VISAGE 7 is BEST IN KLAS 2023

Visage 7 achieved the #1 ranking in the Universal Viewer (Imaging) segment with a score of 90.2. KLAS defines the Universal Viewer (Imaging) segment as "Solutions that can be used for referential and/or diagnostic viewing; that support multiple media types (e.g., DICOM, JPEG, MPEG, Cine clip); and that do so across multiple service lines (e.g., radiology, cardiology, pathology, wound care)." To qualify as a Universal Viewer (Imaging) solution, provider organizations must verify to KLAS they use the solution for at least two (2) different clinical service lines. Under this definition, Visage 7 actually provides more functionality than PACS alone.
