2024 Half Year Results Presentation

31 July 2024

The Rio Tinto 2024 half year results presentation will be given today at 11:30am (AEST) / 2.30am (BST) by Rio Tinto Chief Executive, Jakob Stausholm and Chief Financial Officer, Peter Cunningham. The presentation slides are attached and also available at <https://www.riotinto.com/en/invest/financial-news-performance/results>.

The live webcast will be available at <https://www.riotinto.com/en/invest/financial-news-performance/results>.

There will be an additional Q&A session held by the Chief Executive and Chief Financial Officer at 17:00pm (AEST) / 08:00am (BST) today. Registration is available at <https://www.riotinto.com/en/invest/financial-news-performance/results>.

2024 Half Year Results

31 July 2024

Oyu Tolgoi, Mongolia

Cautionary and supporting statements

This presentation has been prepared by Rio Tinto plc and Rio Tinto Limited (together with their subsidiaries, “**Rio Tinto**”). By accessing/attending this presentation you acknowledge that you have read and understood the following statements.

Forward-looking statements

This presentation includes “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical facts included in this report, including, without limitation, those regarding Rio Tinto’s financial position, business strategy, plans and objectives of management for future operations (including development plans and objectives relating to Rio Tinto’s products, production forecasts and reserve and resource positions), are forward-looking statements. The words “intend”, “aim”, “project”, “anticipate”, “estimate”, “plan”, “believes”, “expects”, “may”, “should”, “will”, “target”, “set to” or similar expressions, commonly identify such forward-looking statements.

Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Rio Tinto, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements, particularly in light of the current economic climate and the significant volatility, uncertainty and disruption arising in connection with the Ukraine conflict. Such forward-looking statements are based on numerous assumptions regarding Rio Tinto’s present and future business strategies and the environment in which Rio Tinto will operate in the future. Among the important factors that could cause Rio Tinto’s actual results, performance or achievements to differ materially from those in the forward-looking statements include, but are not limited to: an inability to live up to Rio Tinto’s values and any resultant damage to its reputation; the impacts of geopolitics on trade and investment; the impacts of climate change and the transition to a low-carbon future; an inability to successfully execute and/or realise value from acquisitions and divestments; the level of new ore resources, including the results of exploration programmes and/or acquisitions; disruption to strategic partnerships that play a material role in delivering growth, production, cash or market positioning; damage to Rio Tinto’s relationships with communities and governments; an inability to attract and retain requisite skilled people; declines in commodity prices and adverse exchange rate movements; an inability to raise sufficient funds for capital investment; inadequate estimates of ore resources and reserves; delays or overruns of large and complex projects; changes in tax regulation; safety incidents or major hazard events; cyber breaches; physical impacts from climate change; the impacts of water scarcity; natural disasters; an inability to successfully manage the closure, reclamation and rehabilitation of sites; the impacts of civil unrest; the impacts of the Ukraine conflict; breaches of Rio Tinto’s policies, standard and procedures, laws or regulations; trade tensions between the world’s major economies; increasing societal and investor expectations, in particular with regard to environmental, social and governance considerations; the impacts of technological advancements; and such other risks identified in Rio Tinto’s most recent Annual Report and accounts in Australia and the United Kingdom and the most recent Annual Report on Form 20-F filed with the United States Securities and Exchange Commission (the “SEC”) or Form 6-Ks furnished to, or filed with, the SEC. Forward-looking statements should, therefore, be construed in light of such risk factors and undue reliance should not be placed on

forward-looking statements. These forward-looking statements speak only as of the date of this report. Rio Tinto expressly disclaims any obligation or undertaking (except as required by applicable law, the UK Listing Rules, the Disclosure Guidance and Transparency Rules of the Financial Conduct Authority and the Listing Rules of the Australian Securities Exchange) to release publicly any updates or revisions to any forward-looking statement contained herein to reflect any change in Rio Tinto’s expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based.

Nothing in this presentation should be interpreted to mean that future earnings per share of Rio Tinto plc or Rio Tinto Limited will necessarily match or exceed its historical published earnings per share. Past performance cannot be relied on as a guide to future performance.

Disclaimer

Neither this presentation, nor the question and answer session, nor any part thereof, may be recorded, transcribed, distributed, published or reproduced in any form, except as permitted by Rio Tinto. By accessing/ attending this presentation, you agree with the foregoing and, upon request, you will promptly return any records or transcripts at the presentation without retaining any copies.

This presentation contains a number of non-IFRS financial measures. Rio Tinto management considers these to be key financial performance indicators of the business and they are defined and/or reconciled in Rio Tinto’s annual results press release, Annual Report and accounts in Australia and the United Kingdom and/or the most recent Annual Report on Form 20-F filed with the SEC or Form 6-Ks furnished to, or filed with, the SEC.

Reference to consensus figures are not based on Rio Tinto’s own opinions, estimates or forecasts and are compiled and published without comment from, or endorsement or verification by, Rio Tinto. The consensus figures do not necessarily reflect guidance provided from time to time by Rio Tinto where given in relation to equivalent metrics, which to the extent available can be found on the Rio Tinto website.

