for illustrative purpose only

* Nature Based offsets are projects that protect, transform or restore land in a way that captures and stores more carbon. These projects can lead to the marketing, trading, and sale of carbon credits. REDD refers to mechanisms negotiated under the UNFCCC process to reduce emissions from deforestation and forest degradation in developing countries. An initiative to cut greenhouse gas emissions associated with forest clearing by the inclusion of "voided deforestation" in carbon market mechanisms. More simply, payment in return for the active preservation of existing forests.

ESG & Sustainable Development

Ortus is implementing various ESG initiatives for its Orokolo Bay project

The Orokolo Bay project brings **electricity, sanitization, clean water, medical posts, roads, schooling, training, direct and indirect employment.**

Post mining rehabilitation includes development of mechanized Sago Plantations and ongoing business opportunities currently not present in the project area

Sustainable and responsible development is fundamental to our business including conservation of the natural world around climate change and carbon emissions, and consideration of our impact on our stakeholders

Environmental

- ✓ Orokolo Bay project produces no solid waste no chemical processing
- ✓ The project will use progressive rehabilitation
- ✓ No untreated water or solid discharges
- ✓ Ability to produce low carbon/ net zero products via use of carbon offsets from projects in PNG

Social

- ✓ No requirement for re-settlement of the local community
- ✓ Extensive landownership studies have been completed across the project area
- ✓ Over 110 full time employees
- ✓ Increased access to medical and hygiene facilities
- ✓ Establishment and support for sustainable agriculture

Governance

- ✓ Mining Lease granted for an initial 20-year period
- ✓ Environmental Permit in place for the Project issued by CEPA
- ✓ Environmental Management and Monitoring Plan approved by CEPA
- ✓ Providing support for a Community Based Company and Spin-off businesses

Community support at Orokolo Bay following the signing of compensation and benefits sharing agreements

Board & Management

An experienced management team with an impressive track record of initiating, developing and managing major resource projects in various jurisdictions

HBS provided with a Board position under the terms of their 20% ownership of Ortus

Charles Fear
CHAIRMAN

Charles co-founded Argonaut Limited capital raisings and stock-broking services companies that operate in the resources sector. Charles is a former managing director of CIBC and director of Hartley Poynton Investment Banking. He is also a former partner of international accounting and consultancy group, KPMG

Paul Mulder
MANAGING DIRECTOR

Paul has 28 years of resources experience and the Founder & MD of Mayur Resources (ASX:MRL) and former MD (Coal) at Hancock Prospecting where he led the development of a \$15bn mine port and rail project. Prior to this Paul worked for KKR and also BHP Billiton for 13 years in steel, coal and iron ore divisions in various senior management positions.

Jason Zoller
DIRECTOR

Jason is Chief Executive Officer of the HBS Group having joined in 2016 and oversees operations through offices in Lae, Port Moresby and Brisbane. Jason holds other roles as Director of Hidden Valley Contractors, Director & Chairman of Fubilan Joint Venture and the HBS / Essar Joint Venture

Hubert Namani
INDEPENDENT DIRECTOR

Hubert is a legal practitioner and senior member of the PNG Bar and has extensive commercial and litigation experience spanning over 20 years. Mr. Namani's legal practice Namani & Associates has expertise in public policy, landowner engagement, traditional legal and regulatory activities as well as trade and investment.

Kerry Parker
CHIEF FINANCIAL OFFICER

Kerry has 30 years real and demonstrated experience in leading multi-discipline teams across multiple jurisdictions in all stages of the life cycle of resource projects. Kerry's has deep experience in both equity and debt markets at companies including Arrow Energy, Australian Future Energy, Santos and KPMG.

Shawn Thompson
PROJECT DIRECTOR

Shawn has more than 30 years' experience in designing and delivering, from the ground up, power plant/energy, iron and steel, metals, mineral sands and infrastructure projects in South Africa, Saudi Arabia and New Zealand. He previously held senior roles with Transfield Worley, Beca Carter and Saudi Iron & Steel.

