ASX Announcement

Drilling Completed at East Ponton

Highlights

- Drilling completed at Regener8's East Ponton Project
- Hatlifter (Ni-Co) and Grasshopper (REE-Nb) targets tested
- Samples submitted for assays

Regener8 Resources NL (ASX: R8R) (**Regener8** or the **Company**) is pleased to announce the completion of the maiden drilling program at the Company's East Ponton project.

The drill program was undertaken at the Hatlifter paleochannel-hosted Ni-Co target and Grasshopper REE-Nb carbonatite prospect. Samples have been submitted to ALS for assay.

Regener8 Managing Director, Stephen Foley, commented:

"Regener8 has safely completed the maiden drilling program at East Ponton. We are proud of the team overcoming challenging subsurface drilling conditions and look forward to receiving assay results in the coming months."

This ASX Announcement has been authorised for release by the Board.

Background Regener8 Resources' Projects

Regener8's diverse and future facing exploration project portfolio consists of three key projects across Australia:

1. **North Achilles Project, South Cobar, NSW:** Polymetallic (Au, Ag, Pb, Zn)

Located immediately beside and along trend of Australian Gold and Copper's (ASX:AGC) Achilles discovery with outstanding results including **5 metres @ 16.9g/t Au, 1,667g/t Ag, 0.4% Cu & 15% Pb + Zn** (A3RC030 - AGC ASX Ann. 04.06.2024)

2. **East Ponton Project, WA:** Critical Minerals (Rare Earths, Ni, Co)

Located approximately 220km east of Kalgoorlie and nominally 40km south south-east of known carbonatite discoveries. These include the exploration restricted Cundeelee carbonatite, described by BHP as the largest, effectively untested carbonatite in the world (port A56942, BHP 1998) and the Ponton Intrusion discovery with some of the highest-grade intersections ever found in Australia including (ASX: GXY announcement 11 January 2011) **16m @ 14.48% TREO** (PN03A), **28m @ 10.50% TREO including 6m @ 20.57% TREO** (PN10A) and **26m @ 6.99% TREO** from surface including 8m @ 13.12% TREO (PN09A)

3. **Kookynie Gold Project, WA:** Gold

Sitting within the Kookynie Gold district north of Kalgoorlie, the project hosts substantial historical workings and exploration with intersections including **2m @ 70.5 g/t Au** (RC38), **2m @ 15.4 g/t Au** (RC315) and **2m @ 11.32 g/t Au** (RC391). Regener8's 2023 program found encouraging results which included **5m @ 3.18 g/t Au** (NGRC017) and **2m @ 7.77g/t Au** (including **1m @ 14.8 g/t Au** in NGRC037).
