SALTA LITHIUM PROJECT - DRILLING TO COMMENCE

The Directors of PepinNini Minerals Ltd(PNN, the Company) are pleased to announce that drilling permits have been signed by the Salta Province Mining Secretary for drilling the Company's Pocitos Project. Drilling contractor Hidrotec Perforaciones, who have considerable experience in the Puna region with Lithium Brine drilling, have been engaged. Drilling will commence the 14 May 2017.

Phase 1 drilling will be two diamond core boreholes to test for Lithium brine bearing aquifers and sample collection to test for lithium grade. Sample results would be expected early June. Phase 2 drilling will be two pumping test wells to determine hydraulic properties of the aquifers.

We are pleased to have the project move forward to this stage and excited about results to come said Managing Director Rebecca Holland-Kennedy.
