Dear Sir/Madam,

Nickel Sulphide Gossans Identified at Hilditch

Ramelius Resources Limited has identified Nickel Sulphide Gossans at a number of scree and sub-outcrop locations over a distance of 300 metres in the north eastern section of the Hilditch tenements.

These samples have been confirmed as sulphide bearing nickel gossans from Petrological and Geochemical analysis, the most anomalous of which returned values of 1.4% Nickel (14,000 ppm) 0.37% Copper (3,700 ppm) and 760 ppb Platinum plus Palladium (PGM).

RC drilling of these Nickel Sulphide targets is expected to commence within two weeks subject to rig availability.

For further information please contact:

Mr. Joe Houldsworth
