

30 April 2015

## Quarterly Activities Report March 2015

- **Sulitjelma VTEM assessment reveals 6 priority, copper/zinc massive sulphide targets – Immediate follow up program commissioned**
- **Round two drilling at Seimana commissioned and commenced April**
- **Fully underwritten entitlement issue to raise ~\$1.8M**

### Overview

With the injection of funds from an entitlement issue and shortfall allocation during the quarter and with new and enthusiastic major shareholders, Drake is positioned to re-energise exploration. In the immediate term the Company has commissioned two exploration programs, both of which commenced in April 2015:

1. 1250m drilling program pursuing extensions to gold mineralisation at the Seimana permits - Guinea.
2. A ground EM survey of 6 copper/zinc targets at the Sulitjelma project – Norway.

### **Sulitjelma Copper / Zinc Prospect – Norway**

A VTEM survey at the Sulitjelma Joint Venture<sup>1</sup> in Norway was conducted during the previous quarter with final interpretation released in January confirming six high priority targets. Four targets of interest lie within the western thrust or Sydgruvefeltet ore field (Fig 1) which is an area of known massive sulphide mineralisation mapped over a 10km north / south direction and hosts the Sagmo (1.9Mt mined of 1.6% Cu and 0.23% Zn<sup>2</sup>) and the Jakobsbakken (4.47Mt mined of 1.55% Cu and 2.42% Zn<sup>2</sup>) historic orebodies. In the eastern Nordgruvefeltet region, an extensive conductive horizon with a strike length in excess of 5kms coincident with a copper / zinc bearing sulphide horizon is mapped. Two anomalies have been selected from this region. Dump samples from old workings and composite chip samples of local outcrop near one of these anomalies returned encouraging results of up to 10.7% copper and 15.1% zinc.

**A follow up ground EM program was scoped immediately following the VTEM interpretation and commenced early April 2015. The EM program will help define subsequent drill targets.**

**Figure One:** Plan showing area flown with VTEM, Drake claims, priority targets and outcropping massive sulphides. As can be seen by the number of mined ore bodies, a large number of underground access paths exist and might be a considerable help during both exploration and potential operations stages.

**Figure Two:** An historic section showing the Avilon Stoll (N-S) with anomaly 1 modelled plate superimposed and sitting on or slightly above the amphibolite horizon in the plane of the Kochhammer Mine and Sagmo ore level. The historic drill hole Av No 1 ended in amphibolite but there appears to be no assays collected of this final portion of the drill core.

The first ground exploration program ever conducted over the Southern section of Drake's Seimana prospect was conducted in 2014 and revealed potential for an emerging and significant gold discovery. The field program delivered individually spectacular grab sample results up to 70g/t gold (Fig 3) and, more importantly, a remarkable number of potential drill targets across the entire E-W 18kms of the recently acquired land (Fig 4).

**A 1250m RC drill program was scoped during this quarter and commenced in late April 2015.**

**Figure Four:** During the quarter Drake drilled 7 of the 40 targets identified across the Seimana permit area with 5 targets generating noteworthy results.

## Corporate Activity

During the quarter, Drake conducted a fully underwritten renounceable pro rata rights entitlement issue of 364,283,823 new shares at an issue price of \$0.005 per share on the basis of 1.5 new shares for every share held together with one free attaching new option for every share subscribed for and issued to raise ~\$1.8M before the costs of the offer. The injection of new capital as a result of this offer places Drake in a relatively strong position amongst its peers in the current difficult capital market.

## Footnotes

<sup>1</sup>: Drake has a Joint Venture arrangement with Panoramic Resources covering the Sulitjelma area. Under the JV terms, Panoramic has the right to sole-fund exploration to earn a 70% interest in the project.

**Competent Persons Statement**

*The information related to Sulitjelma exploration results is extracted from the report entitled "VTEM results reveals 6 targets at Sulitjelma Project, Norway" created on 21/01/15 and is available to view on [www.drakeresources.com.au](http://www.drakeresources.com.au). The information related to Seimana exploration results is extracted from the report entitled "Seimana Gold Project - Final drill results" created on 30/07/14 and is available to view on [www.drakeresources.com.au](http://www.drakeresources.com.au). The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.*

**Caution Regarding Forward Looking Information.**

*This document contains forward looking statements concerning Drake. Forward-looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward looking statements as a result of a variety of risks, uncertainties and other factors. Forward-looking statements are inherently subject to business, economic, competitive, political and social uncertainties and contingencies. Many factors could cause the Company's actual results to differ materially from those expressed or implied in any forward-looking information provided by the Company, or on behalf of, the Company. Such factors include, among other things, risks relating to additional funding requirements, metal prices, exploration, development and operating risks, competition, production risks, regulatory restrictions, including environmental regulation and liability and potential title disputes. Forward looking statements in this document are based on Drake's beliefs, opinions and estimates of Drake as of the dates the forward looking statements are made, and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future development.*

## **Compliance statement**

- 1 This statement has been prepared under accounting policies which comply with accounting standards as defined in the Corporations Act or other standards acceptable to ASX (see note 5).
- 2 This statement does give a true and fair view of the matters disclosed.

Signed:

\_\_\_\_\_  
Director and Company Secretary

Dated: 30 April 2015

Print name: Jay Stephenson

## **Notes**

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 Issued and quoted securities. The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report.
- 5 Accounting Standards ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