Investment Highlights - Recap

1	Orokelo Bay is the flagship project	• Orokelo Bay is a fully-permitted, construction-ready project in PNG targeting production in H1 2023 • Expected to produce multiple products including magnetite iron ore, DMS, construction sands and zircon concentrate • Offtake discussions ongoing with focus on magnetite into Asian markets
2	Proven in country delivery partner	• Delivery partner (HBS) has 30 years of in country experience as PNGs leading construction and mining services company • HBS 'skin in the game' as a cornerstone investor in Ortus with a 20% shareholding
3	Robust economics at Orokelo Bay	• Low forecast capital requirement – initial stage capex of US\$15.3M[^] to produce magnetite product • Project expected to deliver an NPV₁₀ of US\$ 131M, generating LOM EBIT of US\$24M (A\$32M) p.a.* • Low-cost Magnetite opex US\$35.38/t (CFR) with ability to reduce via use of by-product credits (providing major downside protection)
4	Strong growth pipeline	• Portfolio of similar projects proximate to Orokelo Bay, allowing for potential expansion and duplication of the Orokelo Bay development • Pipeline of other projects, offering future longer term value creation opportunities
5	Net Zero Products	• Future ability to attach nature-based carbon forestry offsets (generated in PNG from Mayur Resources) • Potential to offer customers net-zero carbon products from Orokelo Bay for supply chain de-carbonisation
6	Experienced Board & Management Team	• Board & Management with proven track record of initiating, developing and managing major resource projects in various jurisdictions • Team engaged to lead Ortus Resources has generated US\$1bn in value accretion

[^] excludes (1) HBS investment of A\$8M (USD6M) provided in form of capital works and mobile operating fleet (2) working capital, and (3) expansion capital (US\$3.5M) to produce construction sands, DMS and zircon concentrate to be funded from initial cashflow within 12 months

* DFS updated in March 2022; [#] All products means magnetite, Dense media separation (DMS) magnetite, Construction sands and zircon concentrate

Orokolo Bay – March 2022 DFS Update

The following other key assumptions were used in the updated financial evaluation and NPV calculation:

- Discount rate of 10 % on post-tax cashflows
- 100% equity basis (no debt)
- Project life of 15 years
- Taxation rate of 30% applied with five-year waiver as an establishment incentive
- PNG Royalty of 2.5% (2% Royalty and 0.5% Production Levy) based on an FOB sales price methodology.
- Straight-line depreciation based on a 10-year period.
- No terminal value has been added to the NPV, reflecting no extension to the plant and/or mine life.

An NPV sensitivity analysis is presented in the tornado chart below, showing that the project is most sensitive to Operating costs, Iron Ore Price and Construction Sand Price

Oroko Bay - Resources and Reserves*

Additional resource base available to enable extension of mine life or increase in production

*See MRL ASX release 2 July 2020

JORC Mineral Resource

	Category	Mt	DTR %	Fe %	Ti %	Zircon ppm	DTR Mt	Fe Mt	Ti Mt	Zircon t
Western Area 5.25% (Fe cut off)	Measured	1.64	10.08	11.35	1.94	712	0.17	0.19	0.03	1,170

	Total	30.6	11.45	12.28	1.72	689	3.51	3.76	0.53	21,100	15.2

JORC Resource - Construction Sand

	Category	Mt
Western Area 5.25% (Fe Cut off)	Indicated	38.6
	Inferred	74.2
	Total	112.8

- NOTES:
- Ore Reserves are a sub-set of Mineral Resources
 - Tonnages are in-situ.
 - The figures stated are as at 30 June 2021.
 - Davis Tube Recovery (DTR) produces iron product at 57% Fe

Magnetite (iron ore sands) in Asia Pacific

- Main producers in Asia Pacific are the Taharoa & Waikato mines
- Taharoa exports to Japan and China
- Titanomagnetite iron sand concentrate is used in both sinter and pellet production in China, Australia and Japan.
- The demand for titanomagnetite iron sand concentrate is underpinned by two drivers — plants seeking low-cost iron ore, and plants seeking to extract value from the supplementary constituent's titania and vanadium oxide.

