Where are we?

Why the Tanami-Arunta?

- The most under-explored major gold belt in Australia.
- ABM able to consolidate a significant regional position in two transactions.
- Part of a global Paleoproterozoic gold event.
- Relatively little systematic or deep exploration.
- Analogous to Birimian Shield in West Africa (Ghana, Mali, Burkina Faso etc.).
- Prior to 1990s only yielding relatively small shallow oxide gold deposits.
- Callie Gold Mine (Newmont) discovered with a blind surface signature in 1990s and now one of Australia’s best gold mines (~360,000 oz pa @ 6g/t &>5Moz Reserve + Production).

- First million ounce plus porphyry hosted discovery in the entire Tanami Region.
- In ground discovery costs of <\$3.00 per ounce.