By referencing consensus figures, Rio Tinto does not imply that it endorses, confirms or expresses a view on the consensus figures. The consensus figures are provided for informational purposes only and are not intended to, nor do they, constitute investment advice or any solicitation to buy, hold or sell securities or other financial instruments. No warranty or representation, either express or implied, is made by Rio Tinto or its affiliates, or their respective directors, officers and employees, in relation to the accuracy, completeness or achievability of the consensus figures and, to the fullest extent permitted by law, no responsibility or liability is accepted by any of those persons in respect of those matters. Rio Tinto assumes no obligation to update, revise or supplement the consensus figures to reflect circumstances existing after the date hereof.

Cautionary and supporting statements (cont.)

Simandou - Production Targets

The estimated annualised capacity of approximately 60 million dry tonnes per annum (27 million dry tonnes Rio Tinto Share) iron ore for the Simandou life of mine schedule referenced in slides 15,16 and 19 was previously reported in a release to the Australian Securities Exchange (ASX) dated 6 December 2023 titled “Simandou iron ore project update”. Rio Tinto confirms that all material assumptions underpinning that production target continue to apply and have not materially changed.

Oyu Tolgoi - Production Targets

The 500ktpa copper production target (stated as recoverable metal) for the Oyu Tolgoi underground and open pit mines for the years 2028 to 2036 referenced in slide 12 and 19 were previously reported in a release to the ASX dated 11 July 2023 “Investor site visit to Oyu Tolgoi copper mine, Mongolia”. All material assumptions underpinning that production target continue to apply and have not materially changed.

Jakob Stausholm

Net debt	(5.1)	(4.2) ²	17%

Gudai-Darri, Pilbara, Australia

Resilient pricing for our commodities

Iron ore¹ CFR index -3% (1H24 vs 1H23)

Realised pricing	H1 2024	H1 2023	Delta
Iron ore (FOB \$/dmt)	106	107	-1%

- China’s crude steel production contracted by 2.7% YoY in H1 despite the 22% YoY increase in steel exports
- Seaborne iron ore supply in H1 increased by 3% YoY to a record 770Mt
- Strong seaborne supply supported China’s iron ore imports, which rose by 5% YoY to a record 640Mt in H1

Copper LME² +4% (1H24 vs 1H23)

Realised pricing	H1 2024	H1 2023	Delta
Copper (c/lb)	419	396	+6%

- LME copper price rallied in Q1 on the back of firm global demand and downward revision to copper mine supply
- Chinese demand growth slowed into Q2, as rising prices temporarily hit demand

Aluminium LME² +1% (1H24 vs 1H23)

Realised pricing	H1 2024	H1 2023	Delta
Aluminium (\$/t) ⁴	2,746	2,866	-4%

- Aluminium price rallied in Q2 amid higher investor inflows
- Market premiums ex-China rose from January 2024, amid tight supply of remelt units, low inventories and high ocean freight costs
- US scrap discounts narrowed as scrap availability tightened

Other financials

Balance sheet remains strong

Disciplined approach is unchanged, we intend to maintain it throughout the cycle

- Balance sheet strength is an asset. Offers resilience and creates optionality

Principles-based approach to anchor balance sheet around a single A credit rating

- Moody's: A1 (stable), S&P: A (stable)
- No net debt target

Our financial strength allows us to simultaneously:

- Invest with discipline for growth and decarbonisation (up to \$10bn per year in total capex depending on opportunities)
- Continue to pay attractive dividends in line with our policy (consistent eight-year track record)

Modelling EBITDA

Underlying EBITDA sensitivity

	Average published price/ exchange rate for H1 2024	US\$m impact on full year 2024 underlying EBITDA of a 10% change in prices/exchange rates
Aluminium - US\$ per tonne	2,358	1,212
Copper - US cents per pound	412	627
Gold - US\$ per troy ounce	2,203	74
Iron ore realised price (FOB basis) - US\$ per dry metric tonne	105.8	2,662
Australian dollar against the US dollar	0.66	752
Canadian dollar against the US dollar	0.74	320
Oil (Brent) - US per barrel	84	183

Simandou expenditure summary

H1 2024 Actuals

	\$m	
Cash capital expenditure, 100% Simfer basis (page 59 of HY24 press release)	(742)	
Operating assets as of December 2023 (page 59 of HY24 press release)	738	
Cash capital expenditure (PP&E)	742	> Simfer (100%) capital expenditure incurred to 30 June 2024
Cash calls paid by CIOH (page 31 of HY24 press release)	(411)	> Relating to CIOH payment of its share of cash expenditures until the end of 2023 for the Simandou project on 28 June
Other (working capital, non-controlling interest etc.)	123	> Relating to changes in working capital, non-controlling interest and other balances
Operating assets as of 30 June 2024 (page 60 of HY24 press release)	1,192	

Debt maturity profile

At 30 June 2024¹

€417m bond with 2.875% coupon matures in December 2024

No further corporate bond maturities until 2028

At 30 June weighted average outstanding debt maturity of corporate bonds ~15 years (~11 years for Group debt)

Liquidity remains strong under stress tests

\$7.5bn back-stop Revolving Credit Facility matures in November 2028