Battery, Titanium & Rare Earth Mineral Potential

- Potential for vanadium, titanium and rare earth minerals across the Ortus portfolio
- Met test works conducted by METS for vanadium and titanium extraction at **Amazon Bay** and Orokolo Bay
- Ortus holds 50% ownership right in Amazon Bay project with ability to earn up to 100%
- **Amazon Bay** project currently attributed nil value – other similar type projects owned by ASX-listed companies are ascribed value by the market

Battery, Titanium & Rare Earth Mineral Potential (cont.)

- **Western Gulf Project** – Historical metallurgical test work completed by previous explorer included a 385kg bulk sample composite
- Gravity and magnetic separation tests consistently produced concentrates of 60-61% Fe magnetite. Zircon, Rutile and ilmenite were also produced.

Titanomagnetite

Titanomagnetite Concentrate produced from bulk testing program in China

Element	TFe	TiO ₂	V ₂ O ₅	SiO ₂	S	Al ₂ O ₃	CaO	MgO	ZrO ₂	P	Cr ₂ O ₃
Content(%)	60.2	9.07	0.48	0.73	0.045	2.75	0.27	2.06	0.015	0.07	0.19

Ilmenite (Haplotypite) Concentrate

Ilmenite (Haplotypite) Concentrate produced from bulk testing program in China

Element	TFe	TiO ₂	V ₂ O ₅	SiO ₂	S	Al ₂ O ₃	CaO	MgO	ZrO ₂	P	Cr ₂ O ₃
Content(%)	51.69	11.04	0.302	2.72	0.03	2.14	0.74	1.87	0.24	0.11	3.28

Zircon Concentrate

Element	ZrO ₂	P ₂ O ₅	Fe ₂ O ₃	Al ₂ O ₃	SiO ₂
Content(%)	60.04	0.0082	0.25	0.198	34.88

Rutile Concentrate

Element	TiO ₂	P	S	Fe ₂ O ₃
Content(%)	85.58	0.019	0.27	1.44

Metallurgical report Conclusion -
“The two concentrates satisfy the quality requirements of the two major purchasers in China (Pangang Group Company Ltd., and Chengde Group Company Ltd).”

Testwork Conclusion: The grade of zirconium dioxide (ZrO₂) in concentrate satisfies the four-grade China-standard, YS/T350-1994, but silicon dioxide content is a little over proof.

Testwork Conclusion: The grade of titanium dioxide in concentrate satisfies the four-grade China-standard, YS/T350-1994, and iron sesquioxide content is a little over proof.

Corporate Structure

- **Ortus Resources** process already commenced to be spun out from Mayur Resources (ASX MRL) as a standalone iron and industrial mineral sands business
- Mayur Iron PNG Ltd a 100% subsidiary of Mayur will be wholly transferred to newly established Ortus Resources SPV
- Mayur Iron PNG Ltd is the 100% owner of Orokolo Bay project and other projects in the portfolio

Mayur Management Fully Aligned

- Mayur was incorporated in 2011
- Funded by Management for 6 years pre-IPO
- Listed on the ASX in 2017

Current ASX: MRL Shareholding structure

Shares on issue
235m

Options (unlisted)
27m

\$43.2m

Fully diluted basis – 17 March 2022

Risks

There are various risks associated with investing in the Company specifically and in the share market generally. Some of the key risks are summarized below, this is not exhaustive

Risk	Details
Title Risk	The Company’s mining and exploration activities are dependent on the maintenance (including renewal) of the tenements in PNG. Maintenance of the Company’s Tenements is dependent on, among other things, the Company’s ability to meet conditions imposed by relevant authorities including compliance with the Company’s work programme requirements which in turn is dependent on the Company being funded to meet those expenditure requirements. Although the Company has no reason to believe that the tenements will not be renewed in the future, there is no assurance that such renewals will be given as a matter of course and there is no assurance that new conditions will not be imposed by the relevant granting authority.
Environmental Risk	The Company’s Projects are in PNG and therefore subject to PNG laws and regulations regarding environmental matters. The authorities that administer and enforce environmental laws determine these requirements. As with all exploration projects and mining projects the Company’s activities are expected to have some form of impact on the environment, particularly if mine development proceeds. Whilst the company largely has a portfolio of standard bulk mining projects that represents a far smaller and less complex project type as compared to other existing and proposed PNG resource projects there still may be a possibility of cost and complexity of complying with environmental laws and regulations which may impact the Company from being able to develop potentially economically viable projects.
Geological Risk	Notwithstanding that results of exploration have resulted in JORC Reserves and Resources for the Company’s Orokolo Bay project; investors should understand that mineral exploration and mine development are high risk undertakings. There can be no assurance that further exploration will result in the discovery of an economically viable Project.
Permitting and Approvals Risk	Mining in PNG requires a Mining Lease, which may be granted once certain criteria are fulfilled, including a completion of a feasibility study and obtaining requisite Environmental Permits. There can be no assurance that the Company will be able to obtain all requisite permits and licenses notwithstanding that it has fulfilled all these licensing criteria or, even if such permits and licenses are obtained, renew them in the future either at all on a timely basis or on commercially acceptable terms and conditions.

Risks

Risk	Details
Product Mix and Pricing Risk	Future revenues from the Orokolo bay Industrial Sands project will be derived from the sales of several different mineral products including iron sands, construction sands and heavy mineral concentrate. Whilst some of these products have prices linked to international price indices (i.e., iron sands being linked to the iron ore price) other products such as construction sands do not and will be subject to negotiation with customers and localized demand and supply factors. These factors may have an adverse effect on the Company's exploration, development and production activities as well as its ability to fund those activities. The Company will develop a product pricing strategy to minimize this risk.
Currency Volatility	International sales prices of various commodities, are denominated in US dollars, whereas the income and expenditure will be in AUD and PGK consequently exposing the Company to fluctuations and volatility of the rates of exchange between the USD and AUD and the PGK and AUD as determined by international markets
Nature of Mineral Exploration and Mining	Likewise, with all the other projects within the portfolio there are risks associated with permits, approvals and agreements not being obtained or the economic viability of extracting the resources not being achieved due to exogenous (e.g. commodity prices) and endogenous (e.g. mineral grade) factors
Country Risk	The PNG risks are not dissimilar to investing in any developing economy (whilst acknowledging PNGs legal framework is based upon the common law principles) and include but are not limited to stakeholder and community risks (i.e. landowners), geo political risks, perceptions of low levels of governance and transparency (from Government and other authorities), lack of skilled labour, perceptions about political instability and personal security and lack of infrastructure to support remote operations.
Infectious Diseases Risk	The outbreak of the coronavirus disease (COVID-19) is having a material effect on global economic markets. The global economic outlook is facing uncertainty due to the pandemic, which has had and may continue to have a significant impact on capital markets. The Company may be adversely affected by the economic uncertainty caused by COVID-19. Further measures to limit the transmission of the virus implemented by governments around the world (such as travel bans and quarantining) may adversely impact the Company's operations or cause disruptions to supply chains. The outbreak of COVID-19 was a sudden and unexpected event and there can be no certainty that similar infectious diseases events having a material effect on global economic and capital markets will not occur in the future.
Acquisition & Growth risk	The Company's projects will involve commercial and legal arrangements with various counterparties in a range of jurisdictions. The Company may partner with entities who renege or simply do not deliver on their obligations despite contractual arrangements being in place. There is a risk that standard legal remedies may not provide full cover for such eventualities.

Competent Person Statement

The information in this presentation that relates to exploration targets, exploration results, and estimates of mineral resources and ore reserves (as applicable) for the Orokolo Bay Project is based on, and fairly represents, information compiled, and conclusions derived by Mr Troy Lowien, who is a Member of the Australian Institute of Geoscientists. Mr Lowien is an employee of Groundworks Plus Pty Ltd and is not an employee of the Company or a related party of the Company. He has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a 'Competent Person' as defined in the 2012 edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (the JORC Code). Mr Lowien consents to the inclusion in this Presentation of the statements based on his information in the form and context in which they appear.
